1. MARINE ACTIVITIES

1.1. Summary:

Mariners are advised that the vessel '**Njord R**' is due to commence dredging operations within East Anglia THREE export cable corridor. The works are due to commence Circa the **29/03/2025**. Operations will be conducted by NKT/Rohde Nielsen and the working area will be within the export cable corridor as per section [2.1](#).

During the period of export cable corridor dredging works, all vessels are requested to keep a 500m safety distance from the Njord R.

1.2. Activity Description:

The objective of the scope is to carry out dredging in areas where there are large sandwaves that could impact cable burial operations. The extent of the dredge areas varies for each location. The lengths of dredge sections range from between 5m and 50m and the width of the sections is ~20m.

The dredge areas are located between KP41 and KPI23 of the export cable route as per section [2.1](#).

The disposal of dredge material will be within the designated disposal area (HU212) and will be contained within the boundaries of the EA THREE DCO limits. HU212 extends from ~KP56 to ~KPI40 along the export cable route as per section [2.2](#).

1.3. Program Schedule:

The Njord R is expected to mobilise in the port of Grenaa and commence operations from the **29/03/2025**.

It is currently anticipated that, weather permitting, works will be carried out on a continuous basis (i.e., 24 hours working, seven days a week) unless notified otherwise.

The planned duration for these works is approximately 18 days, weather dependant. Completion of works will be notified by closure of this notice to mariners.

During operations, the '**Njord R**' will have restricted manoeuvrability as defined under COLREGs (International Regulations for Preventing Collisions at Sea, 1972). They will display the appropriate day shapes and lights and will transmit an Automatic Identification System (AIS) message.
