

Technical Appendix 11.2 Gazetteer of Heritage Assets

Ref	Name	Description	E	N	Status	Period	Importance	ZTV	Significance	Setting
WITHIN THE TURBINE AREA										
85640	GLENMAID MOOR	CLEARANCE CAIRN(S) (PERIOD UNASSIGNED), STRUCTURE(S)	296700	589300	Non-designated	Unknown	Low (Local)	Within ZTV	No impact on asset significance	Asset is located within an area of felled forestry. It is evidence of field clearance to facilitate cultivation/grazing of local land. The contribution made by setting to the asset's cultural significance pertains to its relationship with its immediate vicinity instead of wider landscape setting. The presence of the proposed turbines would not impact the ability of the visitor to understand, appreciate and experience these local factors of setting which contribute to the asset's cultural significance. No impact predicted.
MDG13054	LAMB HILL	BATTLE; AIRCRAFT CRASH SITE	294847	592649	Non-designated	20th Century to Modern	High (National)	Within ZTV	No impact on asset significance	Asset does not have a wider landscape setting which contributes to its cultural significance. The presence of the proposed turbines would not prevent a visitor from understanding, appreciating and experiencing the location where the aircraft crashed. No impact predicted.
MDG16887	GLENCORSE HILL	ENCLOSURE; BUILDING	295600	591220	Non-designated	Post-medieval	Low (Local)	Within ZTV	No impact on asset significance	Asset is located within an area of commercial forestry. It is unclear whether the asset remains extant, however the factors of its setting which contribute to its cultural significance relate to its immediate vicinity which would have been suitable for agriculture. The presence of the proposed turbines would not prevent the visitor from understanding, appreciating and experiencing the asset in relation to its important local setting. No impact predicted.
MDG16888	GOUKSTANE BURN	ENCLOSURE	296045	590808	Non-designated	Post-medieval	Low (Local)	Within ZTV	No impact on asset significance	Asset is located within an area of commercial forestry. It is unclear whether the asset remains extant, however the factors of its setting which contribute to its cultural significance relate to its immediate vicinity which would have been suitable for agriculture and which would have been utilised by those that lived in this location. The presence of the proposed turbines would not prevent the visitor from understanding, appreciating and experiencing the asset in relation to its

Technical Appendix 11.2 Gazetteer of Heritage Assets

										important local setting. No impact predicted.
MDG21676	GLENMAID MOOR	CAIRN	296980	589400	Non-designated	Early Neolithic to 19th Century	Low (Local)	Within ZTV	No impact on asset significance	Asset is located within an area of commercial forestry and was not accessible at the time of the field visit. It is likely that the cairn has been truncated by commercial forestry operations. The relative proximity between the cairn and cairnfields of a similar date may suggest the asset was a field clearance cairn and is evidence of how the land was cleared of stone to allow for cultivation/ grazing of livestock. The factors of its setting which contribute to its cultural significance relate to its immediate vicinity which would have been suitable for agriculture. The presence of the proposed turbines would not prevent the visitor from understanding, appreciating and experiencing the asset in relation to its important local setting. No impact predicted.
MDG21677	GLENMAID MOOR	CAIRN	296791	589444	Non-designated	Early Neolithic to 19th Century	Low (Local)	Within ZTV	No impact on asset significance	Asset is located within an area of commercial forestry and was not accessible at the time of the field visit. It is likely that the cairn has been truncated by commercial forestry operations. The relative proximity between the cairn and cairnfields of a similar date may suggest the asset was a field clearance cairn and is evidence of how the land was cleared of stone to allow for cultivation/ grazing of livestock. The factors of its setting which contribute to its cultural significance relate to its immediate vicinity which would have been suitable for agriculture. The presence of the proposed turbines would not prevent the visitor from understanding, appreciating and experiencing the asset in relation to its important local setting. No impact predicted.

Ref	Name	Description	E	N	Status	Period	Importance	ZTV	Significance	Setting
MDG21681	GLENMAID MOOR	STRUCTURE	296540	589690	Non-designated	18th Century to Modern	Low (Local)	Within ZTV	No impact on asset significance	Asset is located within an area of commercial forestry. The factors of its setting which contribute to its cultural significance relate to its immediate vicinity which would have been suitable for agriculture. The presence of the proposed turbines would not prevent the visitor from understanding, appreciating and experiencing the asset in relation to its important local setting. No impact predicted.
MDG21682	GLENMAID MOOR	ENCLOSURE	296610	589750	Non-designated	18th Century to Modern	Low (Local)	Within ZTV	No impact on asset significance	Asset is located within an area of commercial forestry. The factors of its setting which contribute to its cultural significance relate to its immediate vicinity which would have been suitable for agriculture. The presence of the proposed turbines would not prevent the visitor from understanding, appreciating and experiencing the asset in relation to its important local setting. No impact predicted.
MDG21683	GLENMAID MOOR	CAIRNFIELD	296457	589786	Non-designated	Early Neolithic to 19th Century	Low (Local)	Within ZTV	No impact on asset significance	Asset is located within an area of commercial forestry and was not accessible at the time of the field visit. It is likely that the cairn has been truncated by commercial forestry operations. The relative proximity between the cairn and cairnfields of a similar date may suggest the asset was a field clearance cairn and is evidence of how the land was cleared of stone to allow for cultivation/ grazing of livestock. The factors of its setting which contribute to its cultural significance relate to its immediate vicinity which would have been suitable for agriculture. The presence of the proposed turbines would not prevent the visitor from understanding, appreciating and experiencing the asset in relation to its important local setting. No impact predicted.

Technical Appendix 11.2 Gazetteer of Heritage Assets

Ref	Name	Description	E	N	Status	Period	Importance	ZTV	Significance	Setting
MDG21684	GLENMAID MOOR	CAIRN	296736	589770	Non-designated	Early Neolithic to 19th Century	Low (Local)	Within ZTV	No impact on asset significance	Asset is located within an area of commercial forestry. The field visit found that the asset is no longer extant and has most likely been truncated by commercial forestry operations. It is therefore difficult to confidently assign a function to the cairn although given the relative proximity between the cairn and cairnfields of a similar date may suggest the asset was a field clearance cairn and is evidence of how the land was cleared of stone to allow for cultivation/ grazing of livestock. The factors of its setting which contribute to its cultural significance relate to its immediate vicinity which would have been suitable for agriculture. The presence of the proposed turbines would not prevent the visitor from understanding, appreciating and experiencing the asset in relation to its important local setting. No impact predicted.
MDG21685	GLENMAID MOOR	STRUCTURE	296720	589780	Non-designated	18th Century to Modern	Low (Local)	Within ZTV	No impact on asset significance	Asset is located within an area of commercial forestry. It is likely that the asset was a field clearance cairn and is evidence of how the land was cleared of stone to allow for cultivation/ grazing of livestock. The factors of its setting which contribute to its cultural significance relate to its immediate vicinity which would have been suitable for agriculture. The presence of the proposed turbines would not prevent the visitor from understanding, appreciating and experiencing the asset in relation to its important local setting. No impact predicted.
MDG21686	GLENMAID MOOR	STRUCTURE; CAIRN	296600	589880	Non-designated	Early Neolithic to Modern	Low (Local)	Within ZTV	No impact on asset significance	Asset is located within an area of rough pasture and survives as a very low (c.0.2 m in height) mound approximately 1.5 m in diameter. The dimensions of the asset suggest it was a field clearance cairn and is evidence of how the land was cleared of stone to allow for cultivation/ grazing of livestock. The factors of its setting which contribute to its cultural significance relate to its immediate vicinity which would have been suitable for agriculture. The presence

Technical Appendix 11.2 Gazetteer of Heritage Assets

Ref	Name	Description	E	N	Status	Period	Importance	ZTV	Significance	Setting
										of the proposed turbines would not prevent the visitor from understanding, appreciating and experiencing the asset in relation to its important local setting. No impact predicted.
MDG21687	GLENMAID MOOR	BOUNDARY BANK	296573	589899	Non-designated	18th Century to Modern	Low (Local)	Within ZTV	No impact on asset significance	The factors of its setting which contribute to the asset's cultural significance relate to its immediate vicinity which would have been suitable for agriculture. The presence of the proposed turbines would not prevent the visitor from understanding, appreciating and experiencing the asset in relation to its important local setting. No impact predicted.
MDG21688	GLENMAID MOOR	CAIRNFIELD	296580	589880	Non-designated	Early Neolithic to 19th Century	Low (Local)	Within ZTV	No impact on asset significance	Asset is located within an area of commercial forestry. The asset is evidence of how the land was cleared of stone to allow for cultivation/ grazing of livestock. The factors of its setting which contribute to its cultural significance relate to its immediate vicinity which would have been suitable for agriculture. The presence of the proposed turbines would not prevent the visitor from understanding, appreciating and experiencing the asset in relation to its important local setting. No impact predicted.
MDG5069	GLENMAID MOOR	CLEARANCE CAIRN; BUILDING	296828	589809	Non-designated	Medieval to 19th Century	Low (Local)	Within ZTV	No impact on asset significance	Asset is located within an area of commercial forestry and was not accessible at the time of the field visit. The asset is evidence of how the land was cleared of stone to allow for cultivation/ grazing of livestock. The factors of its setting which contribute to its cultural significance relate to its immediate vicinity which would have been suitable for agriculture. The presence of the proposed turbines would not prevent the visitor from understanding, appreciating and experiencing the asset in relation to its important local setting. No impact predicted.

Technical Appendix 11.2 Gazetteer of Heritage Assets

Ref	Name	Description	E	N	Status	Period	Importance	ZTV	Significance	Setting
MDG6453	KNOCKENSHANG	CAIRN	295500	593200	Non-designated	Early Neolithic to Late Bronze Age	Low (Local)	Within ZTV	Wider landscape contributes to asset significance. Impact possible in principle	The asset is labelled as a "tumulus" on the First Edition OS map and is most likely the site of a burial cairn. Asset is located within an area of commercial forestry. The field visit found that the asset is no longer extant as an above ground feature and has been truncated by deep ploughing for forestry. Its site, which is under grass, is now covered by both dead wood and young trees. The cairn can no longer be experienced as an above ground feature. The contribution made by setting to its cultural significance is therefore limited to its general topographic positioning on a north facing slope likely intentionally located to overlook Windyhill Burn to the north. How the asset functioned within this landscape is however no longer apparent such that the presence of the proposed turbines would not detract from the ability of the visitor to speculate as to how the cairn may once have related to its wider landscape. No impact predicted.
MDG6460	KING'S WELL	SPRING	296107	590809	Non-designated	Medieval to Modern	Medium (Regional)	Within ZTV	No impact on asset significance	Asset is a natural feature and derives its cultural significance from its associations with Robert the Bruce who is said to have drunk from the spring. Its associative qualities would remain unaffected by the proposed turbines.
MDG9665	GLENMAID MOOR	STRUCTURE; CLEARANCE CAIRN	296539	589816	Non-designated	Early Bronze Age to 19th Century	Medium (Regional)	Within ZTV	No impact on asset significance	The factors of its setting which contribute to the asset's cultural significance relate to its immediate vicinity which would have been suitable for agriculture. The presence of the proposed turbines would not prevent the visitor from understanding, appreciating and experiencing the asset in relation to its important local setting. No impact predicted.

Technical Appendix 11.2 Gazetteer of Heritage Assets

Ref	Name	Description	E	N	Status	Period	Importance	ZTV	Significance	Setting
MDG9667	AUCHENGEITH	FARMSTEAD	295950	590250	Non-designated	Medieval to Modern	Medium (Regional)	Within ZTV	No impact on asset significance	The factors of its setting which contribute to the asset's cultural significance relate to its immediate vicinity which would have been suitable for agriculture. The presence of the proposed turbines would not prevent the visitor from understanding, appreciating and experiencing the asset in relation to its important local setting. No impact predicted.
MDG9668	AUCHENGEITH	MOUND	295880	590670	Non-designated	Unknown	Low (Local)	Within ZTV	No impact on asset significance	The factors of its setting which contribute to the asset's cultural significance relate to its immediate vicinity which would have been suitable for agriculture. The presence of the proposed turbines would not prevent the visitor from understanding, appreciating and experiencing the asset in relation to its important local setting. No impact predicted.
MDG9669	AUCHENGEITH	Cairn. Two cairns, each comprising a shallow irregular hollow measuring between 9 and 10m in diameter, were recorded during the course of a pre-forestation survey by AOC (Scotland) Ltd (NMRS MS 738/22, no.23) near the summit of Auchlengieith Hill at NX 9560 9037 and NX 9570 9042.	295600	590300	Non-designated	Early Neolithic to Late Bronze Age	Medium (Regional)	Within ZTV	Wider landscape contributes to asset significance. Impact possible in principle	The field visit found that the cairns survive as two hollows now much overgrown surrounded by naturally seeded trees. It is difficult to confidently assign a function to the asset as a result. The asset can no longer be experienced as an above ground feature and interpretations as to how it related to its landscape setting are speculative, particularly given it is largely divorced from the wider landscape as a result of the self seeded trees which surround it. The general presence of the proposed turbines would not prevent the visitor for speculating as to how the asset may have related to its wider landscape setting and understanding, appreciating and experiencing how this may contribute to its cultural significance. No impact predicted.

Technical Appendix 11.2 Gazetteer of Heritage Assets

Ref	Name	Description	E	N	Status	Period	Importance	ZTV	Significance	Setting
MDG9670	GLENMAID MOOR	CLEARANCE CAIRN; BUILDING	296892	589784	Non-designated	Medieval to 19th Century	Low (Local)	Within ZTV	No impact on asset significance	Asset is located within an area of commercial forestry and was not accessible at the time of the field visit. It is likely that the cairn has been truncated by commercial forestry operations. The asset is evidence of how the land was cleared of stone to allow for cultivation/ grazing of livestock. The factors of its setting which contribute to its cultural significance relate to its immediate vicinity which would have been suitable for agriculture. The presence of the proposed turbines would not prevent the visitor from understanding, appreciating and experiencing the asset in relation to its important local setting. No impact predicted.
ASA1	Whitestanes Moor	Archaeologically Sensitive Area (ASA)	296818	589136	Non-designated	Prehistoric- post-medieval	High (National)	Within ZTV	Wider landscape contributes to asset significance. Impact possible in principle	Individual assets noted within the ASA have been considered in the 2 km OSA
HER Other 1		'Souter's Grave' (1st OS)	294954	590276	Non-designated	Post-medieval	Low (Local)	Within ZTV	No impact on asset significance	The asset lies within an area of commercial forestry. There is little evidence as to what the asset is. If it is the site of a grave, it is likely it has at least been partially truncated by forestry operations such that its relationship with the wider landscape has been lost. No impact predicted.
HER Other 2		Sheep shelter	296598	590377	Non-designated	Post-medieval	Low (Local)	Within ZTV	No impact on asset significance	The asset has been truncated commercial forestry operations and does not survive as an above ground feature. Its setting relates to immediate locale which would have been suitable for grazing livestock. Visibility of the proposed turbines would not prevent an understanding, appreciation or experience of the asset's local setting which contributes to cultural significance. No impact predicted.

Technical Appendix 11.2 Gazetteer of Heritage Assets

Ref	Name	Description	E	N	Status	Period	Importance	ZTV	Significance	Setting
HA03	Sheepfold	Sheepfold identified on First Edition OS map	296271	590550	Non-designated	Post-medieval	Low (Local)	Within ZTV	No impact on asset significance	The asset is surrounded by commercial forestry. Its setting relates to its immediate locale which would have been suitable for grazing livestock. Visibility of the proposed turbines would not prevent an understanding, appreciation or experience of the asset's local setting which contributes to cultural significance. No impact predicted.
HA04	Cairn	Cairn identified on First Edition OS map	296966	589753	Non-designated	Unknown	Low (Local)	Within ZTV	No impact on asset significance	The asset lies within an area of rough pasture and is of likely post-medieval date given its proximity to other cairns of that date. Its setting relates to its immediate locale which would have been suitable for grazing livestock. Visibility of the proposed turbines would not prevent an understanding, appreciation or experience of the asset's local setting which contributes to cultural significance. No impact predicted.
WITHIN PROPOSED ACCESS TRACK										
HER Other 10	Sheepfold	Sheepfold	302135	593935	Non-designated	Post-medieval	Negligible	Outwith ZTV	No impact on asset significance	The asset is outwith the ZTV and relates to its immediate vicinity only. No impact predicted.
MDG6419	Bran Rig	Findspot - lithic scatter	299215	595840	Non-designated	Prehistoric	Negligible	Outwith ZTV	No impact on asset significance	Asset has been removed from Site.
WITHIN 2 km OSA										
SM638	Poldivan Bridge, cairn 730m ENE of	Prehistoric ritual and funerary: cairn (type uncertain)	296710	595024	SM	Prehistoric	High (National)	Within ZTV	Wider landscape contributes to asset significance. Impact possible in principle	Noted in Scoping Report and HES Scoping Response. A well-preserved cairn measuring 16.0 m in diameter and 1.5 m in height. Cairn situated on a SE-facing spur on the crest of the watershed between the Poldivan Burn and the Capel Water. Proposed turbines may distract from asset's prominence and understand/appreciation/experience of land to the south. Detailed assessment required. Asset assessed in Section 6.4.1 of Volume 2 Chapter 11: Archaeology and Cultural Heritage.

Technical Appendix 11.2 Gazetteer of Heritage Assets

Ref	Name	Description	E	N	Status	Period	Importance	ZTV	Significance	Setting
SM2262	Gawin Moor, cairns and field system, Auchencairn	Prehistoric domestic and defensive: field clearance cairn, cairnfield; Prehistoric ritual and funerary: cairn (type uncertain); Secular: field system	294409	591567	SM	Prehistoric	High (National)	Within ZTV	Wider landscape contributes to asset significance. Impact possible in principle	Noted in Scoping Report. The monument is a composite one, consisting of three separate elements. First, a large prehistoric burial cairn, approximately 15 m in diameter. Second, 80 m to the NNE, a similar cairn. Third, 100 m further to the N, an area of open ground containing, at its SW corner, a third substantial burial cairn and also containing a large number of small cairns and fragments of walling, representing a prehistoric farming landscape. Proposed development may appear along the alignment of the three cairns, which may be significant. Detailed assessment required. Asset assessed in Section 6.4.1 of Volume 2 Chapter 11 Archaeology and Cultural Heritage.
LB3945	GUBHILL FARMHOUSE	Farmhouse	297236	592171	Cat C LB	Post-medieval	Low (Local)	Within ZTV	Wider landscape contributes to asset significance. Impact possible in principle	Earlier 19th century. 2-storey, 3-bay farmhouse. The asset is situated in valley base between Black Sike and Windyhill Burn. The building was constructed to relate to the agricultural land along Black Sike and has no culturally significant relationship with the upland area of the ISA. No impact on asset significance
MDG11911	CAPEL WATER	SHEEP FOLD	296790	595670	Non-designated	Medieval to 19th Century	Low (Local)	Within ZTV	No impact on asset significance	The asset's setting relates to its immediate locale which would have been suitable for agriculture and it is this local setting which contributes to the asset's cultural significance. Visibility of the proposed turbines would not prevent an understanding, appreciation or experience of the asset's local setting which contributes to cultural significance. No impact predicted.

Technical Appendix 11.2 Gazetteer of Heritage Assets

Ref	Name	Description	E	N	Status	Period	Importance	ZTV	Significance	Setting
MDG11912	CAPEL WATER	STACK YARD?; ENCLOSURE	296780	595590	Non-designated	Medieval to 19th Century	Low (Local)	Within ZTV	No impact on asset significance	The asset's setting relates to its immediate locale which would have been suitable for agriculture and it is this local setting which contributes to the asset's cultural significance. Visibility of the proposed turbines would not prevent an understanding, appreciation or experience of the asset's local setting which contributes to cultural significance. No impact predicted.
MDG11913	CAPEL WATER	BURNT MOUND?	296880	595449	Non-designated	Unknown	Medium (Regional)	Within ZTV	No impact on asset significance	Burnt mounds were generally located close to or adjacent to watercourses and in some cases in relation to nearby contemporary settlement on land which may have been suitable for cultivation and/or grazing livestock in the prehistoric period. The contribution made by setting to the asset's cultural significance is largely defined by its local instead of wider landscape setting. The presence of the proposed turbines would not materially change how the asset is understood, appreciated and experienced in relation to its important local setting and which contributes to its cultural significance. No impact is predicted.
MDG11914	NETHER DOD	RIDGE AND FURROW	296883	595481	Non-designated	Medieval to 19th Century	Low (Local)	Within ZTV	No impact on asset significance	The asset's setting relates to its immediate locale which would have been suitable for agriculture and it is this local setting which contributes to the asset's cultural significance. Visibility of the proposed turbines would not prevent an understanding, appreciation or experience of the asset's local setting which contributes to cultural significance. No impact predicted.

Technical Appendix 11.2 Gazetteer of Heritage Assets

Ref	Name	Description	E	N	Status	Period	Importance	ZTV	Significance	Setting
MDG6212	KNOCKBRACK	BANK (EARTHWORK)	293554	596299	Non-designated	Medieval to 19th Century	Low (local)	Within ZTV	No impact on asset significance	The asset's setting relates to its immediate locale which would have been suitable for agriculture and it is this local setting which contributes to the asset's cultural significance. Visibility of the proposed turbines would not prevent an understanding, appreciation or experience of the asset's local setting which contributes to cultural significance. No impact predicted.
MDG6219	WHITESTANES MOOR	ENCLOSURE; CAIRN?	296550	588050	Non-designated	Early Bronze Age to Late Bronze Age	High (National)	Within ZTV	Within ASA. No impact on asset significance	Asset is within ASA. The NRHE record for the assets states there is no evidence that the cairn is funerary in nature and is most likely a field clearance cairn. The asset's setting therefore relates to its immediate locale which would have been suitable for agriculture and nearby heritage assets. It is this local setting which contributes to the asset's cultural significance. Visibility of the proposed turbines would not prevent an understanding, appreciation or experience of the asset's local setting which contributes to cultural significance. No impact predicted.
MDG6225	DUNCOW BURN / SHAWS MOOR	CAIRN; ENCLOSURE; FIELD BOUNDARY?; ENCLOSED CREMATION CEMETERY; BOUNDARY BANK	295700	587100	Non-designated	Early Bronze Age to Late Bronze Age	High (National)	Within ZTV	Wider landscape contributes to asset significance. Impact possible in principle	Asset is within ASA. As per the NRHE record the asset is 'A probable enclosed cremation cemetery and a group of 70 'cairns' extending over 10 hectares along the top of a low N-S moorland ridge at c 650 ft OD. The asset lies on an east facing slope within rough pasture with commercial forestry to the north, east and west. The contribution made by setting to the asset's cultural significance relates to its position on this east facing slope overlooking Duncow Burn to the east. The cairn was most likely located in relation to nearby possibly contemporary settlement (as evidenced by other prehistoric cairns within the ASA) who may have used this area to bury the dead. The asset is not prominently positioned and the proposed turbines (located over 2 km to the north) would not distract from its relationship with local agricultural land or nearby

Technical Appendix 11.2 Gazetteer of Heritage Assets

Ref	Name	Description	E	N	Status	Period	Importance	ZTV	Significance	Setting
										contemporary settlement. No impact is predicted.
MDG6230	GLENMAID MOOR	BUILDING; CLEARANCE CAIRN	297100	589200	Non-designated	Early Bronze Age to 19th Century	Medium (Regional)	Within ZTV	No impact on asset significance	Within ASA. The asset's setting relates to its immediate locale which would have been suitable for agriculture and it is this local setting which contributes to the asset's cultural significance. Visibility of the proposed turbines would not prevent an understanding, appreciation or experience of the asset's local setting which contributes to cultural significance. No impact predicted.
MDG6231	WHITESTANES MOOR	ENCLOSURE; CAIRN; ENCLOSED CREMATION CEMETERY	296700	588200	Non-designated	Early Bronze Age to Late Bronze Age	High (National)	Within ZTV	Wider landscape contributes to asset significance. Impact possible in principle	The asset has been partially excavated and some of the extant cairns do not survive as prominent features. The asset is located on a south-west facing slope, close to the peak of Cocklet Hill overlooking land which would have been suitable for grazing in the prehistoric period. The cairns were most likely located in relation to nearby possibly contemporary settlement (as evidenced by other prehistoric cairns within the ASA) who may have used this area to bury the dead. The features which comprise the asset are not appreciable over long distances and the proposed turbines would therefore not challenge any perceived prominence they may have had. The proposed turbines (located over 2 km to the north) would not distract from the asset's relationship with local agricultural land or nearby contemporary settlement. No impact is predicted.

Technical Appendix 11.2 Gazetteer of Heritage Assets

Ref	Name	Description	E	N	Status	Period	Importance	ZTV	Significance	Setting
MDG6233	WATCHMAN HILL	CAIRN	296400	587600	Non-designated	Early Bronze Age to Late Bronze Age	High (National)	Within ZTV	Wider landscape contributes to asset significance. Impact possible in principle	As per the NRHE 'There are a number of heather-covered cairns on the shoulder of Watchman Hill, N of the wood and along the E and S slopes. Scott-Elliott notes a total of twenty-six cairns, 9-18 ft across, and two ring cairns, 16 and 18 ft in diameter. He adds that among the cairns are four sites which may be scooped dwellings. A group of about 40 low heather-covered 'cairns' occupy an area of 8.0 hectares on the gently sloping summit of Watchman Hill. The largest of these is 5.0 m in diameter and 0.8 m high. Some of the cairns have been robbed apparently for nearby dyke building; this may well explain the 'ring cairns' noted by Scott-Elliott. There are many vague depressions on this heather-covered hillside; none can be identified as occupation sites but a number are evidently quarry scoops. There is no evidence of cultivation in the area nor any trace of kerbing in the cairns, which are similar though not so clearly defined as those at Whitestanes. The features are recorded as being present on a south facing slope at the peak of Watchman. The field visit found little evidence of the assets as described in the NRHE entry. It is possible the plantation of trees on the peak of Watchman may have truncated at least some of the features described. The cairns were most likely located in relation to nearby possibly contemporary settlement (as evidenced by other prehistoric cairns within the ASA) who may have used this area to bury the dead. The features which comprise the asset are not appreciable over long distances and the proposed turbines would therefore not challenge any perceived prominence they may have had. The proposed turbines (located over 2 km to the north) would not distract from the asset's relationship with local agricultural land or nearby contemporary settlement. No impact is predicted.

Technical Appendix 11.2 Gazetteer of Heritage Assets

Ref	Name	Description	E	N	Status	Period	Importance	ZTV	Significance	Setting
MDG6264	SHAWS	FINDSPOT	294811	587776	Non-designated	Medieval to 19th Century	Negligible	Within ZTV	No impact on asset significance	Asset has been removed from site and no longer has a landscape setting.
MDG6418	NETHER DOD	CAIRN	297729	595219	Non-designated	Early Bronze Age to Late Bronze Age	High (National)	Within ZTV	Wider landscape contributes to asset significance. Impact possible in principle	The remains of the two cairns. The northern one consists of a circular mound of stones 13.0 m in diameter and 1.0 m in height. The second cairn, situated 140 m south of the above, is a mound of stones almost completely turf-covered and measures 10.3 m in diameter by 0.5 m in height. A small shepherd's cairn 1.4 m high by 1.6 m in diameter stands upon the southern half of the cairn. The asset is located at the peak of a hill to the north of Big Knowe. The southern cairn is located within commercial forestry and the northern one within rough pasture with commercial forestry immediately to the north and east. The contribution that setting makes to cultural significance pertains to its prominent location on the top of a hill looking towards Capel Water. The cairn likely overlooked contemporary settlement within the Capel Water valley. The proposed turbines would be located beyond the Capel Water valley and would not interfere with the relationship between the asset and this area which contributes to its cultural significance. The asset does not survive as a prominent landscape feature and the proposed turbines would not challenge any perceived prominence it may once have had. No impact is predicted.
MDG6420	GLASS RIG, MITCHELLSLACKS	FINDSPOT	295572	595973	Non-designated	Roman	Negligible	Within ZTV	No impact on asset significance	Asset has been removed from site and no longer has a landscape setting.
MDG6454	GUBHILL RIG	CAIRN	296410	593290	Non-designated	Early Neolithic to Late Bronze Age	Low (Local)	Within ZTV	Wider landscape contributes to asset significance. Impact possible in principle	As per the NRHE entry, this cairn has been completely destroyed by afforestation. Its site, on a low natural rise, is marked by a scatter of stones approximately 2.5 m in diameter. Its location on a south facing slope looking towards Windyhill Burn suggests it was sited in order to overlook this area which was likely suitable for settlement in the prehistoric period. The asset can no longer be experienced;

Technical Appendix 11.2 Gazetteer of Heritage Assets

Ref	Name	Description	E	N	Status	Period	Importance	ZTV	Significance	Setting
										however, the proposed turbines would not prevent an understanding of the asset in relation to lower lying land to the south. No impact on asset significance
MDG6455	NETHER DOD	CAIRN	297770	594700	Non-designated	Early Neolithic to Late Bronze Age	Low (Local)	Within ZTV	Wider landscape contributes to asset significance. Impact possible in principle	At the south-east end of Nether Dod, on the lower end of the haunch of the hill overlooking the Capel Water, is a small group of cairns measuring some 12 feet in diameter and very low in elevation. The cairns are located within commercial forestry and have likely been at least partially truncated. The asset is located on a south-west facing slope overlooking the Capel Water. It is likely it was sited in order to overlook this area which was likely suitable for settlement in the prehistoric period. The asset can no longer be experienced, however, the proposed turbines would not prevent an understanding of the asset in relation to lower lying land to along the Capel Water valley. No impact on asset significance
MDG6459	AE VALLEY OUTDOOR CENTRE	HOUSE	297207	591576	Non-designated	Modern	Negligible	Within ZTV	No impact on asset significance	Asset does not have a culturally significance setting which contributes to significance. No impact.
MDG6462	MID CAIRN	CAIRN	294020	590580	Non-designated	Early Bronze Age to Late Bronze Age	High (National)	Within ZTV	Wider landscape contributes to asset significance. Impact possible in principle	A well-preserved cairn situated on a natural eminence in afforestation. It is 18.5 m in diameter, 2.0 m high, and surmounted by a modern marker cairn. A small rectangular sheep shelter has been built into its southern extremity. The asset is surrounded on all sides by commercial forestry. The contribution made by setting to cultural significance relates to the asset's location on a locally prominent location within land likely suitable for settlement in the prehistoric period. The cairn is located close to other more prominent cairns such as MDG6463 c.400 m to the north-east and MDG6501 c. 490 m to the east. There is no longer any intervisibility between these assets due to coverage from commercial forestry, however, it is likely MDG6462 was positioned to be intervisible with these

Technical Appendix 11.2 Gazetteer of Heritage Assets

Ref	Name	Description	E	N	Status	Period	Importance	ZTV	Significance	Setting
										other cairns. The cairn functions within this more local, instead of wider landscape such that the presence of the proposed turbines c.1.5 km to the east would not interfere with or distract from the important local setting . No impact is therefore predicted.
MDG6463	WHITE HILL	CAIRN	294460	590780	Non-designated	Early Bronze Age to Late Bronze Age	Medium (Regional)	Within ZTV	Wider landscape contributes to asset significance. Impact possible in principle	The remains of a cairn surviving as a turf-covered stony mound 16.0 m diameter and 0.6 m high are situated in a clearing in afforestation. Its north quadrant has been robbed almost to ground level likely as a result of forestry operations. The asset was likely was likely positioned in order to be locally prominent and overlook an area of likely contemporary settlement defined by Kingstand Burn. It is also likely that it related to other cairns in the local area such as MDG6462 located c. 400 m to the west. The cairn can no longer be experienced as a prominent asset due to the level of truncation from forestry. As such the proposed turbines would not challenge any perceived dominance it may have had over the landscape. The cairn is understood and appreciated in relation to its more local landscape setting in relation to likely nearby contemporary settlement and monuments. The presence of the proposed turbines over 1 km to the east would not materially change how the asset is understood, appreciated and experienced in relation to its importance local setting. No impact is therefore predicted.
MDG6502	GARROCH RACE / Garroch Burn/The Lake	LEAT	292834	594962	Non-designated	Prehistoric - post-medieval	Medium (Regional)	Within ZTV	No impact on asset significance	The asset does not have a wider landscape setting beyond its own course which contributes to its cultural significance. No impact predicted.
MDG6506	WHITESIDE LINN / Tudhope Linn	BOUNDARY BANK	293258	592156	Non-designated	Post Medieval to 18th Century	Low (Local)	Within ZTV	No impact on asset significance	The asset does not have a wider landscape setting beyond its own alignment which contributes to its cultural significance. No impact predicted.

MDG6509	AUCHENCAIRN FOREST	CAIRN	293417	591118	Non-designated	Early Neolithic to Late Bronze Age	High (National)	Within ZTV	Wider landscape contributes to asset significance. Impact possible in principle	The remains of a cairn on the crest of a slight scarp are visible as a stony mound 5.0 m in diameter and 0.5 m high. It has been ploughed through and planted with trees. The asset can no longer be readily experienced due the presence of commercial forestry, however, it is likely it was located in order to be visible from nearby contemporary settlement defined by Kingstand Burn and be intervisible with other nearby cairns such as MDG6509 c.130 m to the north-west. It is within this local setting that the cairn functions; visibility of the proposed turbines 2 km to the east would not materially detract from the ability of the visitor to understand and appreciate the local landscape setting which contributes to the cairn's cultural significance.
MDG6511	AUCHENCAIRN HEIGHT	CAIRN	293493	590542	Non-designated	Early Neolithic to Late Bronze Age	Medium (Regional)	Within ZTV	Wider landscape contributes to asset significance. Impact possible in principle	The remains of a cairn situated on a natural eminence in afforestation. It survives as a turf-covered stony mound 9.0 m E-W by 7.5 m and 0.5 m high with its edges disfigured by forestry ploughing. The asset was likely was likely positioned in order to be locally prominent and overlook an area of likely contemporary settlement defined by Kingstand Burn. It is also likely that it related to other cairns in the local area such as MDG6462 located c. 500 m to the east. The cairn can no longer be experienced as a prominent asset due to the level of truncation from forestry. As such the proposed turbines would not challenge any perceived dominance it may have had over the landscape. The cairn is understood and appreciated in relation to its more local landscape setting in relation to likely nearby contemporary settlement and monuments. The presence of the proposed turbines c.2km to the east would not materially change how the asset is understood, appreciated and experienced in relation to its importance local setting. No impact is therefore predicted.

Technical Appendix 11.2 Gazetteer of Heritage Assets

Ref	Name	Description	E	N	Status	Period	Importance	ZTV	Significance	Setting
MDG9545	SHAW'S MOOR	BANK (EARTHWORK); CAIRN; ENCLOSURE?	295800	587400	Non-designated	Unknown	Medium (Regional)	Within ZTV	Wider landscape contributes to asset significance. Impact possible in principle	<p>This site consists of three separate lengths of low, linear spreads of boulders up to 0.3 m high and 3.5 m wide, forming a possible enclosure. The W side is formed by a sinuous bank 24 m long. The N end is an L-shaped bank which runs 18 m W-E and then 20 m N-S. The latter stretch is followed by a gap of 13 m and a length of bank 12 m long. The S end of the enclosure is open. It seems unlikely that these remains represent an enclosure at all, but are, rather, simply a series of defined banks, the important area being that in the centre from which stones were cleared.</p> <p>There are five cairns situated around the N, E and W sides of the banks of the cleared area. these vary in size from 3-6 m in diameter and 0.2-0.6 m high. There is also a linear spread of boulders 30 m long and 10 m wide to the NW. This is similar to the banks noted above but is far more dispersed. There is no evidence that the cairns noted in the NRHE description are funerary in nature and are more likely to relate to field clearance activities. As such the contribution that setting makes to their cultural significance pertains to their relationship with the local land which would have been used for agriculture. The presence of the proposed turbines would not prevent an understanding, appreciation or experience of the asset in relation to its important local setting. No impact predicted.</p>
MDG9546	DALSWINTON COMMON / Shaw's Moor/Duncow Burn	MOUND; CLEARANCE CAIRN?	295420	588735	Non-designated	Unknown	Low (Local)	Within ZTV	No impact on asset significance	The asset does not have a wider landscape setting beyond its immediate vicinity which contributes to its cultural significance. No impact predicted.
MDG9666	GLENMAID MOOR	BUILDING	297409	589504	Non-designated	Medieval to Modern	Low (Local)	Within ZTV	No impact on asset significance	The asset does not have a wider landscape setting beyond its immediate vicinity which contributes to its cultural significance. No impact predicted.

HER Other 6		Field system, rig	297301	588985	Non-designated	Unknown	Low (Local)	Within ZTV	No impact on asset significance	Within ASA. Asset relates to its immediate locale which was suitable for agriculture and settlement in the past. It does not have a wider landscape setting beyond this which contributes to its cultural significance. No impact predicted.
HER Other 7		Cairns	297030	588224	Non-designated	Unknown	Low (Local)	Within ZTV	Wider landscape contributes to asset significance. Impact possible in principle	Within ASA. Assets lie in rough pasture and survive as low mounds. It is likely that the asset related to its local landscape setting in relation to nearby contemporary settlement instead of to the area of the proposed turbines. No impact is therefore predicted.
HER Other 8		Enclosure	296816	587925	Non-designated	Unknown	Low (Local)	Within ZTV	No impact on asset significance	Within ASA. Asset relates to its immediate locale which was suitable for agriculture and settlement in the past. It does not have a wider landscape setting beyond this which contributes to its cultural significance. No impact predicted.
HER Other 9		Cairn	297025	587203	Non-designated	Unknown	Low (Local)	Within ZTV	Wider landscape contributes to asset significance. Impact possible in principle	Within ASA. Asset does not survive as a prominent feature and its nature and function are uncertain. It is likely that the asset related to its local landscape setting in relation to nearby contemporary settlement instead of to the area of the proposed turbines. No impact is therefore predicted.
WITHIN 5 km OSA										
GDL00131	Dalswinton	Garden and Designed Landscape	294525	584345	GDL	Post-medieval	High (National)	(Partial)	Wider landscape contributes to asset significance. Impact possible in principle	Noted in HES Scoping Response. The River Nith forms the southern boundary of the site which is bounded to the north by a minor road leading to the A76(T). The house is set on a mound above the river floodplain from which the land rises to the north to Dalswinton Common. There are extensive views from the house along Nithsdale. Views into the site from the north are limited by the roadside shelter plantings, but views of Dalswinton can be obtained from south of the river. The present mansion house is set on the site of the former Comyns Castle on relatively high ground in a defensive position above the valley. Neither the castle, the present

Technical Appendix 11.2 Gazetteer of Heritage Assets

Ref	Name	Description	E	N	Status	Period	Importance	ZTV	Significance	Setting
										mansion, nor the designed landscape were positioned with intentional views to the ISA. ZTV indicates partial visibility and at a distance of 5 km any view of turbines is unlikely in reality. No impact upon assets' cultural significance.
SM10540	Auchencairn, cairn 500m NNE of	Prehistoric ritual and funerary: cairn (type uncertain)	292408	591167	SM	Prehistoric	High (National)	Within ZTV	Wider landscape contributes to asset significance. Impact possible in principle	Noted in Scoping Report. Large prehistoric cairn, increased in size by addition of later clearance material. 3 m height. The cairn lies at around 195 m OD on a plateau on the W slope of Watchman Hill. The asset is bound by forestry plantation to the east and west which limits views towards and from the asset. The topography indicates that the asset's relationship is with the valleys of Bothole Burn or Back Burn, with views westwards towards River Nith potentially once significant prior to the plantation of forestry. It is possible these views were towards an area of contemporary settlement. There are non- designated cairns located to the south of the asset which may be funerary in nature and thus form part of a wider landscape of such monuments. The asset is not a prominently positioned feature and is understood, appreciated and experienced in relation to nearby land which was likely suitable for settlement in the prehistoric period, in relation to nearby watercourses and possibly associated cairns to the south. The proposed turbines would not detract from an understanding, appreciation or experience of the cairn in relation to this local setting which contributes to the asset's cultural significance. No impact predicted.

Ref	Name	Description	E	N	Status	Period	Importance	ZTV	Significance	Setting
SM2560	Bankhead,Roman fort,Dalswinton	Roman: fort	293313	584910	SM	Roman	High (National)	Within ZTV	Wider landscape contributes to asset significance. Impact possible in principle	The fort is located on the eastern bank of the River Nith adjacent to other Roman forts and camps on the river's west side. The fort was likely positioned to control movement along the river and the river valley as well as control local agricultural land. Views of the hills c.5 km to the north-east comprising the ISA do not contribute to the asset's cultural significance. It would remain possible to understand, appreciate and experience the local setting which contributes to the asset's cultural significance. No impact predicted.
SM5919	Shaw's Moor,cairnfield and ring-cairn S of Hospital Wood	Prehistoric domestic and defensive: field clearance cairn, cairnfield; Prehistoric ritual and funerary: cairn (type uncertain)	295521	586922	SM	Prehistoric	High (National)	Within ZTV	Wider landscape contributes to asset significance. Impact possible in principle	Noted in Scoping Report. Within ASA. Significant archaeological remains, likely well preserved prehistoric graves/burial ground comprising multiple burials. The asset is located immediately west of Duncow Burn on relatively flat land which would have been suitable for agriculture in the prehistoric period. The contribution made by setting to the asset's cultural significance relates to its location on land which would have been suitable for settlement and its proximity to Duncow Burn. The interrelationships between the cairns and other nearby cairns (SM5920) within this setting is also an important contributing factor to the asset's cultural significance. There is no evidence that views towards the upland area of the ISA were a factor in choosing this location for interment. Instead it is the asset's location within the Duncow Burn valley and its relationship to contemporary settlement which were important factors in the positioning of the asset. Views of the proposed turbines (located over 2 km to the north) would not detract from an understanding, appreciation or experience of the asset in relation to its important local setting. No impact on asset significance predicted, however, asset has been scoped in to the EIA Report at the request of HES.

Technical Appendix 11.2 Gazetteer of Heritage Assets

Ref	Name	Description	E	N	Status	Period	Importance	ZTV	Significance	Setting
SM5920	Shaw's Moor, cairnfield and ring-cairns SE of Hospital Wood	Prehistoric domestic and defensive: field clearance cairn, cairnfield; Prehistoric ritual and funerary: cairn (type uncertain)	295641	587137	SM	Prehistoric	High (National)	Within ZTV	Wider landscape contributes to asset significance. Impact possible in principle	Noted in Scoping Report. Within ASA. Significant archaeological remains, likely well preserved prehistoric graves/burial ground comprising multiple burials. The asset is located immediately west of Duncow Burn on relatively flat land which would have been suitable for agriculture in the prehistoric period. The contribution made by setting to the asset's cultural significance relates to its location on land which would have been suitable for settlement and its proximity to Duncow Burn. The interrelationships between the cairns and other nearby cairns (SM5920) within this setting is also an important contributing factor to the asset's cultural significance. There is no evidence that views towards the upland area of the ISA were a factor in choosing this location for interment. Instead it is the asset's location within the Duncow Burn valley and its relationship to contemporary settlement which were important factors in the positioning of the asset. Views of the proposed turbines (located over 2 km to the north) would not detract from an understanding, appreciation or experience of the asset in relation to its important local setting. No impact on asset significance predicted, however, asset has been scoped in to the EIA Report at the request of HES.
SM644	The Belt, fort, High Townhead	Prehistoric domestic and defensive: fort (includes hill and promontory fort)	293233	585823	SM	Prehistoric	High (National)	Within ZTV	Wider landscape contributes to asset significance. Impact possible in principle	Noted in Scoping Report. The asset is located on south-west facing slope and is covered in trees. The asset was likely positioned to overlook Brandy Burn and the River Nith the south and control local agricultural land. It is these factors of the asset's setting which contribute to its cultural significance. The presence of the proposed turbines over 4 km to the north-east would not challenge the asset within its important local setting. No impact on asset significance predicted.

Technical Appendix 11.2 Gazetteer of Heritage Assets

Ref	Name	Description	E	N	Status	Period	Importance	ZTV	Significance	Setting
SM657	Mullach,fort	Prehistoric domestic and defensive: fort (includes hill and promontory fort)	292906	586979	SM	Prehistoric	High (National)	Within ZTV	Wider landscape contributes to asset significance. Impact possible in principle	Noted in Scoping Report. The monument consists of the remains of an Iron Age hillfort, situated on the summit of Mullach. The fort encloses an area some 110 m E-W by 120 m and is defended by concentric stone-built walls about 25-28 m apart. The inner wall is slight, and only visible on the S part of the circuit, as a grassed- over bank some 0.3 m high. The outer wall survives as a grassy bank up to 2 m wide and 0.5 m high. The hill is recorded as a beacon-stance in 1448, but whether this was on the grounds of contemporary use or the discovery of burnt stones at that time is not known. The fort appears to have been positioned with clear vantage views over the River Nith valley to the south, to monitor or control passage along this corridor, and to exert influence in reciprocal views from it. The fort was also likely positioned to overlook Pennyland Burn to the north-east and to control areas of lower lying agricultural land. It is possible that intervisibility with the possibly contemporary SM644, located c1 km to the south was also a factor in the siting of the monument. The interrelationships between the asset, the River Nith valley, the Pennyland Burn and nearby contemporary settlement would remain fully discernible were the proposed development to be constructed. The proposed turbines located c.3.5 km to the north-east lie outwith the area which the fort functions within and would not challenge its dominance over its local area. No impact is therefore predicted.

MDG25606	Closeburn Castle		290574	592269	NIDL	Post-medieval	Medium (Regional)	(Partial)	Wider landscape contributes to asset significance. Impact possible in principle	Noted in Scoping Report. 4.5km to W. Closeburn Castle itself (Cat B LB4004) lies outwith ZTV. The castle is not visible from many parts of the NIDL, which today comprises ploughed fields with no designed elements preserved. The parts of the NIDL from which the castle is visible lie outwith the ZTV. No impact on asset significance
MDG6448	TOWNFOOT	SETTLEMENT	291950	597100	Non-designated	Iron Age	High (National)	Within ZTV	No impact on asset significance	The contribution made by setting to the asset's cultural significance comprises its relationship to nearby land suitable for agriculture and to likely nearby contemporary settlement. The area of proposed turbines makes no contribution to the asset's cultural significance, and it would remain possible to understand, appreciate and experience the asset in relation to its important local setting. No impact predicted.
MDG6457	GLENAE TOWER	TOWER	298457	590528	Non-designated	Medieval to 19th Century	High (National)	Within ZTV	No impact on asset significance	Asset was positioned to control local routeways and local agricultural land. Its local prominence would not be challenged by the proposed turbines.
MDG6496	PARK, CLOSEBURN / Garroch/Whistlebare	LIME KILN; WATER WHEEL; DAM; LIME WORKS	290778	591170	Non-designated	18th Century to 19th Century	High (National)	Within ZTV	No impact on asset significance	The asset has no landscape setting outwith its immediate vicinity which contributes to its cultural significance. No impact predicted.
MDG6510	ROYACH CAIRN	CAIRN	293312	590521	Non-designated	Early Neolithic to Late Bronze Age	High (National)	Within ZTV	Wider landscape contributes to asset significance. Impact possible in principle	The turf-covered scant remains of a cairn lie on the crest of a slight scarp in afforestation. It comprises a well-defined stony rim 10.5m diameter, 0.6m high in the south-west and elsewhere up to 0.2m high. The north side has been disfigured by forestry ploughing and much stone has been exposed. The asset was likely was likely positioned in order to be locally prominent and overlook an area of likely contemporary settlement defined by Kingstand Burn and Black Burn. It is also likely that it related to other cairns in the local area such as MDG6501 located c. 180 m to the west. The cairn can no longer be experienced as a prominent asset due to

Technical Appendix 11.2 Gazetteer of Heritage Assets

Ref	Name	Description	E	N	Status	Period	Importance	ZTV	Significance	Setting
										the level of truncation from forestry. As such the proposed turbines would not challenge any perceived dominance it may have had over the landscape. The cairn is understood and appreciated in relation to its more local landscape setting in relation to likely nearby contemporary settlement and monuments. The presence of the proposed turbines over 2km to the east would not materially change how the asset is understood, appreciated and experienced in relation to its importance local setting. No impact is therefore predicted. Not a prominent cairn. No impact on asset significance
MDG12861	HIGH TOWNHEAD	BURNT MOUND	292784	586690	Non-designated	Early Bronze Age to Late Bronze Age	Medium (Regional)	Outwith ZTV	No impact on asset significance	The asset is outwith the ZTV. No culturally significant views towards the asset within the ZTV have been identified. No impact on asset's cultural significance is predicted.
MDG12862	ANNFIELD MOOR	BURNT MOUND?; HUT CIRCLE	298952	586313	Non-designated	Early Bronze Age to Late Bronze Age	Medium (Regional)	Within ZTV	No impact on asset significance	Burnt mounds were generally located close to or adjacent to watercourses and in some cases in relation to nearby contemporary settlement on land which may have been suitable for cultivation and/or grazing livestock in the prehistoric period. The contribution made by setting to the asset's cultural significance is largely defined by its local instead of wider landscape setting. The presence of the proposed turbines would not materially change how the asset is understood, appreciated and experienced in relation to its important local setting, and which contributes to its cultural significance. No impact is predicted.
MDG12863	ANNFIELD MOOR	BURNT MOUND	298811	586091	Non-designated	Early Bronze Age to Late Bronze Age	Medium (Regional)	Within ZTV	No impact on asset significance	Burnt mounds were generally located close to or adjacent to watercourses and in some cases in relation to nearby contemporary settlement on land which may have been suitable for cultivation and/or grazing livestock in the prehistoric period. The contribution made by setting to the asset's cultural significance is largely defined by its local instead of wider landscape setting. The presence of the

Technical Appendix 11.2 Gazetteer of Heritage Assets

Ref	Name	Description	E	N	Status	Period	Importance	ZTV	Significance	Setting
										proposed turbines would not materially change how the asset is understood, appreciated and experienced in relation to its important local setting, and which contributes to its cultural significance. No impact is predicted.
MDG12873	HOLEHOUSE	ENCLOSURE	299410	594445	Non-designated	Medieval to 19th Century	Medium (Regional)	Within ZTV	No impact on asset significance	The contribution made by setting to the asset's cultural significance comprises its relationship to nearby land suitable for agriculture and to likely nearby contemporary settlement. The area of proposed turbines makes no contribution to the asset's cultural significance, and it would remain possible to understand, appreciate and experience the asset in relation to its important local setting. No impact predicted.
MDG21015	GLENGARRICK COTTAGE	HOUSE	296708	585123	Non-designated	Post Medieval to 19th Century	Medium (Regional)	Within ZTV	No impact on asset significance	The asset has no landscape setting outwith its immediate vicinity which contributes to its cultural significance. No impact predicted.
MDG21318	AUCHENCAIRN COTTAGE	BUILDING PLATFORM; BUILDING	292228	590480	Non-designated	Medieval to 19th Century	Medium (Regional)	Within ZTV	No impact on asset significance	The asset has no landscape setting outwith its immediate vicinity which contributes to its cultural significance. No impact predicted.
MDG21522	IRVINE'S PILLAR	STANDING STONE	297742	596837	Non-designated	Neolithic	Medium (Regional)	Within ZTV	Wider landscape contributes to asset significance. Impact possible in principle	Asset is located to overlook Brab Burn valley and likely related to this area of probably contemporary settlement. It shares no relationship with the ISA and its local prominence would remain unaffected over a distance of c. 3 km. No impact on asset significance
MDG22056	CLOSEBURNMILL	CORN MILL; LEAT	290227	594483	Non-designated	18th Century to 19th Century	Medium (Regional)	Outwith ZTV	No impact on asset significance	The asset is outwith the ZTV. No culturally significant views towards the asset within the ZTV have been identified. No impact on asset's cultural significance is predicted.
MDG22135	NEWLANDS HOUSE	PLANTATION BANK; SETTLEMENT	296340	584840	Non-designated	Late Prehistoric to Modern	Medium (Regional)	Within ZTV	No impact on asset significance	The asset has no landscape setting outwith its immediate vicinity which contributes to its cultural significance. No impact predicted.

MDG24075	MOCH HILL	BUILDING; FIRING RANGE	293070	596780	Non-designated	Post Medieval to 20th Century	Medium (Regional)	Within ZTV	No impact on asset significance	The asset has no landscape setting outwith its immediate vicinity which contributes to its cultural significance. No impact predicted.
MDG24792	OLD CLOSEBURN HALL	COUNTRY HOUSE	290640	593030	Non-designated	Post Medieval to 18th Century	Medium (Regional)	Within ZTV	Wider landscape contributes to asset significance. Impact possible in principle	Remains of. No designed views. No impact on archaeological significance
MDG25403	DALSWINTON MILL	CAIRN	294900	585000	Non-designated	Bronze Age	Medium (Regional)	Within ZTV	Wider landscape contributes to asset significance. Impact possible in principle	The asset does not survive as a prominent feature and may have been truncated by ploughing. It was likely positioned to relate to nearby contemporary settlement and shares not relationship with the ISA. No impact predicted.
MDG5122	KNOCKBRACK	BURNT MOUND	293300	596500	Non-designated	Early Bronze Age to Late Bronze Age	Medium (Regional)	Within ZTV	No impact on asset significance	Burnt mounds were generally located close to or adjacent to watercourses and in some cases in relation to nearby contemporary settlement on land which may have been suitable for cultivation and/or grazing livestock in the prehistoric period. The contribution made by setting to the asset's cultural significance is largely defined by its local instead of wider landscape setting. The presence of the proposed turbines would not materially change how the asset is understood, appreciated and experienced in relation to its important local setting and which contributes to its cultural significance. No impact is predicted.
MDG5123	KNOCKBRACK	SETTLEMENT	293376	596432	Non-designated	Medieval to 19th Century	Medium (Regional)	Within ZTV	No impact on asset significance	The contribution made by setting to the asset's cultural significance comprises its relationship to nearby land suitable for agriculture and to likely nearby contemporary settlement. The area of proposed turbines makes no contribution to the asset's cultural significance, and it would remain possible to understand, appreciate and experience the asset in relation to its important local setting. No impact predicted.

Technical Appendix 11.2 Gazetteer of Heritage Assets

Ref	Name	Description	E	N	Status	Period	Importance	ZTV	Significance	Setting
MDG5127	SHAW'S MOOR	CAIRN	295970	587400	Non-designated	Early Bronze Age to Late Bronze Age	Medium (Regional)	Within ZTV	Wider landscape contributes to asset significance. Impact possible in principle	Within ASA. Asset lies within commercial forestry and is difficult to discern. Its landscape setting relates to nearby similar monuments and contemporary settlement instead of the area of the proposed turbines. No impact on asset significance
MDG6213	GLEDENHOLM MOOR	CAIRNFIELD?	297600	587800	Non-designated	Early Bronze Age to Late Bronze Age	High (National)	Within ZTV	No impact on asset significance	The asset relates primarily to its local instead of wider landscape setting and shares no important visual relationship with the area of proposed turbines. No impact is therefore predicted.
MDG6217	THE CAIRN	MOUND	296576	586509	Non-designated	Early Bronze Age to Modern	Medium (Regional)	Within ZTV	No impact on asset significance	The asset has no landscape setting outwith its immediate vicinity which contributes to its cultural significance. No impact predicted.
MDG6220	DUNCOW COMMON	CAIRN?; FINDSPOT	296255	586746	Non-designated	Early Neolithic to Late Bronze Age	Medium (Regional)	Within ZTV	Within ASA. No impact on asset significance	The asset relates primarily to its local instead of wider landscape setting and shares no important visual relationship with the area of proposed turbines. No impact is therefore predicted.
MDG6221	DALSWINTON WOOD	CAIRN?; ENCLOSED CREMATION CEMETERY	295520	586960	Non-designated	Early Bronze Age to Late Bronze Age	High (National)	Within ZTV	Wider landscape contributes to asset significance. Impact possible in principle	Asset is within ASA. As per the NRHE record 'The asset comprises a group of about 50 small "cairns" and a probable enclosed cremation cemetery occupy three hectares of a low ridge at a height of 600 feet OD.' The asset lies on a south facing slope within rough pasture with commercial forestry to the north, east and west. The contribution made by setting to the asset's cultural significance relates to its position on a south facing slope in close proximity to Duncow Burn to the east. The cairn was most likely located in relation to nearby possibly contemporary settlement (as evidenced by other prehistoric cairns within the ASA) who may have used this area to bury the dead. The asset is not prominently positioned and the proposed turbines (located over 2 km to the north) would distract from its relationship with local agricultural land or nearby contemporary settlement. No impact is predicted.

WITHIN 10 km OSA										
GDL00143	Drumlanrig Castle	https://portal.historicenvironment.scot/designation/GDL00143	285483	600238	GDL	Post-medieval	High (National)	Within ZTV	Wider landscape contributes to asset significance. Impact possible in principle	Noted in HES Scoping Response. ZTV indicates visibility of proposed development from courtyard to immediate north of the Cat A listed castle. Proposed turbines may appear in views from certain locations within the GDL and could distract from certain designed elements of it. Listed Buildings within the GDL will be covered in the assessment: LB3886, LB17297, LB17279, LB17295, LB17296, LB17298, LB3854, LB3855, LB3860, LB3864, LB3891, LB3892, LB3893, LB3894, LB17262, LB3852, LB3853, LB3890. Detailed assessment required. Asset assessed in Section 6.4.2 of Volume 2 Chapter 11 Archaeology and Cultural Heritage.
GDL00322	Raehills	https://portal.historicenvironment.scot/designation/GDL00322	306853	593940	GDL	Post-medieval	High (National)	Outwith ZTV	No impact on asset significance	Noted in HES Scoping Response. The asset is outwith the ZTV. No culturally significant views towards the asset within the ZTV have been identified. No impact on asset's cultural significance is predicted.
GDL00109	Cowhill Tower	https://portal.historicenvironment.scot/designation/GDL00109	295102	582621	GDL	Post-medieval	High (National)	Within ZTV	Wider landscape contributes to asset significance. Impact possible in principle	Noted in HES Scoping Response. The GDL is largely characterised by policy woodland. There is one area of parkland along the River Nith from where outward views are screened by trees. Wider landscape views in the direction of the ISA do not contribute to significance.
SM10497	Rectilinear enclosure, 1070m SSW of Barntimpen	Prehistoric domestic and defensive: enclosure (domestic or defensive); Secular: enclosure	304755	595199	SM	Prehistoric	High (National)	Outwith ZTV	No impact on asset significance	The asset is outwith the ZTV. No culturally significant views towards the asset within the ZTV have been identified. No impact on asset's cultural significance is predicted.
SM10533	Tanner's Linn, earthwork	Secular: earthwork	305686	592560	SM	Medieval	High (National)	Outwith ZTV	No impact on asset significance	The asset is outwith the ZTV. No culturally significant views towards the asset within the ZTV have been identified. No impact on asset's cultural significance is predicted.
SM12615	Kinnelhead Cottage, building 285m SSW of	Secular: house	302990	601291	SM	Medieval	High (National)	Outwith ZTV	No impact on asset significance	The asset is outwith the ZTV. No culturally significant views towards the asset within the ZTV have been identified. No impact on asset's cultural significance is predicted.

Technical Appendix 11.2 Gazetteer of Heritage Assets

Ref	Name	Description	E	N	Status	Period	Importance	ZTV	Significance	Setting
SM12622	Lochanhead, cairn 530m WNW of	Prehistoric ritual and funerary: cairn (type uncertain)	301649	600572	SM	Prehistoric	High (National)	Outwith ZTV	No impact on asset significance	The asset is outwith the ZTV. No culturally significant views towards the asset within the ZTV have been identified. No impact on asset's cultural significance is predicted.
SM12655	Kinnelhead Cottage, cairn 540m S of	Prehistoric ritual and funerary: cairn (type uncertain)	303139	600994	SM	Prehistoric	High (National)	Outwith ZTV	No impact on asset significance	The asset is outwith the ZTV. No culturally significant views towards the asset within the ZTV have been identified. No impact on asset's cultural significance is predicted.
SM13710	Home Plantation, square barrow cemetery 350m SSW of Nithbank	Prehistoric ritual and funerary: barrow	287013	595939	SM	Prehistoric	High (National)	Within ZTV	Wider landscape contributes to asset significance. Impact possible in principle	Asset is located immediately west of the River Nith and is bound by tree plantation to the north, east and west. To the south is an agricultural field. The contribution made by setting to the asset's cultural significance pertains to its riverside setting and its relationship with agricultural land to the west which would likely have been settled in the prehistoric period. The presence of the proposed turbines c.8 km to the east would not detract from the ability to understand, appreciate and experience the asset within its important local setting. No impact predicted.
SM2838	Templand Mains,Roman signal station 770m NNW of	Roman: signal station	287670	594808	SM	Roman	High (National)	Within ZTV	Wider landscape contributes to asset significance. Impact possible in principle	This is not proven as a signal station, recorded instead in NRHE as a homestead. The asset is located in an agricultural field and is bound by a housing estate to the east and woodland to the north and east. The River Nith is located to the west and the asset likely related to contemporary settlement along this routeway. It does not survive as an above ground feature and any relationship it may have had with other Roman sites is now no longer discernible. The presence of the proposed turbines would not impact how the asset is understood, appreciated and experienced in relation to the River Nith and possible nearby contemporary settlement. No impact on asset significance.

Ref	Name	Description	E	N	Status	Period	Importance	ZTV	Significance	Setting
										River Nith. It shares no relationship with the area of proposed turbines which would be located c.7 km to the north-east. The proposed development would not impact how the asset is understood, appreciated and experienced in relation to its important local setting. No impact predicted.
SM640	Stiddrig Cairn, long cairn and cairn	Prehistoric ritual and funerary: long cairn	304119	598780	SM	Prehistoric	High (National)	Within ZTV	Wider landscape contributes to asset significance. Impact possible in principle	Asset lies within clearing surrounded by commercial forestry. The contribution made by setting to cultural significance relates to its location in relation to nearby contemporary settlement and adjacent to the Eyre Burn. It would have been used by the inhabitants of the local landscape for funerary and ceremonial activity. It shares no relationship with the area of proposed turbines, located c.8 km to the south-west. The asset is orientated NW-SE away from the location of the proposed development. No impact predicted.
SM641	Twelve Apostles, stone circle	Prehistoric ritual and funerary: stone circle or ring	294702	579405	SM	Prehistoric	High (National)	Within ZTV	Wider landscape contributes to asset significance. Impact possible in principle	Asset is located in an agricultural field between Cluden Water and Loch Foot Burn. The contribution made by setting to its cultural significance relates to its position between these two water courses and in relation to nearby contemporary settlement. It has no relationship with the area of proposed turbines, located c.10 km to the north and there is no evidence long distance views towards this area was a factor in the setting of the asset. No impact predicted.
SM643	Barrs Hill, fort	Prehistoric domestic and defensive: fort (includes hill and promontory fort)	301519	583459	SM	Prehistoric	High (National)	Within ZTV	Wider landscape contributes to asset significance. Impact possible in principle	Fort located on Barrs Hill with views in all directions including in the direction of the proposed development. However, the ISA (7 km to NW) is located considerably outwith the sphere of influence in which the fort is understood to have functioned, defined by water courses on three sides. No impact on asset significance.

Technical Appendix 11.2 Gazetteer of Heritage Assets

Ref	Name	Description	E	N	Status	Period	Importance	ZTV	Significance	Setting
SM662	Springfieldhill, fort	Prehistoric domestic and defensive: fort (includes hill and promontory fort)	289444	584310	SM	Prehistoric	High (National)	Within ZTV	Wider landscape contributes to asset significance. Impact possible in principle	Fort located on Springfieldhill with views in all directions including in the direction of the proposed development. However, the ISA (8 km to NE) is located considerably outwith the sphere of influence in which the fort is understood to have functioned, defined by Laggan Burn to the N. No impact on asset significance.
SM673	Carzield,Roman fort	Roman: fort	296878	581806	SM	Roman	High (National)	Within ZTV	Wider landscape contributes to asset significance. Impact possible in principle	Asset survives as below ground remains evidenced by cropmarks identified on aerial photography. It has no above ground remains but the contribution made by setting to the asset's cultural significance can be discerned through the asset's location adjacent to the Water of Ae on productive agricultural land. The asset was likely positioned to control movement along the River Nith valley and control local agricultural land. It shares no relationship with the area of proposed turbines which would be located c.7 km to the north. The proposed development would not impact how the asset is understood, appreciated and experienced in relation to its important local setting. No impact predicted.
SM677	West Gallaberry,Roman camp & native promontory settlement	Prehistoric domestic and defensive: settlement; Roman: camp	296337	582727	SM	Prehistoric	High (National)	Within ZTV	Wider landscape contributes to asset significance. Impact possible in principle	Asset survives as below ground remains evidenced by cropmarks identified on aerial photography. It has no above ground remains but the contribution made by setting to the asset's cultural significance can be discerned through the asset's location adjacent to the Water of Ae on productive agricultural land. The asset was likely positioned to control movement along the River Nith valley and control local agricultural land. It shares no relationship with the area of proposed turbines which would be located c.7 km to the north. The proposed development would not impact how the asset is understood, appreciated and experienced in relation to its important local setting. No impact predicted.

Technical Appendix 11.2 Gazetteer of Heritage Assets

Ref	Name	Description	E	N	Status	Period	Importance	ZTV	Significance	Setting
SM680	Nith Bridge,cross 180m W of	Crosses and carved stones: cross (free- standing)	286892	595473	SM / HER 'Promoted Site'		High (National)	Within ZTV	No impact on asset significance	Asset is located adjacent to River Nith and was positioned to relate to this routeway and to be visible on approach to the village of Burnhead. Distant views towards the ISA c. 8 km to the east do not contribute to the asset's cultural significance. No impact predicted.
SM689	Dalswinton Old House	Secular: house	294474	584056	SM	Medieval	High (National)	Within ZTV	No impact on asset significance	Asset is located within GDL00131 Dalswinton and functions within the designed landscape. It is enclosed by trees and there is no evidence that distant views towards the ISA c.5 km to the north contribute to the asset's cultural significance. No impact predicted.
SM690	Nithside,motte & bailey 450m ESE of	Secular: bailey	289175	590128	SM	Medieval	High (National)	Outwith ZTV	No impact on asset significance	The asset is outwith the ZTV. No culturally significant views towards the asset within the ZTV have been identified. No impact on asset's cultural significance is predicted.
SM697	Lag Tower	Secular: tower	288022	586180	SM	Medieval	High (National)	Within ZTV	No impact on asset significance	The tower was positioned in order to monitor movement along the adjacent road to the north and control the local area. Its prominence would not be challenged by the proposed development which would be located c. 8 km to the north-east. No impact predicted.
SM700	Moatland,motte	Secular: motte	286410	585677	SM	Medieval	High (National)	Within ZTV	Wider landscape contributes to asset significance. Impact possible in principle	Asset is positioned on the east bank of the River Nith in agricultural land. The contribution made by setting to the asset's cultural significance pertains to its locally prominent position located to control movement along the River Nith valley and control the local area. The prominence of the asset would not be challenged by the proposed development which would be located c. 6 km to the east. No impact predicted.

Technical Appendix 11.2 Gazetteer of Heritage Assets

Ref	Name	Description	E	N	Status	Period	Importance	ZTV	Significance	Setting
SM711	Tibbers Castle	Secular: castle	286232	598176	SM	Medieval	High (National)	Within ZTV	Wider landscape contributes to asset significance. Impact possible in principle	Asset is positioned on the west bank of the River Nith in agricultural land. The contribution made by setting to the asset's cultural significance pertains to its locally prominent position located to control movement along the River Nith valley and control the local area. The prominence of the asset would not be challenged by the proposed development which would be located c. 9 km to the south-east. No impact predicted.
SM8610	Kinnelhead Tower, fortified farmstead & cross incised stones	Crosses and carved stones: cross slab; Secular: bastle	302790	601688	SM	Medieval	High (National)	Outwith ZTV	No impact on asset significance	The asset is outwith the ZTV. No culturally significant views towards the asset within the ZTV have been identified. No impact on asset's cultural significance is predicted.
SM90221 / PiC208	Morton Castle, castle, Morton Loch	Secular: castle	289072	599192	SM / PiC / HER 'Promoted Site'	Medieval	High (National)	Within ZTV	Wider landscape contributes to asset significance. Impact possible in principle	Dunegal, the Lord of Nithsdale in the 12th c, is supposed to have had a castle here. The well preserved remains of Morton Castle (name verified) comprise a trapezoidal-shaped roofless building measuring internally 34.0m by 9.9m with walling surviving up to 8.0m high. The north, east and south walls are all 2.2m thick whilst the west wall is 0.7m. There are the remains of a circular tower in the south east corner and part of the gatehouse on the south west corner. The foundations of the west half of the gatehouse and the west wall of the castle can still be traced but there is no evidence of the external north wall shown on plan. It is approached from the south by a terraced trackway which crosses a deep, apparently natural ditch (across the neck of the promontory) by an earthen causeway. Located 6.5km away, it is not clear whether views of the hills comprising the ISA contribute to its cultural significance although it is possible that the Proposed Development may have an impact on the asset's sense of place. Detailed assessment required. Asset assessed in Section 6.4.1 of Volume 2 Chapter 11 Archaeology and Cultural Heritage.

LB10204	FOURMERKLAND TOWER	Tower	290856	580755	Cat A LB	Post-medieval	High (National)	Outwith ZTV	No impact on asset significance	The asset is outwith the ZTV. No culturally significant views towards the asset within the ZTV have been identified. No impact on asset's cultural significance is predicted.

Technical Appendix 11.2 Gazetteer of Heritage Assets

Ref	Name	Description	E	N	Status	Period	Importance	ZTV	Significance	Setting
LB10218	WEST GALLOBERRY FARM STEADING AND HORSEMILL	Farmsteading	296416	582622	Cat A LB	Post-medieval	High (National)	Within ZTV	No impact on asset significance	Noted in HES Scoping Response. The asset is located on agricultural land adjacent to the 'The Lake' river. The building relates primarily to its local setting comprising agricultural land. There is no evidence that views towards the ISA contribute to the asset's cultural significance and the asset shares no relationship with the ISA which is located c.6 km to the north. No impact predicted.
LB10244	BLACKWOOD HOUSE FORMER STABLES	Stables	290693	587009	Cat A LB	Post-medieval	High (National)	Outwith ZTV	No impact on asset significance	Noted in HES Scoping Response. The asset is outwith the ZTV. No culturally significant views towards the asset within the ZTV have been identified. No impact on asset's cultural significance is predicted.
LB10300	CARNSALLOCH HOUSE	House	297092	580300	Cat A LB	Post-medieval	High (National)	Within ZTV	No impact on asset significance	8.6 km south. House faces west, looking over River Nith valley and shares no relationship with the ISA. No impact predicted.
LB10301	CARNSALLOCH CHAPEL AT THE MOUNT	Chapel	297467	580953	Cat A LB	Post-medieval	High (National)	Within ZTV	No impact on asset significance	Asset is enclosed by trees and functions within this secluded setting in relation to the River Nith. Long range views towards the ISA (c.9 km away) do not contribute to its cultural significance. No impact predicted.
LB10303	CARNSALLOCH FORMER STABLES	Stables	297318	580394	Cat A LB	Post-medieval	High (National)	Within ZTV	No impact on asset significance	The asset relates to nearby agricultural land and it is this local setting which contributes to its cultural significance. Long range views towards the ISA do not contribute to its cultural significance. No impact predicted.
LB17232	AMISFIELD HOUSE	House	299201	583774	Cat B LB	Post-medieval	Medium (Regional)	Within ZTV	No impact on asset significance	Noted in HES Scoping Response. Asset is located within a relatively enclosed setting within a non-inventory designed landscape (NIDL). Views from the asset are over parkland to the south, the walled garden to the north (LB17234) and Amisfield Tower to the north (LB17233). Policy woodland largely screens extensive outward views from the asset. No evidence that views towards the hills of the ISA contributes to the asset's cultural significance. The ability to understand,

Technical Appendix 11.2 Gazetteer of Heritage Assets

Ref	Name	Description	E	N	Status	Period	Importance	ZTV	Significance	Setting
										appreciate and experience the asset in relation to its NIDL and associated Listed Buildings would remain unaffected by the proposed development. No impact predicted.
LB17233	AMISFIELD TOWER	Tower	299203	583800	Cat A LB / HER Promoted Site	Post-medieval	High (National)	Within ZTV	No impact on asset significance	Noted in HES Scoping Response. 5.6 km SE. Not occupied but well maintained and virtually unaltered. Tower is hidden with no outward views. Asset is located within a relatively enclosed setting within a non-inventory designed landscape (NIDL). Views from the asset back to LB17232 Amisfield House and north over the walled gardens (LB17234). Policy woodland largely screens extensive outward views from the asset. No evidence that views towards the hills of the ISA contributes to the asset's cultural significance. The ability to understand, appreciate and experience the asset in relation to its NIDL and associated Listed Buildings would remain unaffected by the proposed development. No impact predicted.
LB17234	AMISFIELD GARDEN WALLS	Walled garden	299228	583831	Cat B LB	Post-medieval	Medium (Regional)	Within ZTV	No impact on asset significance	Noted in HES Scoping Response. Asset relates to NIDL for Amisfield House and has no wider landscape setting beyond this which contributes to its cultural significance. No impact predicted.
LB17262	PARKHOUSE BRIDGE (OVER MARR BURN)	Bridge	283537	598998	Cat C LB	Post-medieval	Low (Local)	Outwith ZTV	No impact on asset significance	Asset is outwith the ZTV but will be considered in terms of how it contributes to the cultural significance of GDL00143 Drumlanrig Castle.
LB17279	Auchenknight Farmhouse	Farmhouse	284490	597800	Cat B LB	Post-medieval	Medium (Regional)	Within ZTV	Wider landscape contributes to asset significance. Impact possible in principle	Detailed assessment required as part of the assessment of GDL00143 Drumlanrig Castle. Asset assessed in Section 6.4.2 of Volume 2 Chapter 11 Archaeology and Cultural Heritage .
LB17286	NITH BRIDGE (A702 OVER RIVER NITH)	Bridge	287081	595480	Cat A LB	Post-medieval	High (National)	Outwith ZTV	No impact on asset significance	The asset is outwith the ZTV. No culturally significant views towards the asset within the ZTV have been identified. No impact on asset's cultural significance is predicted.

No culturally significant views towards the asset within the ZTV have been identified. No impact on asset's cultural significance is predicted.
SM10548	Raehills, scooped settlement 650m NE of	Prehistoric domestic and defensive: scooped settlement; Secular: enclosure	306732	594892	SM	Prehistoric	High (National)	Outwith ZTV	No impact on asset significance	The asset is outwith the ZTV. No culturally significant views towards the asset within the ZTV have been identified. No impact on asset's cultural significance is predicted.
SM1075	Hall Hill, fort	Prehistoric domestic and defensive: fort (includes hill and promontory fort)	290593	579497	SM	Prehistoric	High (National)	Within ZTV	Wider landscape contributes to asset significance. Impact possible in principle	The asset was sited in order to relate to the Cluden Water and control nearby agricultural land. The ISA is located beyond sphere of influence of fort and no impact is predicted.
SM10789	Beattock Hill, settlement 700m W of Hillside Cottages	Prehistoric domestic and defensive: enclosure (domestic or defensive)	306644	602552	SM	Prehistoric	High (National)	Outwith ZTV	No impact on asset significance	The asset is outwith the ZTV. No culturally significant views towards the asset within the ZTV have been identified. No impact on asset's cultural significance is predicted.
SM10790	Easter Earshaig, settlement 100m NW of	Prehistoric domestic and defensive: enclosure (domestic or defensive); Secular: settlement, including deserted, depopulated and townships	304775	602448	SM	Prehistoric	High (National)	Outwith ZTV	No impact on asset significance	The asset is outwith the ZTV. No culturally significant views towards the asset within the ZTV have been identified. No impact on asset's cultural significance is predicted.
SM1084	McNaughton, fort	Prehistoric domestic and defensive: fort (includes hill and promontory fort)	287350	577867	SM	Prehistoric	High (National)	Within ZTV	No impact on asset significance	The asset was sited in order to relate to the Old Water, to monitor nearby defended settlements and control nearby agricultural land. The ISA is located beyond sphere of influence of fort and no impact is predicted.

Technical Appendix 11.2 Gazetteer of Heritage Assets

Ref	Name	Description	E	N	Status	Period	Importance	ZTV	Significance	Setting
SM1092	Picts Knowe, fort	Prehistoric domestic and defensive: fort (includes hill and promontory fort)	295387	572133	SM	Prehistoric	High (National)	Within ZTV	No impact on asset significance	The asset was sited in order to relate to and control nearby agricultural land west of Cragen Water. The ISA is located beyond sphere of influence of fort and no impact is predicted.
SM11910	Hallmuir, settlement 510m WSW of	Prehistoric domestic and defensive: settlement	312256	578946	SM	Prehistoric	High (National)	Within ZTV	No impact on asset significance	The asset was sited in order to relate to and control nearby agricultural land east of Annan Water. The ISA is located beyond sphere of influence of fort and no impact is predicted.
SM11912	Hallmuir, settlement 630m SW of	Prehistoric domestic and defensive: settlement	312286	578647	SM	Prehistoric	High (National)	Outwith ZTV	No impact on asset significance	The asset is outwith the ZTV. No culturally significant views towards the asset within the ZTV have been identified. No impact on asset's cultural significance is predicted.
SM11968	Torwood, enclosure 270m SW of	Prehistoric domestic and defensive: enclosure (domestic or defensive)	312115	583188	SM	Prehistoric	High (National)	Within ZTV	No impact on asset significance	The asset as likely sited in order to relate to Dryfe Water and nearby contemporary settlement. It shares no relationship with the ISA. No impact predicted.
SM12002	Dryfesdalegate, fort 75m SSE of	Prehistoric domestic and defensive: fort (includes hill and promontory fort)	311692	582433	SM	Prehistoric	High (National)	Within ZTV	No impact on asset significance	The asset was sited in order to relate to and control nearby agricultural land near to Dryfe Water. The ISA is located beyond sphere of influence of fort and no impact is predicted.
SM12101	Little Dalton Church	Ecclesiastical: church	308912	574688	SM	Medieval	High (National)	Outwith ZTV	No impact on asset significance	The asset is outwith the ZTV. No culturally significant views towards the asset within the ZTV have been identified. No impact on asset's cultural significance is predicted.
SM12114	Moss Castle, fort	Prehistoric domestic and defensive: fort (includes hill and promontory fort)	308855	576023	SM	Prehistoric	High (National)	Within ZTV	Wider landscape contributes to asset significance. Impact possible in principle	18 km to SE. ISA located beyond sphere of influence of fort.
SM12117	Hound Hill, cairn	Prehistoric ritual and funerary: cairn (type uncertain)	307563	576182	SM	Prehistoric	High (National)	Within ZTV	Wider landscape contributes to asset significance. Impact possible in principle	18 km to SE. prominence unaffected.
SM12607	Eyre Burn, settlement 1km NNW of Stidriggs	Prehistoric domestic and defensive: scooped settlement	305247	600498	SM	Prehistoric	High (National)	Outwith ZTV	No impact on asset significance	The asset is outwith the ZTV. No culturally significant views towards the asset within the ZTV have been identified. No impact on asset's cultural significance is predicted.

Technical Appendix 11.2 Gazetteer of Heritage Assets

Ref	Name	Description	E	N	Status	Period	Importance	ZTV	Significance	Setting
SM12613	Fauld Burn, enclosure and building 875m W of Stidriggs	Prehistoric domestic and defensive: enclosure (domestic or defensive); Secular: enclosure	304909	599743	SM	Prehistoric	High (National)	Outwith ZTV	No impact on asset significance	The asset is outwith the ZTV. No culturally significant views towards the asset within the ZTV have been identified. No impact on asset's cultural significance is predicted.
SM12614	Benoaks, stone row 150m N of	Prehistoric ritual and funerary: stone rows	308372	603813	SM	Prehistoric	High (National)	Outwith ZTV	No impact on asset significance	The asset is outwith the ZTV. No culturally significant views towards the asset within the ZTV have been identified. No impact on asset's cultural significance is predicted.
SM12620	Craiglynn, two scooped settlements 660m and 750m SSE of	Prehistoric domestic and defensive: scooped settlement	312045	604499	SM	Prehistoric	High (National)	Within ZTV	No impact on asset significance	The contribution made by setting to its cultural significance pertains to its position in relation to nearby agricultural land defined by Kinnel Water. The asset functions within this local landscape setting and shares no relationship with the area of proposed turbines, located 11 km to the south-east. The proposed development would not impact how the asset is understood, appreciated and experienced in relation to its important local setting. No impact predicted.
SM12658	Stidriggs, cairn 750m SSW of	Prehistoric ritual and funerary: cairn (type uncertain)	305534	598938	SM	Prehistoric	High (National)	Outwith ZTV	No impact on asset significance	The asset is outwith the ZTV. No culturally significant views towards the asset within the ZTV have been identified. No impact on asset's cultural significance is predicted.
SM12660	Broomhillbank Hill, fort	Prehistoric domestic and defensive: fort (includes hill and promontory fort)	313103	591077	SM	Prehistoric	High (National)	Within ZTV	Wider landscape contributes to asset significance. Impact possible in principle	16 km to E. ISA located beyond sphere of influence of fort and would not challenge the asset within its important local setting. No impact predicted.
SM12661	Dinwoodie, settlement 425m E of	Prehistoric domestic and defensive: scooped settlement	310855	590121	SM	Prehistoric	High (National)	Within ZTV	No impact on asset significance	The contribution made by setting to its cultural significance pertains to its position in relation to nearby agricultural land. The asset functions within this local landscape setting and shares no relationship with the area of proposed turbines, located over 10 km to away. The proposed development would not impact how the asset is understood, appreciated and experienced in relation to its important local setting. No impact predicted.

Asset functions in relation to nearby agricultural land and contemporary settlement and shares no relationship with the area of proposed turbines. The proposed development would not challenge the asset within its important local setting. No impact predicted.
SM633	Capenoch Loch, long cairn	Prehistoric ritual and funerary: long cairn	283845	592595	SM	Prehistoric	High (National)	Outwith ZTV	No impact on asset significance	The asset is outwith the ZTV. No culturally significant views towards the asset within the ZTV have been identified. No impact on asset's cultural significance is predicted.
SM642	White Cairn, long cairn, Fleuchlarg	Prehistoric ritual and funerary: long cairn	285437	587339	SM	Prehistoric	High (National)	Within ZTV	Wider landscape contributes to asset significance. Impact possible in principle	ISA is lot located on the NE-SW alignment of the cairn. Asset likely related to nearby contemporary settlement and shares no relationship with the ISA. No impact predicted.
SM648	Cars Wood, fort	Prehistoric domestic and defensive: fort (includes hill and promontory fort)	306464	588000	SM	Prehistoric	High (National)	Outwith ZTV	No impact on asset significance	The asset is outwith the ZTV. No culturally significant views towards the asset within the ZTV have been identified. No impact on asset's cultural significance is predicted.
SM650	Castlehill, earthwork 400m S of	Prehistoric domestic and defensive: enclosure (domestic or defensive)	288618	603726	SM	Prehistoric	High (National)	Outwith ZTV	No impact on asset significance	The asset is outwith the ZTV. No culturally significant views towards the asset within the ZTV have been identified. No impact on asset's cultural significance is predicted.
SM653	Dalmakethar Burn, fort	Prehistoric domestic and defensive: fort (includes hill and promontory fort)	311973	592174	SM	Prehistoric	High (National)	Within ZTV	No impact on asset significance	Not a hillfort. Asset functions in relation to nearby agricultural land and contemporary settlement and shares no relationship with the area of proposed turbines. The proposed development would not challenge the asset within its important local setting. No impact predicted.
SM654	Ericstane, fort	Prehistoric domestic and defensive: fort (includes hill and promontory fort)	306904	611051	SM	Prehistoric	High (National)	Outwith ZTV	No impact on asset significance	The asset is outwith the ZTV. No culturally significant views towards the asset within the ZTV have been identified. No impact on asset's cultural significance is predicted.

Technical Appendix 11.2 Gazetteer of Heritage Assets

Ref	Name	Description	E	N	Status	Period	Importance	ZTV	Significance	Setting
SM655	Gallaberry Hill, fort	Prehistoric domestic and defensive: fort (includes hill and promontory fort)	311353	583872	SM	Prehistoric	High (National)	Within ZTV	No impact on asset significance	Not a hillfort. Asset functions in relation to nearby agricultural land and contemporary settlement and shares no relationship with the area of proposed turbines. The proposed development would not challenge the asset within its important local setting. No impact predicted.
SM658	Range Castle, fort	Prehistoric domestic and defensive: fort (includes hill and promontory fort)	308651	576382	SM	Prehistoric	High (National)	Within ZTV	Wider landscape contributes to asset significance. Impact possible in principle	18 km to SE. ISA located beyond sphere of influence of fort. Asset functions in relation to nearby agricultural land and contemporary settlement and shares no relationship with the area of proposed turbines. The proposed development would not challenge the asset within its important local setting. No impact predicted.
SM659	Rough Island, crannog	Prehistoric domestic and defensive: crannog	276284	584500	SM	Prehistoric	High (National)	Outwith ZTV	Wider landscape contributes to asset significance. Impact possible in principle	The asset is outwith the ZTV. No culturally significant views towards the asset within the ZTV have been identified. No impact on asset's cultural significance is predicted.
SM663	Tynron Doon, fort	Prehistoric domestic and defensive: fort (includes hill and promontory fort)	281965	593937	SM	Prehistoric	High (National)	Within ZTV	Wider landscape contributes to asset significance. Impact possible in principle	13 km to W. ISA located beyond sphere of influence of fort, positioned overlooking Shinnel Water. Asset functions in relation to nearby agricultural land and contemporary settlement and shares no relationship with the area of proposed turbines. The proposed development would not challenge the asset within its important local setting. No impact predicted.
SM665	Woody Castle, fort, Lochbank, Lochmaben	Prehistoric domestic and defensive: fort (includes hill and promontory fort)	307337	583679	SM	Prehistoric	High (National)	Within ZTV	No impact on asset significance	Not a hillfort. Asset functions in relation to nearby agricultural land and contemporary settlement and shares no relationship with the area of proposed turbines. The proposed development would not challenge the asset within its important local setting. No impact predicted.
SM670	Durisdeer, Roman fortlet between Dash Cleuch and Kirk Burn	Roman: fortlet	290278	604874	SM	Roman	High (National)	Outwith ZTV	No impact on asset significance	The asset is outwith the ZTV. No culturally significant views towards the asset within the ZTV have been identified. No impact on asset's cultural significance is predicted.
