1. MARINE ACTIVITIES

1.1. Summary:

Mariners are advised that circa between 07/10/2025 and 13/10/2025, the Jack-up Barge (JUB) 'JB 120' will commence jacking down next to the East Anglia THREE Offshore Converter Station (OFCS) within the East Anglia THREE Windfarm and departing from the area set out in section 2 of this document.

During the rig move, vessels are requested to keep a 2000 m safety distance at all times from the JUB 'JB 120' and supporting tugs.

1.2. Activity Description:

The jack-up vessel 'JB 120' is positioned next to the East Anglia THREE OFCS within the East Anglia THREE Offshore Windfarm area. The vessel will depart from this location.

- Jacking-Down Procedure: The Activity commences with the lowering of the JB 120. Once jacked down the tugs will connect to the Jack Up Barge (JUB). Once the tugs are connected the JUB will retract its legs. From that point on the tugs are the sole means of station keeping for the JB 120
- Rig move: The tow will depart from location following the leg retraction and continue towards Schiedam.

During operations, the 'JB 120', 'Fairplay 38 (Lead tug)', 'Fairplay 27 (Assistant tug)' and 'Waterman' (Assistant tug) will be restricted in their ability to manoeuvre as defined under COLREGs (International Regulations for Preventing Collisions at Sea 1972) and will display the appropriate day shapes and lights. The vessels will also transmit an Automatic Identification System (AIS) message.

A Statutory Safety zone of 500m radius will be in place around the JUB JB120 at all times.

'JB 120' and supporting tug are supplied with VHF multi-channel radios and mobile phones.

1.3. Program Schedule:

The 'JB 120' is expected to demobilize at EA3 between 07/10/2025 and 13/10/2025. Works are subject to weather conditions.

The progress of demobilisation works, and completion will be notified via East Anglia THREE Weekly Notice of Operations. Completion of works will be notified by future Notice to Mariners.

All vessels will monitor VHF Channel 16 and VHF DSC Channel 70 continuously throughout the operation. It is currently anticipated that weather permitting, works will be carried out on a continuous basis (i.e., 24-hour working, seven days a week) unless notified otherwise.
