1. MARINE ACTIVITIES

1.1. Summary:

Mariners are advised that circa the 08/08/2025 the **SSCV Sleipnir** will install the East Anglia THREE Offshore Converter Station (**OFCS**) Foundation Jacket and pin piles within the East Anglia THREE Offshore Windfarm area as detailed in section [2.1](#) of this document.

During the Installation period, vessels are requested to keep a 2000m safety distance at all times from the SSCV Sleipnir and supporting vessels.

1.2. Activity Description:

The offshore installation vessel **SSCV Sleipnir** will install the **Offshore Converter Station (OFCS)** Foundation Jacket and pin piles within the East Anglia THREE Offshore Windfarm area.

Prior to installation of the foundation jacket and pin piles, the Anchor Handling Tug Bylgia will deploy noise monitoring equipment within the East Anglia THREE boundary of the Offshore Windfarm Array. The confirmed positions of noise monitoring equipment will be notified via future Notice To Mariners.

During operations, the **SSCV Sleipnir** will be restricted in its ability to manoeuvre as defined under COLREGs (International Regulations for Preventing Collisions at Sea 1972) and will display the appropriate day shapes and lights. The vessel will also transmit an Automatic Identification System (AIS) message.

A Statutory Safety Zone of **500m** radius will be in place around the **SSCV Sleipnir** during installation of the East Anglia THREE Offshore Converter Station (**OFCS**) Foundation Jacket and pin piles. The Anchor Handling Tug Bylgia will pre-deploy anchors in an area within an approximate radius of 2km from the OFCS installation location, anchor positions will be notified via future notice to mariners.

All vessels are requested to maintain a minimum safe passing distance of 2km from the SSCV Sleipnir during the operation.

Tugs Skandi Handler and EEMS Wrangler will tow two unmanned cargo barges to assist with operations.

Barge H405: (Pile Transport)

Barge H407: (OFCS Jacket Transport)

Bylgia will be used as an anchor handler to connect Skandi Handler to a pre-laid anchor. The Skandi Handler, Eems Wrangler and Bylgia will transmit vessel status via Automatic Identification System (AIS)

The safety zones will be monitored by **GV Tess**, the primary responsibility of the guard vessel is to warn passing traffic of ongoing works and active safety zones.

1.3. Program Schedule:

All vessels will monitor VHF Channel 16 and VHF DSC Channel 70 continuously throughout the operation. It is currently anticipated that weather permitting, works will be carried out on a continuous basis (i.e., 24-hour working, seven days a week) unless notified otherwise.

Works are due to commence circa the 08/08/2025. Progress of installation works and completion will be notified via East Anglia THREE Weekly Notice of Operations.

The Offshore Converter Station Topside installation operations are due to commence later this year, works will be notified via future Notice To Mariners.
