In the exercise of these powers, the Company’s Board of Directors formulates these Ethical and Basic Principles of Governance and Sustainability of the Iberdrola Group (the “**Principles**”), which, together with those others that may be included in certain policies of the Governance and Sustainability System due to their subject matter, inform the rules of the Company and any that are approved by the other companies of the Group in the exercise of their corporate autonomy. These Principles, which must be approved by each of the companies of the Group, shall also serve as guidelines for their respective conduct and activities.

1. Scope of Application

The Principles apply to all of the Companies belonging to the Group, as well as to the companies in which the Company holds an equity interest that do not form part of the Group but over which it has effective control, within the limits established by legal provisions and by their respective governance and sustainability systems. The rules that the companies to which these Principles apply establish in the exercise of their powers and autonomy, and which refer to the matters covered in these Principles, shall be consistent herewith.

Without prejudice to the provisions of the preceding paragraph, to the extent that listed country subholding companies form part of the Group, they and their subsidiaries, under their own special framework of enhanced autonomy, may establish principles and rules that must have content consistent with the provisions of these Principles.

To the extent applicable, these Principles must also inform the conduct of the foundations linked to the Group.

For companies that do not form part of the Group but in which the Company holds an interest, as well as for *joint ventures*, temporary joint ventures (*uniones temporales de empresas*) and other entities in which it assumes management, the Company shall also promote the alignment of their regulations with these Principles.

2. Purpose

The purpose of the Principles is to establish ethical and basic standards of governance and sustainability that apply at the Group level, inform the conduct and standards-setting of the companies comprising the Group, and contribute to the organisation and coordination thereof on certain matters, promoting the sustainable creation of long-term value for their shareholders, also taking into account their other Stakeholders.

These Principles, together with the Purpose and Values of the Iberdrola Group, are the basic foundations that inform the rules established in the governance and sustainability systems approved by the various companies of the Group and promote an appropriate level of consistency and coordination among them, while respecting the autonomy of the respective management bodies of such companies, and particularly the special framework of strengthened autonomy of the listed country subholding companies that form part of the Group. Without prejudice to the foregoing, the Company’s Board of Directors, to the extent within its purview, may establish Group-level coordination measures on certain matters, particularly in the policies that it approves and which form part of the Company’s Governance and Sustainability System, endeavouring to at all times ensure homogeneity, consistency and meticulousness as guiding standards.

These Principles are inspired by the major leading international frameworks, including the Universal Declaration of Human Rights, the United Nations (UN) Guiding Principles on Business and Human Rights; the OECD Guidelines for Multinational Enterprises, the principles
