Heritage Assets within the Inner Study Area

Technical Appendix 11.1: Heritage Assets within the Inner Study Area

Asset No	Asset Name	Easting	Northing	HER No	Source	Description	Sensitivity
1	Cairnderry: Chambered Cairn (Neolithic)	231590	579941	MDG2665	HES; HER; Historic Map; Aerial Photography	<p>The HES designation describes Cairnderry as robbed around the edges, and now about 30 m in diameter, although somewhat spread and reduced in height from the original form. It is now little more than 1 m high. On the west and southeast sides large stones, that may have been part of a kerb or peristalith, protrude indicating an original diameter of about 24 m. Within the cairn are three rectangular chambers, set radially, made of large slabs. (source: HES 2017)</p> <p>Cairnderry Chambered Cairn is a Scheduled Monument (SM1007).</p> <p>The cairn is shown on the first edition Ordnance Survey map (1852) (Kirkcudbrightshire, sheet 20) with a 'Sheep Ree' comprising a two compartment square structure within a small enclosure and with radial walls extending to the north.</p> <p>The cairn is visible on OS Masterplan aerial photograph imagery (2019); but the former sheep ree is not visible. The ree is also not shown on the 2019 Ordnance Survey map.</p> <p>Field survey found the cairn to be as described by HES. In general, it is in good condition, although bracken, heather and several small self-seeded trees cover the site including the chambers. On the edge of the cairn, closest to the forest road, drainage work and vegetation clearance has disturbed some of the ground, for a length of about 20m or more where the road passes the cairn (CFA field survey June 2019).</p>	High
2	Sheil Hill: Buildings	231350	580690	MDG15137	HER; Historic Map; Aerial Photography	<p>The HER entry records that two unroofed buildings are depicted on the first edition Ordnance Survey map (1853) (Kirkcudbrightshire, sheet 12), but they are not shown on the 1977 edition 1:10,000 map. (source: RCAHMS 1999).</p> <p>The buildings (which are annotated 'Old Fences' on the first edition Ordnance Survey (1858) map are not depicted on the second edition (1896) or 1910 edition maps.</p> <p>OS Masterplan aerial photograph imagery (2019) shows that their location is now covered by commercial forestry.</p> <p>Not visited during field survey: the site lies within commercial forestry, well away from any proposed development (CFA field survey June 2019).</p>	Low
3	Sprit Strand: Sheepfold (period Unassigned)	231410	581610	MDG15127	HER; Canmore; Historic Map; Aerial Photography	<p>The HER contains no information.</p> <p>The Canmore entry records that one unroofed structure annotated 'Old Sheep Ree' is depicted on the first edition of the Ordnance Survey map (1853) (Kirkcudbrightshire, sheet 12), but it is not shown on the 1977 edition 1:10 000 map (source: RCAHMS 2000).</p> <p>The small enclosure, un-annotated, is shown on the Ordnance Survey second edition map (1896) and on the 1910 edition.</p> <p>OS Masterplan aerial photograph imagery (2019) shows that the recorded location is covered by commercial forestry.</p> <p>Not visited during field survey: the site lies within commercial forestry, well away from any proposed development (CFA field survey June 2019).</p>	Low
4	Lairds Knowe: Building (period Unassigned)	231200	582750	MDG15135	HER; Canmore; Historic Map; Aerial Photography	<p>The HER entry contains no information.</p> <p>The Canmore entry records that a single unroofed building annotated 'Ruin' is depicted on the first edition Ordnance Survey map (1853) (Kirkcudbrightshire, sheet 12), but it is not shown on the 1977 edition 1:10,000 map (source: RCAHMS 1999)</p> <p>The unroofed building is shown on the first edition (1853) (Ruin), second edition (1896) and 1909 edition maps.</p> <p>OS Masterplan aerial photograph imagery (2019) shows that the location of the building is now covered</p>	Low

Asset No	Asset Name	Easting	Northing	HER No	Source	Description	Sensitivity
						with commercial forestry. Not visited during field survey: the site lies within commercial forestry, well away from any proposed development (CFA field survey June 2019).	
5	Fleokit Knowe: Enclosure (period Unassigned), Structure (period Unassigned)	231470	582850	MDG15139	HER; Canmore; Historic Map; Aerial Photography	The HER entry contains no information. Canmore records that one unroofed structure and an enclosure are depicted on the first edition Ordnance Survey map (1853) (Kirkcudbrightshire, sheet 12), but they are not shown on the 1977 edition 1:10,000 map (source: RCAHMS 1999). The first edition map (1853) show an unroofed structure and a field to the north labelled 'Old fence'. The structure, but not the 'Old fence' is shown on the second edition map (1896). The structure is also shown as an unroofed rectangular structure on the 1909 map (Ayrshire Sheet LXVIII.NW) but the enclosure is not depicted. Field survey found that the site has been destroyed through quarrying and nothing visible during site visit (CFA field survey June 2019).	Low
6	Brecklach Hill: Enclosure (period Unassigned), Wall (period Unassigned)	232530	583990	MDG15131	HER; Canmore; Historic Map; Aerial Photography	The HER entry contains no information. The Canmore entry records that two small enclosures and a length of wall are depicted on the first edition Ordnance Survey map (1853) (Kirkcudbrightshire, sheet 12), but they are not shown on the 1977 edition 1:10,000 map (source: RCAHMS 1999). OS Masterplan aerial photograph imagery (2019) shows the location as being in an area of recently replanted commercial forestry. Not visited during field survey: the site lies within commercial forestry, well away from any proposed development (CFA field survey June 2019).	Low
7	Ashiefane: Building(s) (period Unassigned), Wall (period Unassigned)	232180	584440	MDG15129	HER; Canmore; Historic Map; Aerial Photography	The HER entry contains no information. The Canmore entry records that two unroofed buildings and a length of wall annotated 'Old Fence' are depicted on the first edition Ordnance Survey map (1853) (Kirkcudbrightshire, sheet 12) but are not shown on the 1977 1:10, 000 map (source: RCAHMS 1999). A single unroofed structure and a pecked line indicating the 'Old fence' alignment is depicted on the second edition map (1896) (Kirkcudbrightshire Sheet XV.NW) and on the 1909 edition. OS Masterplan aerial photograph imagery (2019) shows the location as now covered by commercial forestry. Not visited during field survey: the site lies within commercial forestry, well away from any proposed development (CFA field survey June 2019).	Low
8	Fardin: Farmstead; Sheepfolds; Head-dyke	233026	586511	42115	HER; Historic Map; Aerial Photography	The HER entry records that a farmstead comprising one unroofed building, which is annotated Ruin and has an attached enclosure, one partially roofed long building and one roofed building, and a series of five enclosures, which are annotated as Sheep Rees, are depicted on the first edition Ordnance Survey map (1858) (Ayrshire, sheet lxiii). One roofed building and one enclosure are shown on the 1977 edition 1:10,000 map (source: RCAHMS 2000). The farmstead is named as 'Fardin' on the Ordnance Survey first edition map. On the second edition map (1896) it is shown (still named 'Fardin') as a different arrangement of buildings and modified enclosures. On the 1909 edition the arrangement is as shown on the 1896 edition. Depicted on Roy's 'Military Map of Scotland' (1747-55) consisting of four structures and a rectangular enclosure surrounded by cultivated fields. The sheep ree enclosures, as laid out on the 1896 and 1909 edition Ordnance Survey maps, is visible as	Low

Asset No	Asset Name	Easting	Northing	HER No	Source	Description	Sensitivity
						<p>dilapidated walls on OS Masterplan aerial photograph imagery (2019); but the former farmhouse is not visible.</p> <p>Field survey found poorly preserved remains of the drystone walled sheep ree survive. The northernmost, two compartment structure, 10m x 10m x 1.3m high, split into two compartments is the best preserved, while the footings of other structures can be partially seen, covered in vegetation. No remains of the farm buildings depicted on the historic Ordnance Survey maps were found; although there are some concrete remains in this area. A large mound of stones, 20 m x 10 m x 3 m high lies to the west of the site, which appears to be relatively recent in origin, may be the demolished remains of these buildings (CFA field survey June 2019).</p>	
9	Fardin: Field; Sheepfold	233400	587000	42116	HER; Historic Map; Aerial Photography	<p>The HER entry records that an enclosure or field, with a Sheep Ree lying inside it, is depicted on the first edition Ordnance Survey map (1858) (Ayrshire, Sheet LXIII,) and on subsequent editions. The sheepfold is shown on the 1977 1:10,000 map (source: RCAHMS 2000).</p> <p>The 'sheep ree' and amorphously shaped enclosure are shown within a larger parallelogram shaped field on the second edition (1896) and 1909 edition maps, but are not annotated.</p> <p>The enclosures and sheep ree cannot be clearly made out on the OS Masterplan aerial photograph imagery (2019), but a small square enclosure is shown on the 2019 Ordnance Survey map, within forestry at the approximate location of the former sheep ree.</p> <p>Not visited during field survey: the site lies within commercial forestry, well away from any proposed development (CFA field survey June 2019).</p>	Low
10	Polmaddie Burn: Sheep Ree	232414	589664	n/a	Historic Maps: Aerial Photography	<p>A 'Sheep Ree' is depicted on the first Edition Ordnance Survey map (1858) (Ayrshire, Sheet LXIII,) as a two-compartment enclosure on a north west-south east alignment with walls extending from the southeast end. The sheep ree is marked but not annotated in the same configuration on the second edition map. On the 1909 edition map a new four compartment 'Sheepfold' is marked in the same approximate location but in a different orientation. It has walls extending from the corners at its south eastern end.</p> <p>A square enclosure is marked on the 2019 Ordnance Survey map at a slightly different location (further to the south east).</p> <p>OS Masterplan aerial photograph imagery (2019) shows the square enclosure shown on the 2019 map as being closely enclosed by commercial forestry.</p> <p>Not visited during field survey: the site lies within commercial forestry, well away from any proposed development (CFA field survey June 2019).</p>	Low
11	Ferter: Sheepfold	230453	588617	n/a	Historic Map; Aerial Photography	<p>A 'Sheep Ree' depicted on first Edition OS Map (Ayrshire, Sheet LXIII, 1858) as a three-compartment structure with radial arms to the west and south. It is also shown on the second edition map (1896) (Ayrshire LXIII.SW) and 1909 edition but is not annotated.</p> <p>A sheepfold in a different configuration to that shown on the first, second and 1909 edition maps is shown on the 2019 Ordnance Survey map.</p> <p>OS Masterplan aerial photograph imagery (2019) shows that standing walls of the sheepfold marked on the 2019 map is closely enclosed within commercial forestry.</p> <p>Not visited during field survey: the site lies within commercial forestry, well away from any proposed development (CFA field survey June 2019).</p>	Low
12	Cairn Hill, Barr: Cairn	230725	590755	11677	HER; Historic Map; Aerial Photography	<p>The HER entry records that a cairn, 18m in diameter, varying in height from 0.5 m on the east to 1 m on the north and 2 m on the west. In the centre is a large oval excavation 7 m by 4 m by 1.3 m deep. Smith (1895) mentions two small cairns on the top of the main cairn but these were presumably removed when the excavation was made, although there is a recent cairn 1.5 m in diameter and in height, on the south perimeter (source: OS 1955).</p> <p>Later survey by RCAHMS recorded that the cairn is 17m in diameter and 1.6m in height (source: RCAHMS</p>	High

Asset No	Asset Name	Easting	Northing	HER No	Source	Description	Sensitivity
						1983). The cairn is marked on first edition Ordnance Survey map (1856) (Ayrshire, Sheet LXII). OS Masterplan aerial photograph imagery (2019) clearly shows the cairn on the grassy summit of Cairn Hill. Field survey found the cairn as described by previous surveyors. The cairn sits at the northern edge of a flat ridge which directs the view northwards and obscures views to the south; there are good views to the Ailsa Craig and Kintyre (CFA field survey June 2019).	
13	Water of Gregg: Enclosure	230150	590810	42378	HER; Historic Map; Aerial Photography	The HER entry records that a two-compartment enclosure is depicted on the first Edition Ordnance Survey map (1858) (Ayrshire, Sheet LXIII), but it is not shown on the 1910 (source: RCAHMS 2000). The enclosure is not shown on the 1910 edition Ordnance Survey map. OS Masterplan aerial photograph imagery (2019) reveals that the location of the enclosure is now covered by commercial forestry. No enclosure is marked at this location on the 2019 Ordnance Survey map. Not visited during field survey: the site lies within commercial forestry, well away from any proposed development (CFA field survey June 2019).	Low
14	Mid Hill: Sheep Ree; Building; Enclosure; Sheepfold	227950	589700	17208	HER; Historic Map; Aerial Photography	The HER entry records that an unroofed building is indicated on the current OS 1:10,000 (1977) map. Identified on the first Edition Map (1858) (Ayrshire, Sheet LXII) as a ruined building used as a 'Sheep Ree' on Mid Hill (Source: WoSAS 1999). One unroofed structure, which is annotated Sheep Ree (in ruins), is depicted on the first Edition of the OS 6-inch map (Ayrshire, Sheet LXIII, 1858) and on the current Edition of the OS 1:10000 map (1978) (Source: RCAHMS 2000). The Ordnance Survey first edition map (1853) shows a small rectangular unroofed enclosure aligned north west-south east, annotated as 'Sheep Ree' (in ruins). The Ordnance Survey second edition map (1897) (Ayrshire Sheet LXII.NE) and 3rd edition map (1910) (Ayrshire Sheet LXII.NE) show a small rectangular building but without annotation. The sheep ree does not appear the OS Masterplan aerial photograph imagery (2019). Field Survey recorded the poorly preserved remains of rectangular drystone sheep ree, 10m x 6m x 0.5m in extent (CFA field survey June 2019).	Low
15	Mid Hill: Sheep Ree	227469	589634	68161	HER; Historic Map; Aerial Photography	The HER entry contains no information. A circular enclosure with radial arms to the north west and west is shown on the second edition Ordnance Survey map (1897) (Ayrshire Sheet LXII.NE). A square structure and enclosure are shown on the western part of the original enclosure on the 1909 Ordnance Survey map (Ayrshire sheet LXII.NE). A circular enclosure with two attached rectangular enclosures on the southwest side is marked on the 2019 Ordnance. OS Masterplan aerial photograph imagery (2019) shows that dilapidated remains of the enclosures with what appear to be radial arms to the north west and south west survive preserved between commercial forestry and the Muck Water watercourse. Not visited during field survey: the site lies within commercial forestry, well away from any proposed development (CFA field survey June 2019).	Low
16	Greensides / Muck Water: Shieling	226757	588880	67319	HER; Historic Map; Aerial Photography	The HER entry records that a structure, annotated as an Old Shieling, is shown on 2014 Ordnance Survey maps (source: WoSAS 2014). The structure is not recorded on the first edition Ordnance Survey map. The second edition Ordnance Survey map (1897) (Ayrshire Sheet LXII.SE) shows an un-annotated circular enclosure at the same	Low

						<p>approximate location with radial arms extending to the north east and north west. The 1910 Ordnance survey map (Ayrshire Sheet LXII.SE) edition also depicts the enclosure.</p> <p>OS Masterplan aerial photograph imagery (2019) shows a circular enclosure with radial arm extending to the north east, preserved within a small clearing within commercial forestry.</p> <p>Not visited during field survey: the site lies within commercial forestry, well away from any proposed development (CFA field survey June 2019).</p>	
17	Little Shalloch: Farmstead	226170	588160	17203	HER; Historic Map; Aerial Photography	<p>The HER entry records that this site includes structural remains and field systems of several different phases. It is mentioned on Blaeu's map (1654) and was apparently in use until last century. The structural remains take a variety of forms, building, enclosures and a kiln, while the field systems survive quite extensively within a head dyke. It appears to be reasonably well-preserved, although it is possible that the latest farmhouse has destroyed earlier remains (source: L. Macinnes of Historic Buildings and Monuments - 1989).</p> <p>The farmstead is depicted as three structures with associated enclosures and an area of cultivation to the south, annotated as 'Little Shalloch', on Gen W Roy's 'Military Survey of Scotland' map (1747-55).</p> <p>The farmstead is shown as a rectangular roofed structure on the first Edition Ordnance Survey map (1858) (Ayrshire, Sheet LXII,) with associated garden enclosure on its north west side and possible unroofed buildings or enclosures on the southeast and north east sides. The second edition map (1897) shows a single roofed buildings and the attached enclosure to the north west with a large field extending to the north of the farmhouse.</p> <p>Field survey found the unoccupied farmstead to be a well-preserved stone built and slate roofed building with attached small square unroofed extension on western gable. It stands within an area of improved land defined by a drystone wall that corresponds to the field shown on the second edition map (CFA field survey June 2019).</p>	Low
18	Little Shalloch: Sheep Ree; Building; Enclosure	226660	587780	17204	HER; Historic Map; Aerial Photography	<p>The HER entry describes a building/enclosure indicated on the 1999 Ordnance Survey 1:10,000 map as an unroofed building and enclosure, near the farmstead of 'Little Shalloch' (source: WoSAS 1999).</p> <p>A roughly D-shaped, three compartment 'Sheep Ree' is depicted on the first edition Ordnance Survey map (1858) (Ayrshire, Sheet LXII). It is shown in the same arrangement but not annotated on subsequent second edition (1897) and 1910 edition maps.</p> <p>OS Masterplan aerial photograph imagery (2019) clearly shows the well-preserved remains of the sheep ree, largely as shown on the Ordnance Survey first edition map. The remains are preserved within an open clearing within the commercial forestry.</p> <p>Not visited during field survey: the site lies within commercial forestry, well away from any proposed development (CFA field survey June 2019).</p>	Low
19	Hay Ree / Little Shalloch: Building; Enclosure	226740	587330	17205	HER; Historic Map; Aerial Photography	<p>The HER entry records a hay ree identified on both the 1999 Ordnance Survey 1:10,000 and the first Edition (Ayrshire 62) maps as an unroofed building and enclosure annotated as a 'Hay Ree' (source: WoSAS 1999).</p> <p>A roughly D-shaped two compartment 'Hay Ree' is depicted on the first Edition Ordnance Survey map (1858) (Ayrshire, Sheet LXII). It is also shown, as a single compartment enclosure, not annotated on subsequent second edition (1897) and 1910 edition maps.</p> <p>OS Masterplan aerial photograph imagery (2019) shows that dilapidated, partial remains of the hay ree survive, preserved in an open clearing within the commercial forestry.</p> <p>Not visited during field survey: the site lies within commercial forestry, well away from any proposed development (CFA field survey June 2019).</p>	Low
