1. MARINE ACTIVITIES

1.1. Summary:

Mariners are advised that circa between 19/10/2026 and 25/10/2026, Jack-up Barge (JUB) 'Joro' will commence jacking up next to the East Anglia THREE Offshore Converter Station (OFCS) within the East Anglia THREE Windfarm area set out in [section 2](#) of this document.

During the Installation period, vessels are requested to keep a 2000m safety distance at all times from the JUB 'Joro' and supporting tugs.

1.2. Activity Description:

Jack up barge 'Joro' will be positioned next to the East Anglia THREE OFCS within the East Anglia THREE Offshore Windfarm area.

- Rig move: The vessel will be maneuvered to its designated location.
- Jacking-Up Procedure: 'Joro' will be temporarily softly jacked on a safe stand-off position, from where its four anchors and mooring lines will be deployed. The deployed mooring lines will be used to move the vessel safely towards the final position, where the vessel will be jacked.
- Operational Phase: Once jacked up, the Jack up barge will remain stationary for an estimated six months.

During operations, the 'Joro', 'Fram Prince' (Lead tug), 'Camperdown' (Assistant tug) and 'Waterland' (Assistant tug) will be restricted in their ability to manoeuvre as defined under COLREGs (International Regulations for Preventing Collisions at Sea 1972) and will display the appropriate day shapes and lights. The vessels will also transmit an Automatic Identification System (AIS) message.

A Statutory Safety zone of 500m radius will be in place around the JUB Joro at all times.

'Joro' and supporting tug are supplied with VHF multi-channel radios and mobile phones.

1.3. Program Schedule:

The 'Joro' is expected to mobilize at the Port of Ardersier between 14/10/2026 and 19/10/2026 and commence offshore operations within the East Anglia THREE area between 19/10/2026 and 25/10/2026. Works are subject to weather conditions.

The progress of installation works, and completion will be notified via East Anglia THREE Weekly Notice of Operations. Completion of works will be notified by future Notice to Mariners.

All vessels will monitor VHF Channel 16 and VHF DSC Channel 70 continuously throughout the operation. It is currently anticipated that weather permitting, works will be carried out on a continuous basis (i.e., 24-hour working, seven days a week) unless notified otherwise.
