

## Appendix 10.4

Assessment of Heritage Assets between  
5km and 10km of the Wind Turbine Locations

# Table of contents

1      **Assessment of Heritage Assets between 5km and 10km of the Wind Turbine Locations**    3

# 1 Assessment of Heritage Assets between 5km and 10km of the Wind Turbine Locations

Heritage Asset No.	Ref Number	Heritage Asset Name	Designation	Setting	No of tips visible (Zone of Theoretical Visibility (ZTV))	No of hubs visible (ZTV)	Distance to nearest wind turbine location (kilometres (km))	Magnitude of impact	Significance of Effect	Viewpoint Figure (where applicable)
<b>Scheduled Monuments</b>										
39	SM2176	Kildoon Hill Fort	Scheduled Monument	<p>The fort is located on the eastern edge of Kildoon Hill with steep sided slopes to the north and east and as such has extensive views in these directions over the lower lying areas in the immediate surroundings, with views to the south curtailed by Craigfin and Craigdow Hill. Key views from the fort are probably views over the lower lying ground to the north and east and intervisibility between Kildoon and Dowan's Hill dun to the north east.</p> <p>Current views to the south east are dominated by the upland areas of Carrick and Merrick and the commercial forestry plantations of Carrick Forest. The blade tips and hubs of the Proposed Development would be visible in distant and peripheral views to the south east.</p> <p>The magnitude of impact has been assessed as Negligible Adverse on an asset of High value, with very minor changes to setting with the introduction of blade tips and hubs within distant and peripheral views to the south east. These changes are unlikely to impact on the ability to understand and appreciate the fort. As such the significance of effect has been assessed as <b>Slight Adverse</b>.</p>	11	6	9.5km	Negligible Adverse	<b>Slight Adverse</b>	N/A
48	SM4390	Dalnean Hill Farmstead and Field System	Scheduled Monument	<p>The farmstead is located on the summit and across the north eastern slopes of Dalnean Hill with immediate views over Bogton Loch and Dalmellington. The slopes of Auchenroy Hill and Wee Hill of Glenmount curtail views to the west and south. Key views relate to the open and extensive views over Bogton Loch and Dalmellington and to the possible contemporary motte within the village.</p> <p>Current views to the south west are dominated by the slopes of the hills in this direction. The blade tips from a single hub of the Proposed Development would only be visible from one small location within the settlement (Approximately 25m<sup>2</sup> centred on 246158, 605330), and would be almost imperceptible at almost 10km due to the intervening localised topography.</p> <p>The magnitude of impact has been assessed as No Change on an asset of High value, with no changes to setting with the introduction of blade tips from a single hub within distant and peripheral views to the south west. As such the significance of effect has been assessed as <b>Neutral</b>.</p>	1	0	9.9km	No Change	<b>Neutral</b>	N/A
63	SM5200	Munteoch Settlement and Field Systems	Scheduled Monument	<p>The settlement is located at the base of the slopes of Auldraigoch Hill, within an upland moorland landscape and partly set within the commercial forestry plantation of the Galloway Forest Park. The southern half of the settlement and field systems are located within clearings in the commercial forestry and the northern half is set within the adjacent moorland with open views north and the western edge having more distant views. Key views are probably to contemporary assets in the immediate vicinity with recorded Post-Medieval assets to the north and south west. The infrastructure of the operational Dersalloch Windfarm is less than 1km to the north and north west.</p> <p>Current views to the south west are dominated by the commercial forestry plantations of Galloway Forest Park and Carrick Forest beyond, with the Lochluie Hill and Maratz Hill curtailing distant views. The blade tips and hubs of the Proposed Development would be visible from the western edge of the settlement and field systems, along with an area of</p>	9	7	6.6km	Negligible Adverse	<b>Slight Adverse</b>	N/A

Heritage Asset No.	Ref Number	Heritage Asset Name	Designation	Setting	No of tips visible (Zone of Theoretical Visibility (ZTV))	No of hubs visible (ZTV)	Distance to nearest wind turbine location (kilometres (km))	Magnitude of impact	Significance of Effect	Viewpoint Figure (where applicable)
				<p>higher ground in the centre. Any visibility would be significantly impacted upon by localised topography and vegetation.</p> <p>The magnitude of impact has been assessed as Negligible Adverse on an asset of High value, with very minor changes to setting with the introduction of blade tips and hubs within distant and peripheral views to the south west. These views are likely to be significantly screened by localised vegetation in many areas and the changes are unlikely to impact on the ability to understand and appreciate the settlement and its associations with nearby assets. As such the significance of effect has been assessed as <b>Slight Adverse</b>.</p>						
75	SM316	Dalquharran Castle (Old Castle)	Scheduled Monument	<p>The castle is located on the western bank of a meander on the Water of Girvan, with the watercourse providing natural defences on the north west, west and southern sides of the castle. It is set within the Dalquharran estate with the new castle located to the north west. The castle sits upon a raised area of ground within a low lying landscape and has immediate views of Dailly to the south and higher ground in all directions. Key views are probably the views to and from the new Dalquharran Castle, and views overlooking its immediate surroundings and the flood plain of the Water of Girvan.</p> <p>Current views to the south east are dominated by the upland landscape and Hadyard Hill, Craiginmoddie Hill, Doughty Hill, and Barony Hill, with commercial forestry plantations notable on some of these slopes. The blade tips and hubs of the Proposed Development would be visible in distant views in this direction.</p> <p>The magnitude of impact has been assessed as Negligible Adverse on an asset of High value, with very minor changes to setting with the introduction of blade tips and hubs within distant and peripheral views to the south east. These views may be impacted upon by localised vegetation and the changes would not impact on the ability to understand and appreciate the castle and its setting within the Dalquharran estate. As such the significance of effect has been assessed as <b>Slight Adverse</b>.</p>	3	1	7.6km	Negligible Adverse	<b>Slight Adverse</b>	N/A
84	SM7491	Knockdon Enclosure	Scheduled Monument	<p>The enclosure is located on the eastern bank of the Knockdon Burn and the western slopes of Knockdon Craig. It is set within an upland landscape used for rough grazing with immediate views of higher ground in all directions. Some blade tips and hubs which form the operational Dersalloch Windfarm are visible to the north and north west. Key views probably relate to views to and from the entrance located in the south east and to the south west and views down the Knockdon Burn towards a potential contemporary cairn.</p> <p>Current views to the south west are dominated by the localised topography with more distant views dominated by the commercial forestry plantations of Carrick Forest, and the summits of Craig Dhu and Pinverains. The blade tips and hubs of the Proposed Development would be visible in distant views over the ridge lines of the intervening hills. These views are likely to be impacted upon by localised vegetation from the commercial forestry plantations.</p> <p>The magnitude of impact has been assessed as Minor Adverse on an asset of High value, with slight changes to setting with the introduction of blade tips and hubs within distant views to the south west. These views may be impacted upon by localised vegetation and the changes would not impact on the ability to understand and appreciate the enclosure. As such the significance of effect has been assessed as <b>Slight Adverse</b>.</p>	10	8	5.7km	Minor Adverse	<b>Slight Adverse</b>	N/A

Heritage Asset No.	Ref Number	Heritage Asset Name	Designation	Setting	No of tips visible (Zone of Theoretical Visibility (ZTV))	No of hubs visible (ZTV)	Distance to nearest wind turbine location (kilometres (km))	Magnitude of impact	Significance of Effect	Viewpoint Figure (where applicable)
94	SM2201	Maxwellston Hill Fort	Scheduled Monument	<p>The fort is located on the summit of Maxwellston Hill, to the south west of Dailly, and flanked by the summits of Hadyard Hill to the east and Green Hill to the south. The fort has steep sloping ground to the immediate north and west with more level ground toward Hadyard Hill to the west and towards Penwhapple Reservoir to the south. Infrastructure of the operational Hadyard Hill Windfarm is located less than 1km to the south with wind turbines in immediate views from the south west through to the east. Key views relate to views to and from the entrances in the east and north east, as well as dominant views to the north and west overlooking the flood plain of the Water of Girvan and distant views to the coast.</p> <p>Current views to the east already incorporate the infrastructure from the operational Hadyard Hill Windfarm and the commercial forestry plantations of Carrick Forest. The blade tips and hubs of the Proposed Development would only be visible from the eastern half of the fort and would slightly add to the array of visible wind turbines from the Hadyard Hill Windfarm (see <b>Figure 10.11 Viewpoint 30: Maxwellston Hill Fort</b>).</p> <p>The magnitude of impact has been assessed as Minor Adverse on an asset of High value, with slight changes to setting with the introduction of blade tips and hubs within distant and peripheral views to the east. These views may be impacted upon by localised vegetation and the changes would not impact on the ability to understand and appreciate the fort and its dominant position over the Water of Girvan. As such the significance of effect has been assessed as <b>Slight Adverse</b>.</p>	13	6	8.3km	Minor Adverse	<b>Slight Adverse</b>	<b>Figure 10.11 Viewpoint 30</b>
<b>Listed Buildings</b>										
1	LB7545	Manse, 63 Patna Road	Category B Listed Building	<p>The manse is located to the north of the main street through Kirkmichael and is set within a large garden with fields surrounding. An arc of trees is to the immediate south and other mature trees screen the manse from the main roads with the only open views to the north west. Key views are probably to the gardens and to the more open views to the north west.</p> <p>Immediate views to the south are filtered and screened by the garden vegetation but views beyond would incorporate the village cottages and distant views (if visible) would incorporate the high ground containing Carrick Forest. The blade tips and hubs of the Proposed Development would be almost imperceptible from the manse given the distances, immediate filtering and screening and the intervening infrastructure.</p> <p>The magnitude of impact has been assessed as No Change on an asset of High value, with no changes to setting with the introduction of blade tips and hubs in distant and filtered/screened views to the south. As such the significance of effect has been assessed as <b>Neutral</b>.</p>	11	4	9.8km	No Change	<b>Neutral</b>	N/A
2	LB7546	Kirkgate Cottage, 81 Patna Road	Category C Listed Building	<p>The cottage is located on the northern side of Patna Road that runs through the centre of Kirkmichael Conservation Area, and forms part of a long row of cottages from approximately the same period that give a picturesque and historic character to the village. Key views related to the cottage include views east to west along Patna Road as well as reciprocal views from across the street.</p> <p>Immediate views to the south would be curtailed by the cottages on the other side of the road, and views beyond would be dominated by the slopes to the south of Dyrock Burn. The blade tips and hubs of the Proposed Development would be almost imperceptible from</p>	4	2	9.7km	No Change	<b>Neutral</b>	N/A

Heritage Asset No.	Ref Number	Heritage Asset Name	Designation	Setting	No of tips visible (Zone of Theoretical Visibility (ZTV))	No of hubs visible (ZTV)	Distance to nearest wind turbine location (kilometres (km))	Magnitude of impact	Significance of Effect	Viewpoint Figure (where applicable)
				<p>the cottage given the distances and the nature of the intervening infrastructure and topography.</p> <p>The magnitude of impact has been assessed as No Change on an asset of Medium value, with no changes to setting with the introduction of blade tips and hubs in distant views to the south. As such the significance of effect has been assessed as <b>Neutral</b>.</p>						
3	LB7543	Myrtle Cottage, 47 Patna Road	Category B Listed Building	<p>The cottage is located on the northern side of Patna Road that runs through the centre of Kirkmichael Conservation Area, and forms part of a long row of cottages from approximately the same period that give a picturesque and historic character to the village. Key views related to the cottage include views east to west along Patna Road as well as reciprocal views from across the street.</p> <p>Immediate views to the south would be curtailed by the cottages on the other side of the road, and views beyond would be dominated by the other properties to the south of Dyrock Burn. The blade tips and hubs of the Proposed Development would be almost imperceptible from the cottage given the distances and the intervening infrastructure.</p> <p>The magnitude of impact has been assessed as No Change on an asset of High value, with no changes to setting with the introduction of blade tips and hubs in distant views to the south. As such the significance of effect has been assessed as <b>Neutral</b>.</p>	10	4	9.7km	No Change	<b>Neutral</b>	N/A
4	LB7542	45 Patna Road	Category B Listed Building	<p>The cottage is located on the northern side of Patna Road that runs through the centre of Kirkmichael Conservation Area, and forms part of a long row of cottages from approximately the same period that give a picturesque and historic character to the village. Key views related to the cottage include views east to west along Patna Road as well as reciprocal views from across the street.</p> <p>Immediate views to the south would be curtailed by the cottages on the other side of the road, and views beyond would be dominated by the other properties to the south of Dyrock Burn. The blade tips and hubs of the Proposed Development would be almost imperceptible from the cottage given the distances and the intervening infrastructure.</p> <p>The magnitude of impact has been assessed as No Change on an asset of High value, with no changes to setting with the introduction of blade tips and hubs in distant views to the south. As such the significance of effect has been assessed as <b>Neutral</b>.</p>						
72	LB1144	Lochmodie Cottages	Category C Listed Building	<p>The cottages are located on the north side of the road running through Dalquharran estate, and are set within a landscape dominated by commercial forestry with some agricultural field to the immediate north. Views on all sides take in commercial forestry or residential or agricultural infrastructure.</p> <p>The views to the south east are curtailed by the woodland of the Dalquharran estate gardens. The blade tips and hubs of the Proposed Development would not be visible due to the screening from the intervening woodland.</p> <p>The magnitude of impact has been assessed as No Change on an asset of Medium value, with no changes to setting with the introduction of blade tips and hubs screened by the localised vegetation. As such the significance of effect has been assessed as <b>Neutral</b>.</p>	5	4	8.4km	No Change	<b>Neutral</b>	N/A
74	LB125	Dalquharran Castle	Category A Listed Building	<p>The castle is set within the southern half of the Dalquharran estate to the north of the village of Dailly. It sits upon a prominent position within the estate overlooking the parkland and woodland of the estate to the south, with more immediate internal views of the courtyard and stables to the north west. Elements of the operational Hadyard Hill Windfarm are visible to the south. Key views from the castle are probably across the parkland to the east as well as views along the Water of Girvan Valley to the east, south and south west. The reciprocal views with the old Dalquharran Castle would also be important.</p> <p>The current views to the south east include elements of the designed landscape within which it sits as well as the valley of the Water of Girvan and the agricultural landscape beyond. Distant views in this direction are dominated by Doughty Hill and the commercial forestry plantations on the slopes. The blade tips and hubs of the Proposed Development would be visible in distant views from the castle, over the western slopes of Doughty Hill, with the potential for intervening localised vegetation to filter these views (see <b>Figure 10.14 Viewpoint 33: Dalquharran Castle</b>).</p> <p>The magnitude of impact has been assessed as Negligible Adverse on an asset of High value, with very minor changes to setting with the introduction of blade tips and hubs within distant views to the south east. These changes are unlikely to impact on the ability to understand and appreciate the castle and its setting. As such the significance of effect has been assessed as <b>Slight Adverse</b>.</p>	4	2	7.9km	Negligible Adverse	<b>Slight Adverse</b>	<b>Figure 10.14 Viewpoint 33</b>
77	LB1140	Dailly Parish Manse	Category B Listed Building	<p>The manse is located at the north eastern edge of the village of Dailly. It is set back from the B741 out of Dailly with fields to the east and west. A thin line of trees surround the house screening it from the road, but there are open views towards the Water of Girvan to the north. Key views are probably towards the gardens and the Water of Girvan to the north.</p> <p>Current views to the south east are screened and filtered by the localised vegetation, and any views beyond are dominated by the village to the south west and the agricultural</p>	4	1	7.5km	No Change	<b>Neutral</b>	N/A

82	LB6705	Brunston Castle	Category B Listed Building	<p>The castle is located to the west of the village of Dailly, on the north bank of the Water of Girvan. It is set within a wooded area along the bank of the river and forms part of a golf course. Key views are probably views of the Water of Girvan and the open fields to the north and south incorporating the golf course.</p> <p>The views to the south east would be curtailed by the woodland within which it sits, but any views beyond would incorporate the upland areas containing Carrick Forest and in particular Doughty Hill. The blade tips and hubs of the Proposed Development would be almost imperceptible given the screening from localised vegetation.</p> <p>The magnitude of impact has been assessed as No Change on an asset of Low value, with no changes to setting with the introduction of blade tips and hubs screened by the localised vegetation. As such the significance of effect has been assessed as <b>Neutral</b>.</p>	4	3	8.5km	No Change	<b>Neutral</b>	N/A
91	LB1171	Bargany House	Category A Listed Building	<p>The house is located approximately 3km to the south west of the village of Dailly and is set within the estate garden and designed landscape, standing at the edge of the woodland</p>	1	0	10km	No Change	<b>Neutral</b>	N/A

Heritage Asset No.	Ref Number	Heritage Asset Name	Designation	Setting	No of tips visible (Zone of Theoretical Visibility (ZTV))	No of hubs visible (ZTV)	Distance to nearest wind turbine location (kilometres (km))	Magnitude of impact	Significance of Effect	Viewpoint Figure (where applicable)
				<p>garden in parkland on the south bank of the Water of Girvan. Key views are likely to relate to views towards the house from various location within the designed landscape, as well as views from the castle towards the Water of Girvan Valley to the north and north east.</p> <p>Views to the east and south east are dominated by the slopes of Hadyard Hill and other upland areas beyond that contain the Carrick Forest. The blade tips from a single wind turbine would be almost imperceptible from the house given the distances and the significant intervening, localised vegetation adjacent to the house and within the estate.</p> <p>The magnitude of impact has been assessed as No Change on an asset of High value, with no changes to setting with the introduction of blade tips from a single wind turbine likely filtered or screened by the localised vegetation. As such the significance of effect has been assessed as <b>Neutral</b>.</p>						
116	LB101	Category C Listed Building	Lodge, Alton Albany	<p>The lodge is located to the west of the village of Barr, on the opposite side of the River Stinchar, and at the entrance to Alton Albany House to the south. The lodge is set within mature woodland that lines the estate on the western edge with open views to the east across the bridge towards the village. Key views are probably east across the bridge and views south along the driveway.</p> <p>The views to the north east would be screened by the woodland that lines the River Stinchar, but any views beyond would include elements of the village infrastructure, the river valley and Milton Hill. The visibility of blade tips and hubs of the Proposed Development would be significantly impacted upon by the localised vegetation around the river.</p> <p>The magnitude of impact has been assessed as No Change on an asset of Medium value, with no changes to setting with the introduction of blade tips and a single hub likely filtered or screened by the localised vegetation. As such the significance of effect has been assessed as <b>Neutral</b>.</p>	4	1	8.2km	No Change	<b>Neutral</b>	N/A
118	LB1036	Category C Listed Building	Alton Albany	<p>The farm is located to the south east of the village of Barr, on the east bank of the river and directly across from Alton Albany House. It is set within an agricultural landscape with a wide strip of woodland to the immediate north east and south east. The key views from the farm are probably to the south west along the river valley.</p> <p>The views to the north east would be screened by the localised woodland, but any views beyond would include elements of the village infrastructure, the river valley and Milton Hill. The visibility of blade tips from a single wind turbine of the Proposed Development would be significantly impacted upon by the localised vegetation around the river.</p> <p>The magnitude of impact has been assessed as No Change on an asset of Medium value, with no changes to setting with the introduction of blade tips from a single wind turbine likely filtered or screened by the localised vegetation. As such the significance of effect has been assessed as <b>Neutral</b>.</p>	1	0	8.4km	No Change	<b>Neutral</b>	N/A
119	LB4878	Category C Listed Building	Auchensoul	<p>The farmstead is located to the south east of the village of Barr and on the north west bank of the River Stinchar and at the base of Kirkdominae Hill. It is set within the agricultural landscape of the river valley and is surrounded by the upland landscape and commercial forestry plantations on the slopes to the south east. Key views are probably along and across the valley to the south, south west and north east.</p>	3	2	10km	Negligible Adverse	<b>Neutral</b>	N/A

Heritage Asset No.	Ref Number	Heritage Asset Name	Designation	Setting	No of tips visible (Zone of Theoretical Visibility (ZTV))	No of hubs visible (ZTV)	Distance to nearest wind turbine location (kilometres (km))	Magnitude of impact	Significance of Effect	Viewpoint Figure (where applicable)
				<p>The views to the north east incorporate the slopes of Kirkdominae Hill and the agricultural landscape along the flat valley floor, with distant views of Milton Hill. The blade tips and hubs would be visible above the summit of Milton Hill, with localised vegetation potentially impacting upon these views.</p> <p>The magnitude of impact has been assessed as Negligible Adverse on an asset of Medium value, with slight changes to setting with the introduction of blade tips and hubs within distant views to the north east. These views may be impacted upon by localised vegetation and the changes would not impact on the ability to understand and appreciate the farmstead and its valley setting. As such the significance of effect has been assessed as <b>Neutral</b>.</p>						
<b>Inventory Gardens and Designed Landscapes</b>										
43	GDL00063	Blairquhan	Garden and Designed Landscape	<p>Blairquhan is situated in upland country, some 8km south east of the town of Maybole in Ayrshire. It lies to the west of the village of Straiton and the policies today extend from the woods along the B741 in the south, across the Water of Girvan, and include the parkland and afforested knowes on the south face of the valley up to the B7045. The house stands on the southern escarpment of the Vale of the Water of Girvan which meanders through a wide valley. The surrounding landscape is largely agricultural with some afforestation on the hills, particularly to the north east of Blairquhan. Good views to the north and east across the river valley are obtained from the house. The best views of the house and park are obtained from the north, with the views from the south obscured by woods along the roadside. Scienteuch Moor, Specs and Littleton Glen plantations are also areas of afforestation out with this boundary but important outlying features of the designed landscape. Finally, the north drive is an important feature of the design and follows the route of the river Girvan for several kilometres, crossing it by the William Burn bridge.</p> <p>Views to the south incorporate the upland areas containing the Carrick Forest with commercial forestry plantations a dominant feature on the slopes. The blade tips and hubs of the Proposed Development would be visible over ridge lines to the south, with greater visibility further north within the policies (see <b>Figure 10.16 Viewpoint 35: Blairquhan (from Kings Hill)</b>). A large area in the south of the policies have no visibility including the area around Blairquhan Castle and the other historic buildings, as well as a large part of the new extension to the north west.</p> <p>The magnitude of impact has been assessed as Minor Adverse on an asset of High value, with slight changes to setting with the introduction of blade tips and hubs within distant views to the south. These views may be impacted upon by localised vegetation and the changes would not impact on the ability to understand and appreciate the policies of the Garden and Designed Landscape. As such the significance of effect has been assessed as <b>Slight Adverse</b>.</p>	13	9	5.8km	Minor Adverse	<b>Slight Adverse</b>	<b>Figure 10.16 Viewpoint 35</b>
61	GDL00111	Craigengillan	Garden and Designed Landscape	<p>Craigengillan is located immediately to the southeast of Dalmellington village, with its northern boundary abutting the A713 Ayr to Castle Douglas road. The end of Ness Glen marks the southern boundary, whilst the south eastern boundary follows the minor public road from the A713 to Loch Doon. To the north of Craigengillan, between Patna and Dalmellington, the landscape is largely barren treeless moorland. To the east, south and southwest of Craigengillan, lie the heather and tree covered slopes of Auldraigoch Hill, Bryan's Heights and the Wee Hill of Glenmount. The landscape to the south becomes more rugged with rocky outcrops and the Ness Glen gorge, at the south end of the estate. Key</p>	13	13	7km	Negligible Adverse	<b>Slight Adverse</b>	<b>Figure 10.15 Viewpoint 34</b>

Heritage Asset No.	Ref Number	Heritage Asset Name	Designation	Setting	No of tips visible (Zone of Theoretical Visibility (ZTV))	No of hubs visible (ZTV)	Distance to nearest wind turbine location (kilometres (km))	Magnitude of impact	Significance of Effect	Viewpoint Figure (where applicable)
				<p>views related to the estate include the fine panoramic views of the surrounding hills from Craigengillan House and different parts of the gardens and landscape. There are also spectacular views of the rocky gorge through Ness Glen.</p> <p>The views to the south west are dominated by the surrounding hills and distant views beyond are only possible from the western summits. The blade tips and hubs of the Proposed Development are only visible from these higher areas along the western edge with no visibility from the low-lying valley areas, Craigengillan House and the other buildings within the policies (see <b>Figure 10.15 Viewpoint 34: Craigengillan GDL/Auchenroy Hill Cairn</b>). Some of the views from the higher ground would be impacted upon by localised vegetation related to commercial forestry plantations and pockets of woodland.</p> <p>The magnitude of impact has been assessed as Negligible Adverse on an asset of High value, with very minor changes to setting with the introduction of blade tips and hubs within distant views to the south west. These views may be impacted upon by localised vegetation and the changes would not impact on the ability to understand and appreciate the policies of the Garden and Designed Landscape. As such the significance of effect has been assessed as <b>Slight Adverse</b>.</p>						
87	GDL00047	Bargany	Garden and Designed Landscape	<p>Bargany House stands on the south bank of the Water of Girvan some 3km south west of the village of Dailly. The designed landscape is mainly set within the valley of the Water of Girvan. The surrounding landscape is rolling agricultural land, apart from the disused coalmine of Killochan in the north east. Views are gained from the south across the park whilst, from the north, the woodland borders the policies from the B741, the B7035, and from the railway which was laid through the woodlands in the early 19<sup>th</sup> century.</p> <p>To the west, the policies extend to Cairnhill and Lovestone Plantations and include Brunston golf course and Brunston Castle holiday resort in the east. The main entrance, the east drive, runs through Blackwood Plantation, crosses the old road and skirts the edge of the pond and thence through the woodland garden to the house. Key views are probably from the south over the parkland, along with internal views along the driveway, and views to and from Bargany House from various locations within the designed landscape.</p> <p>Current views to the east and south east are curtailed by the hills of Maxwellston Hill and Hadyard Hill to the south east, with The Pilot and other hills containing Carrick Forest in more distant views available to the east. The blade tips and hubs from the Proposed Development are not visible from most of the southern half of the policies due to the adjacent topography blocking distant views. The infrastructure is more visible from the northern half of the policies and mainly to the north of the Water of Girvan (see <b>Figure 10.17 Viewpoint 36: Bargany House GDL</b>). The majority of these views would be impacted upon by the dense woodland plantations along the northern edge that divide the parkland areas.</p> <p>The magnitude of impact has been assessed as Negligible Adverse on an asset of High value, with very minor changes to setting with the introduction of blade tips and hubs within distant views to the east and south east. These views would be impacted upon by localised vegetation and the changes would not impact on the ability to understand and appreciate the policies of the Garden and Designed Landscape. As such the significance of effect has been assessed as <b>Slight Adverse</b>.</p>	7	5	7.7km	Negligible Adverse	<b>Slight Adverse</b>	<b>Figure 10.17 Viewpoint 36</b>

Heritage Asset No.	Ref Number	Heritage Asset Name	Designation	Setting	No of tips visible (Zone of Theoretical Visibility (ZTV))	No of hubs visible (ZTV)	Distance to nearest wind turbine location (kilometres (km))	Magnitude of impact	Significance of Effect	Viewpoint Figure (where applicable)
<b>Conservation Area</b>										
15	CA88	Kirkmichael	Conservation Area	<p>The Conservation Area of Kirkmichael village is located on the northern banks of the Dyrock Burn and includes the properties and gardens to the immediate west of the Straiton Road and Patna Road junction through to the Parish Church at the eastern end of Patna Road, with some properties of Dalrymple Road to the north and Bolestyles Road to the south. The village is set within a low lying and undulating landscape and is a good example of a designed village from the late 18<sup>th</sup> to late 19<sup>th</sup> century. Key views relate to the views east and west along the main street, views to and from the church at the eastern end, and potential views towards the designed landscape around Kirkmichael House to the south and south west.</p> <p>Immediate views to the south from the many parts of the village are constrained by elements of the village infrastructure but distant views from the rear of properties and the edge of the burn would include the hills of Carrick Forest with other higher ground in between. The blade tips and hubs of the Proposed Development would be almost imperceptible due to the intervening infrastructure.</p> <p>The magnitude of impact has been assessed as No Change on an asset of High value, with no changes to setting with the introduction of blade tips and hubs in distant views from the village. As such the significance of effect has been assessed as <b>Neutral</b>.</p>	13	7	9.6km	No Change	<b>Neutral</b>	N/A
42	CA84	Crosshill	Conservation Area	<p>The conservation area is located on the southern bank of the Water of Girvan, with the majority of properties in the village on the east side of Dalhowan Street. The village is set within a vast agricultural landscape that extends in all directions as the ground rises away from the floodplain. Key views relate to internal views within the village and especially views north to south along Dalhowan Street and the weavers' cottages at the southern end of the village.</p> <p>Immediate views to the south east are dominated by the surrounding agricultural landscape and numerous farms in the surrounding area. More distant views would incorporate the upland areas that contain Carrick Forest. The blade tips and hubs of the Proposed Development would be visible from the rear of properties within the Conservation Area and these views may be impacted upon by localised vegetation.</p> <p>The magnitude of impact has been assessed as No Change on an asset of High value, with no changes to setting with the introduction of blade tips and hubs in distant views from the rear of the properties to the south east. As such the significance of effect has been assessed as <b>Neutral</b>.</p>	4	4	7.3km	No Change	<b>Neutral</b>	N/A
54	CA92	Straiton	Conservation Area	<p>The Conservation Area is located on the northern banks of the Water of Girvan, at the south east corner of the Blairquhan estate. The village is set on the edge of the upland landscape with commercial forestry plantations to the north east and south west, interspersed with upland agricultural fields. The key views related to the Conservation Area are internal views along Main Street and Dalmellington Road as well as views towards the surrounding landscape, especially along the Water of Girvan, towards the north west and the Blairquhan estate, and to the upland areas to the east and south.</p> <p>Immediate views to the south include views along the Water of Girvan with Bennan Hill beyond this dominating any distant views. The blade tips and hubs of the Proposed Development would be obstructed by the localised infrastructure within the village from most areas. The rear of properties on Main Street would have less obstructed views and</p>	6	5	6.1km	No Change	<b>Neutral</b>	N/A

Heritage Asset No.	Ref Number	Heritage Asset Name	Designation	Setting	No of tips visible (Zone of Theoretical Visibility (ZTV))	No of hubs visible (ZTV)	Distance to nearest wind turbine location (kilometres (km))	Magnitude of impact	Significance of Effect	Viewpoint Figure (where applicable)
				<p>the eastern edge of the Conservation Area has the greatest level of visibility around Traboyack House. Views from these areas would be significantly impacted upon by localised vegetation.</p> <p>The magnitude of impact has been assessed as No Change on an asset of High value, with no changes to setting with the introduction of blade tips and hubs in distant views to the south. As such the significance of effect has been assessed as <b>Neutral</b>.</p>						
115	CA80	Barr	Conservation Area	<p>The village of Barr is located within the River Stinchar Valley on the southern banks of the river and at the base of Kelton Hill. It is surrounded by an agricultural landscape with steep hills to the north and west. Key views relate to the views within the village and out with the village to the surrounding hills and along the valley.</p> <p>Immediate views to the north east incorporate the river valley with more distant views curtailed by Milton Hill and Daljedburgh Hill behind. The blade tips and hubs of the Proposed Development would only be visible from the northern most properties on Glenginnet Road, with the remainder of the conservation area with no visibility of the wind turbines.</p> <p>The magnitude of impact has been assessed as Negligible Adverse on an asset of High value, with very minor changes to setting with the introduction of blade tips and hubs within distant and peripheral views to the north east. These views may be impacted upon by localised vegetation and the changes would not impact on the ability to understand and appreciate the key elements of the conservation area. As such the significance of effect has been assessed as <b>Slight Adverse</b>.</p>	4	2	7.6km	Negligible Adverse	<b>Slight Adverse</b>	N/A
<b>Ayrshire Designed Landscape</b>										
32	West of Scotland Archaeology Service (WoSAS) Pin 53491	Kilhenzie	Ayrshire Designed Landscape	<p>The designed landscape is located to the south of Maybole and is focussed around Kilhenzie Hill with the historic buildings of Kilhenzie Castle and the farmstead on the lower ground to the south next to Kilhenzie Burn. Formal gardens remain surrounding the castle with the remainder of the former estate consisting of arable and pastoral agricultural fields with the modern farm infrastructure dominating the southern edge. Key views are probably to the east from the entrance to the estate toward the castle and potential views from the higher ground looking south over the castle gardens, although this view is now backdropped by the modern farm buildings.</p> <p>Immediate views south east are dominated by the agricultural landscape within which the designed landscape sits with distant views incorporating the hills containing Carrick Forest. The blade tips and hubs would be visible in these distant and peripheral views with the southern edge next to the burn having no visibility. Localised vegetation is likely to impact on some of these views.</p> <p>The magnitude of impact has been assessed as Negligible Adverse on an asset of Medium value, with very minor changes to setting with the introduction of blade tips and hubs within distant and peripheral views to the south east. These views may be impacted upon by localised vegetation and the changes would not impact on the ability to understand and appreciate the designed landscape. As such the significance of effect has been assessed as <b>Neutral</b>.</p>	10	5	9.9km	Negligible Adverse	<b>Neutral</b>	N/A

Heritage Asset No.	Ref Number	Heritage Asset Name	Designation	Setting	No of tips visible (Zone of Theoretical Visibility (ZTV))	No of hubs visible (ZTV)	Distance to nearest wind turbine location (kilometres (km))	Magnitude of impact	Significance of Effect	Viewpoint Figure (where applicable)
34	WoSAS Pin 53490	Kirkmichael House	Ayrshire Designed Landscape	<p>The designed landscape is located to the immediate south and south west of Kirkmichael village with the meandering Water of Girvan forming the southern boundary of the former estate. The landscape has been modified from any original designs with the modern farms of Merkland and Fairy Knowe utilising the landscape for agricultural purposes, and the northern edges being utilised for mining, a sewage works and a cemetery. The main elements of the designed landscape are now constrained to Kirkmichael House and the surrounding gardens and woodland, with key views are probably towards the house from the open areas to the west, as well as from the house looking south and west.</p> <p>The views to the south are dominated by the surrounding agricultural landscape with peripheral views of the upland areas containing Carrick Forest. The blade tips and hubs of the Proposed Development would be visible in distant and peripheral views to the south, with localised vegetation likely to significantly impact on these views from a number of areas within the designed landscape (see <b>Figure 10.13 Viewpoint 32: Kirkmichael House</b>).</p> <p>The magnitude of impact has been assessed as Negligible Adverse on an asset of Medium value, with very minor changes to setting with the introduction of blade tips and hubs within distant and peripheral views to the south. These views may be impacted upon by localised vegetation and the changes would not impact on the ability to understand and appreciate the remains of the designed landscape. As such the significance of effect has been assessed as <b>Neutral</b>.</p>	13	7	8.5km	Negligible Adverse	<b>Neutral</b>	<b>Figure 10.13 Viewpoint 32</b>
69	WoSAS Pin 53485	Dalquharran (Castle)	Ayrshire Designed Landscape	<p>The designed landscape is located to the north of Dailly with the meandering Water of Girvan forming the south eastern boundary of the estate. The southern half of the estate is a parkland and agricultural setting with the area to the north of the road and railway line mainly used for commercial forestry. Elements of the operational Hadyard Hill Windfarm are visible from within the designed landscape. Key views within the estate relate to reciprocal views between Dalquharran Castle (new) and Dalquharran Castle (old), as well as views towards the new castle from various areas within the landscape, and views to the east from the castle overlooking the man made ox bow lake of the Water of Girvan.</p> <p>The views to the south east are dominated by the surrounding agricultural landscape and distant views of the upland areas of Craiginmodie and Doughty Hill. The blade tips and hubs of the Proposed Development would be visible from within the designed landscape with greater visibility in the fields between the road and the railway line (see <b>Figure 10.14 Viewpoint 33: Dalquharran Castle</b>). Views from north of the railway line would be screened by the commercial forestry plantation in this area, and views from the main elements of the designed landscape are reduced by intervening topography, and would be further impacted upon by localised vegetation within the estate.</p> <p>The magnitude of impact has been assessed as Negligible Adverse on an asset of High value, with very minor changes to setting with the introduction of blade tips and hubs within distant and peripheral views to the south east. These views may be impacted upon by localised vegetation and the changes would not impact on the ability to understand and appreciate the remains of the designed landscape. As such the significance of effect has been assessed as <b>Slight Adverse</b>.</p>	12	7	7km	Negligible Adverse	<b>Slight Adverse</b>	<b>Figure 10.14 Viewpoint 33</b>
107	WoSAS Pin 53517	Balcletchie	Ayrshire Designed Landscape	<p>The designed landscape is located to the north west of the village of Barr in a predominantly upland landscape with Auchensoul Hill to the east and Benan Hill to the south. The area now contains large elements of the operational Hadyard Hill Windfarm.</p>	1	0	9.4km	No Change	<b>Neutral</b>	N/A

Heritage Asset No.	Ref Number	Heritage Asset Name	Designation	Setting	No of tips visible (Zone of Theoretical Visibility (ZTV))	No of hubs visible (ZTV)	Distance to nearest wind turbine location (kilometres (km))	Magnitude of impact	Significance of Effect	Viewpoint Figure (where applicable)
				<p>Views to the east and north east are dominated by the current windfarm infrastructure and the only part of the designed landscape to have visibility of the Proposed Development is the far northern edge, and any visibility is likely to be impeded by the localised wind turbines.</p> <p>The magnitude of impact has been assessed as No Change on an asset of Low value, with no changes to setting with the introduction of blade tips from a single wind turbine in distant views to the north east. As such the significance of effect has been assessed as <b>Neutral</b>.</p>						
<b>Undesignated Assets of National Significance</b>										
50	WoSAS Pin 7112	Auchenroy Hill Cairn	Undesignated Asset of National Significance	<p>The cairn is located on the summit of Auchenroy Hill with steep sided slopes to the north east through to the south west, overlooking the River Doon Valley to the north and east. The infrastructure of the operational Dersaloch Windfarm is visible to the west. Key views are probably down towards the river valley and the town of Dalmellington to the east as well as reciprocal views with Wee Cairn Hill Cairn (WoSAS Pin 7162) to the south east.</p> <p>The current views to the south west include the periphery of the operational Dersaloch Windfarm alongside the distant views of Carrick Forest and the commercial forestry plantations. The blade tips and hubs of the Proposed Development would be visible within these views and add to the array of wind turbines in the viewshed from west through to south west (see <b>Figure 10.15 Viewpoint 34: Craigengillan GDL/Auchenroy Hill Cairn</b>).</p> <p>The magnitude of impact has been assessed as Negligible Adverse on an asset of High value, with very minor changes to setting with the introduction of blade tips and hubs within distant and peripheral views to the south west. These changes would not impact on the ability to understand and appreciate the cairn and its setting over the river valley. As such the significance of effect has been assessed as <b>Slight Adverse</b>.</p>	13	13	9km	Negligible Adverse	<b>Slight Adverse</b>	<b>Figure 10.15 Viewpoint 34</b>
60	WoSAS Pin 7162	Wee Cairn Hill Cairn	Undesignated Asset of National Significance	<p>The cairn is located on the summit of Wee Cairn Hill, overlooking the village of Bellsbank to the east and the River Doon Valley. The cairn is set within an upland landscape with commercial forestry plantations to the west and south west and rough grazing elsewhere. Key views are probably down towards the river valley and the village of Bellsbank and town of Dalmellington to the east as well as reciprocal views with Auchenroy Hill Cairn (WoSAS Pin 7112) to the north west.</p> <p>The current views to the south west are dominated by the immediate topography with distant views of the hills containing the Carrick Forest and the commercial forestry plantations. The blade tips and hubs of the Proposed Development would be visible within these views, with localised vegetation likely to impact upon them.</p> <p>The magnitude of impact has been assessed as Negligible Adverse on an asset of High value, with very minor changes to setting with the introduction of blade tips and hubs within distant and peripheral views to the south west. These changes would not impact on the ability to understand and appreciate the cairn and its setting over the river valley. As such the significance of effect has been assessed as <b>Slight Adverse</b>.</p>	12	3	9.5km	Negligible Adverse	<b>Slight Adverse</b>	N/A
64	WoSAS Pin 5447	Captain's Bridge Earthwork	Undesignated Asset of National Significance	<p>The earthwork is located on the north bank of the Baldrennan Burn, at the edge of the road leading past the Dalquharran estate at the Captains Bridge. It is set within dense woodland that follows the line of the burn.</p>	1	0	7.4km	No Change	<b>Neutral</b>	N/A

Heritage Asset No.	Ref Number	Heritage Asset Name	Designation	Setting	No of tips visible (Zone of Theoretical Visibility (ZTV))	No of hubs visible (ZTV)	Distance to nearest wind turbine location (kilometres (km))	Magnitude of impact	Significance of Effect	Viewpoint Figure (where applicable)
				<p>The views to the south east include the bridge and the burn with any distant views curtailed by the woodland surrounding the burn. The blade tips from a single hub of the Proposed Development would be imperceptible with the intervening vegetation screening all views to the south east.</p> <p>The magnitude of impact has been assessed as No Change on an asset of High value, with no changes to setting with the introduction of blade tips and hubs in distant views to the south east that are obstructed by localised vegetation. As such the significance of effect has been assessed as <b>Neutral</b>.</p>						
65	WoSAS Pin 5453	Quarrel Hill Farmstead	Undesignated Asset of National Significance	<p>The farmstead is located on the south facing slopes of Quarrel Hill to the north west of Dailly and the Blairquharran estate. It is set at the edge of commercial forestry plantation to the south east, within a pastoral agricultural landscape. The operational Dersalloch Windfarm is visible in distant views to the west and the operational Hadyard Hill Windfarm is visible in distant views to the south. Key views are probably towards contemporary assets in the immediate vicinity with recorded Post-Medieval assets to the south west.</p> <p>The immediate views to the south east include the commercial forestry plantation of Glenmard Wood with the designed landscape around Blairquhan Castle, and the village of Dailly beyond this. Distant views include the upland areas containing Carrick Forest. The blade tips and hubs of the Proposed Development would be visible from the farmstead, with intervening localised vegetation likely to impact upon these views.</p> <p>The magnitude of impact has been assessed as Negligible Adverse on an asset of High value, with very minor changes to setting with the introduction of blade tips and hubs within distant and peripheral views to the south east. These changes would not impact on the ability to understand and appreciate the farmstead and its agricultural setting. As such the significance of effect has been assessed as <b>Slight Adverse</b>.</p>	7	5	9.3km	Negligible Adverse	<b>Slight Adverse</b>	N/A
76	WoSAS Pin 5445	Dalquharran Colliery Cropmarks	Undesignated Asset of National Significance	<p>The cropmarks are located to the north of Dailly within rough grazing to the west of Dalquharran Castle. They are set within the designed landscape of the estate with areas of woodland to the north, west and east, the Water of Girvan to the south. Key views probably incorporate the immediate setting within the valley floodplain, with the Water of Girvan likely to have been a key element in the location of the potential settlement during prehistory.</p> <p>The immediate views to the south east incorporate the Water of Grivan, the village of Dailly and the agricultural landscape surrounding the village. Distant views in this direction are dominated by Doughty Hill and the commercial forestry plantations on the slopes. The blade tips and hubs of the Proposed Development would be visible in distant views from the castle, over the western slopes of Doughty Hill, with the potential for intervening localised vegetation to impact on these views.</p> <p>The magnitude of impact has been assessed as Negligible Adverse on an asset of High value, with very minor changes to setting with the introduction of blade tips and hubs within distant and peripheral views to the south east. These changes would not impact on the ability to understand and appreciate the cropmarks and its setting within the river valley. As such the significance of effect has been assessed as <b>Slight Adverse</b>.</p>	5	1	8km	Negligible Adverse	<b>Slight Adverse</b>	N/A
85	WoSAS Pin 5450	Maxwellston Enclosure	Undesignated Asset of National Significance	<p>The enclosure is located within Brunston Castle golf course to the south west of the village of Dailly. It is set within the rough of the golf course within the low lying floodplain of the Water of Girvan and within a wider agricultural landscape. Key views probably incorporate</p>	3	1	8.5km	Negligible Adverse	<b>Slight Adverse</b>	N/A

Heritage Asset No.	Ref Number	Heritage Asset Name	Designation	Setting	No of tips visible (Zone of Theoretical Visibility (ZTV))	No of hubs visible (ZTV)	Distance to nearest wind turbine location (kilometres (km))	Magnitude of impact	Significance of Effect	Viewpoint Figure (where applicable)
				<p>the immediate setting within the valley floodplain, with the Water of Girvan likely to have been a key element in the location of the potential settlement during prehistory.</p> <p>The immediate views to the south east incorporate the agricultural fields and infrastructure surrounding the golf course with distant views dominated by Doughty Hill and the commercial forestry plantations on the slopes. The blade tips and hubs of the Proposed Development would be visible in distant views from the enclosure location, with the potential for intervening localised vegetation to impact on these views.</p> <p>The magnitude of impact has been assessed as Negligible Adverse on an asset of High value, with very minor changes to setting with the introduction of blade tips and hubs within distant and peripheral views to the south east. These changes would not impact on the ability to understand and appreciate the cropmarks and its setting within the river valley. As such the significance of effect has been assessed as <b>Slight Adverse</b>.</p>						
96	WoSAS Pin 11565	Delamford Huts	Undesignated Asset of National Significance	<p>The huts are located on a spur at the head of an unnamed burn and surrounded by the slopes of Delamford Hill to the east, Hadyard Hill to the north west and Corphin Hill to the south. Wind turbines from the operational Hadyard Hill Windfarm are only a few hundred metres away to the south.</p> <p>Current views to the east are dominated by the infrastructure of the operational Hadyard Hill Windfarm with views beyond incorporating the commercial forestry plantations of Carrick Forest. The blade tips of a single wind turbine from the Proposed Development would be almost imperceptible given the presence of wind turbines in the intervening landscape.</p> <p>The magnitude of impact has been assessed as No Change on an asset of High value, with no changes to setting with the introduction of blade tips from a single wind turbine in distant views to the east that are in the background of much closer wind turbines. As such the significance of effect has been assessed as <b>Neutral</b>.</p>	1	0	5.7km	No Change	<b>Neutral</b>	N/A
101	WoSAS Pin 11571	Pheelie Farmstead, Rig and Kiln	Undesignated Asset of National Significance	<p>The farmstead is located on the southern slopes of Pheelie to the north east of Penwhapple Reservoir. It is set within an upland landscape with commercial forestry plantations to the east and south, and surrounded by the wind turbines from the operational Hadyard Hill.</p> <p>Current views to the east are dominated by the infrastructure of the operational Hadyard Hill Windfarm and the adjacent commercial forestry plantations of Carrick Forest. The blade tips and hub from the Proposed Development would be almost imperceptible given the presence of wind turbines in the intervening landscape.</p> <p>The magnitude of impact has been assessed as No Change on an asset of High value, with no changes to setting with the introduction of blade tips and a hub in distant views to the east that are in the background of much closer wind turbines. As such the significance of effect has been assessed as <b>Neutral</b>.</p>	2	1	6.7km	No Change	<b>Neutral</b>	N/A
103	WoSAS Pin 11578	Milton Burn Cairn	Undesignated Asset of National Significance	<p>The cairn is located to the immediate west of the road through the upland areas linking Dailly and Barr. It is at the eastern edge of a commercial forestry plantation with more open moorland to the east. Wind turbines from the operational Hadyard Hill Windfarm are visible to the north and possibly to the north west, although the forestry plantation may provide screening. Key views are probably localised views of the surrounding hills and the upland landscape within which the cairn sits.</p>	2	0	5km	No Change	<b>Neutral</b>	N/A

Heritage Asset No.	Ref Number	Heritage Asset Name	Designation	Setting	No of tips visible (Zone of Theoretical Visibility (ZTV))	No of hubs visible (ZTV)	Distance to nearest wind turbine location (kilometres (km))	Magnitude of impact	Significance of Effect	Viewpoint Figure (where applicable)
				<p>Views to the east incorporate the commercial forestry plantation on Braker Hill with no distant views beyond. The blade tips from the Proposed Development would be visible over the hill but localised and intervening vegetation are likely to significantly impact on these views.</p> <p>The magnitude of impact has been assessed as No Change on an asset of High value, with no changes to setting with the introduction of blade tips in distant views to the east. As such the significance of effect has been assessed as <b>Neutral</b>.</p>						
106	WoSAS Pin 11602	Balcletchie Cairn	Undesignated Asset of National Significance	<p>The cairn is located to the north of Balcletchie farm and to the south west of Penwhapple Reservoir. It is set upon the summit of an unnamed hill at the edge of the operational Hadyard Hill Windfarm that extends in views from south west to north east. Key views are probably over the Penwhapple Burn to the north.</p> <p>Views to the east and north east incorporate the adjacent wind turbines with the commercial forestry plantations beyond. The blade tips and hub of the Proposed Development would be almost imperceptible in the background of the wind turbines already in operation in these views, with localised vegetation also likely to impact on them.</p> <p>The magnitude of impact has been assessed as No Change on an asset of High value, with no changes to setting with the introduction of blade tips and a hub in distant views to the east and in the context of two operational windfarms. As such the significance of effect has been assessed as <b>Neutral</b>.</p>	2	1	9.6km	No Change	<b>Neutral</b>	N/A
111	WoSAS Pin 11568	Glengennet Farmstead and Kiln	Undesignated Asset of National Significance	<p>The farmstead is located to the north of the village of Barr, at the base of the Mull of Miljoan and on the northern banks of the River Stinchar. The farmstead setting is an upland landscape dominated by the surrounding hills and the only distant views available are to the north east and south along the river valley. Key views are probably to and from other contemporary buildings, structures and farmsteads in the vicinity.</p> <p>Views to the north east incorporate the adjacent hills on either side of the river with distant views curtailed. The blade tips from the Proposed Development would be visible in distant views over the ridge lines of these hills with the potential for localised vegetation to impact on these views.</p> <p>The magnitude of impact has been assessed as Negligible Adverse on an asset of High value, with very minor changes to setting with the introduction of blade tips and hubs within distant and peripheral views to the north east. These changes would not impact on the ability to understand and appreciate the farmstead and its setting within the river valley. As such the significance of effect has been assessed as <b>Slight Adverse</b>.</p>	4	0	7.3km	Negligible Adverse	<b>Slight Adverse</b>	N/A
120	WoSAS Pin 11677	Cairn Hill Cairn	Undesignated Asset of National Significance	<p>The cairn is located on the summit of Cairn Hill, approximately 4.5 km to the south east of the village of Barr. It directly overlooks the Lead Mine Burn and the commercial forestry plantations of Carrick Forest, and is part of a series of summits that stretch from Eldrick Hill to the north east and Fell Hill to the immediate south west. The operational Dersalloch Windfarm is visible in distant and peripheral views to the north east, Hadyard Hill lies within a viewshed from north to north west and the Mark Hill Windfarm is to the south west. Key views are probably towards the open and extensive views west and north west towards the coast and the Isle of Arran and Mull of Kintyre.</p> <p>Current views to the north east are dominated by the other summits in this direction and the commercial forestry plantations to the immediate north west of the ridge line. The blade tips</p>	9	8	8.3km	Negligible Adverse	<b>Slight Adverse</b>	N/A

Heritage Asset No.	Ref Number	Heritage Asset Name	Designation	Setting	No of tips visible (Zone of Theoretical Visibility (ZTV))	No of hubs visible (ZTV)	Distance to nearest wind turbine location (kilometres (km))	Magnitude of impact	Significance of Effect	Viewpoint Figure (where applicable)
				<p>and hubs of the Proposed Development would be visible to the side of the Changue summit, impeding views of the operational Dersalloch Windfarm in the far background.</p> <p>The magnitude of impact has been assessed as Negligible Adverse on an asset of High value, with very minor changes to setting with the introduction of blade tips and hubs within distant views to the north east. These changes would not impact on the ability to understand and appreciate the cairn and its setting. As such the significance of effect has been assessed as <b>Slight Adverse</b>.</p>						
<b>Undesignated Assets of Regional Significance</b>										
45	WoSAS Pin 7140	Gass Building, Enclosure and Huts	Undesignated Asset of Regional Significance	<p>The assets are located on the north west facing slopes of Turgeny and Gass Hill near to the Lone Glen Burn, with high ground in all directions. They are set within an upland landscape with commercial forestry plantations to the north and south east, and the infrastructure from the operational Dersalloch Windfarm to the south west. Key views are probably to the north and the lower lying ground containing Lambdoughty Burn. There are also likely to be reciprocal views with the contemporary asset to the south west.</p> <p>Current views to the south west are dominated by the adjacent slopes and summits of Largs Hill, Black Hill and Dersalloch Hill, as well as the nearby wind turbines from the operational Dersalloch Windfarm. The blade tips and hubs from the Proposed Development would be visible in distant views in the background of the existing array of wind turbines.</p> <p>The magnitude of impact has been assessed as Negligible Adverse on an asset of Medium value, with very minor changes to setting with the introduction of blade tips and hubs within distant and peripheral views to the south, and in the background of the Dersalloch Windfarm infrastructure. These changes would not impact on the ability to understand and appreciate the remains. As such the significance of effect has been assessed as <b>Neutral</b>.</p>	10	4	7.7km	Negligible Adverse	<b>Neutral</b>	N/A
49	WoSAS Pin 7139	Gass Building and Huts	Undesignated Asset of Regional Significance	<p>The assets are located on the north west facing slopes of Turgeny and Gass Hill near to the Lone Glen Burn, with high ground in all directions. They are set within an upland landscape with commercial forestry plantations to the north and south east, and the infrastructure from the operational Dersalloch Windfarm to the south west. Key views are probably to the north and the lower lying ground containing Lambdoughty Burn. There are also likely to be reciprocal views with the contemporary asset to the north east.</p> <p>Current views to the south west are dominated by the adjacent slopes and summits of Largs Hill, Black Hill and Dersalloch Hill, as well as the nearby wind turbines from the operational Dersalloch Windfarm. The blade tips and hubs from the Proposed Development would be visible in distant views in the background of the existing array of wind turbines.</p> <p>The magnitude of impact has been assessed as Negligible Adverse on an asset of Medium value, with very minor changes to setting with the introduction of blade tips and hubs within distant and peripheral views to the south, and in the background of the Dersalloch Windfarm infrastructure. These changes would not impact on the ability to understand and appreciate the remains. As such the significance of effect has been assessed as <b>Neutral</b>.</p>	7	6	7.2km	Negligible Adverse	<b>Neutral</b>	N/A
59	WoSAS Pin 5449	Glenshalloch Wood Farmstead	Undesignated Asset of Regional Significance	<p>The former farmstead is located to the north west of Glenton farm on the south east facing slopes of Glenshalloch Hill. It is set within an upland agricultural landscape interspersed with commercial forestry and woodland. The infrastructure from the operational Hadyard Hill Windfarm is visible in distant views to the south. Key views are probably to and from the</p>	6	5	7.9km	Negligible Adverse	<b>Neutral</b>	N/A

Heritage Asset No.	Ref Number	Heritage Asset Name	Designation	Setting	No of tips visible (Zone of Theoretical Visibility (ZTV))	No of hubs visible (ZTV)	Distance to nearest wind turbine location (kilometres (km))	Magnitude of impact	Significance of Effect	Viewpoint Figure (where applicable)
				<p>contemporary former farmsteads of Glenton to the east and Newlands to the west along with views over the valley to the south and south east.</p> <p>The views to the south east include the lower lying areas of the Water of Girvan with the infrastructure of the railway line and road network in the foreground. Distant views incorporate the upland areas containing Carrick Forest and the commercial forestry plantations on the slopes. The blade tips and hubs of the Proposed Development would be visible in distant views to the south east. Intervening localised vegetation may impact on these views.</p> <p>The magnitude of impact has been assessed as Negligible Adverse on an asset of Medium value, with very minor changes to setting with the introduction of blade tips and hubs within distant and peripheral views to the south east. These changes would not impact on the ability to understand and appreciate the farmstead and links with nearby contemporary sites. As such the significance of effect has been assessed as <b>Neutral</b>.</p>						
86	WoSAS Pin 7196	Knockdon Cairn	Undesignated Asset of Regional Significance	<p>The cairn is located on the south west facing slopes of Knockdon Craig, with Knockdon farm to the west. The cairn is set within an upland landscape with the Hills of Knockdon Craig to the north east, Fence of Knockdon and Craig Dhu to the south and Pinverains to the south west. The infrastructure from the operational Dersalloch Windfarm is visible in views to the north. Key views are probably towards potential contemporary cairns to the west and into the Water of Girvan Valley.</p> <p>The views to the south west incorporate the hills containing the Tairlaw forestry plantation and Carrick Forest beyond. The blade tips and hubs of the Proposed Development would be visible from the cairn, with localised vegetation potentially impacting upon these views.</p> <p>The magnitude of impact has been assessed as Minor Adverse on an asset of Medium value, with slight changes to setting with the introduction of blade tips and hubs within distant and peripheral views to the south west. These changes would not impact on the ability to understand and appreciate the cairn. As such the significance of effect has been assessed as <b>Slight Adverse</b>.</p>	10	7	5.7km	Minor Adverse	<b>Slight Adverse</b>	N/A
98	WoSAS Pin 11580	Hughes Knolls, Little Lane Cairn	Undesignated Asset of Regional Significance	<p>The cairn is located near the summit of Hughes Knolls, to the north of Penwhapple Reservoir and is set within an upland landscape with open views towards lower lying areas to the north west. The infrastructure from the operational Hadyard Hill Windfarm is less than 1km to the south and east. Key views are probably across the low lying landscapes to the north west and to any contemporary cairns in the nearby vicinity.</p> <p>Current views to the east are dominated by the infrastructure of the operational Hadyard Hill Windfarm with views beyond incorporating the commercial forestry plantations of Carrick Forest. The blade tips and hubs from the Proposed Development would be in distant views in the background of the current operational wind turbines and views would potentially be impacted upon by the intervening landscape.</p> <p>The magnitude of impact has been assessed as Negligible Adverse on an asset of Medium value, with very minor changes to setting with the introduction of blade tips and hubs in the context of and in the background of an operational windfarm in distant views to the east. As such the significance of effect has been assessed as <b>Neutral</b>.</p>	7	4	8.6km	Negligible Adverse	<b>Neutral</b>	N/A

Heritage Asset No.	Ref Number	Heritage Asset Name	Designation	Setting	No of tips visible (Zone of Theoretical Visibility (ZTV))	No of hubs visible (ZTV)	Distance to nearest wind turbine location (kilometres (km))	Magnitude of impact	Significance of Effect	Viewpoint Figure (where applicable)
113	WoSAS Pin11632	Auchensoul Hill Cairn	Undesignated Asset of Regional Significance	<p>The cairn is located on the western edge of the summit of Auchensoul Hill, overlooking the village of Barr to the south east. The location affords extensive views to the west and north west that incorporate the Isle of Arran and the Mull of Kintyre. Views to the east and north east are curtailed by the higher topography of these areas. The wind turbines of the operational Hadyard Hill Windfarm are visible and prominent in views from the west through to the north. Key views relate to immediate views to the lower lying areas to the west and north west as well as distant and peripheral views of the coast and beyond.</p> <p>Current views to the north east include views of the River Stinchar Valley, with distant views beyond of the hills containing the Carrick Forest plantations. The blade tips and hubs of the Proposed Development would be visible in a narrow cluster to the north east.</p> <p>The magnitude of impact has been assessed as Negligible Adverse on an asset of Medium value, with very minor changes to setting with the introduction of blade tips and hubs in the context of and in the background of an operational windfarm in distant views to the east. As such the significance of effect has been assessed as <b>Slight Adverse</b>.</p>	13	8	8.7km	Negligible Adverse	<b>Slight Adverse</b>	N/A
