1. MARINE ACTIVITIES

1.1. Summary:

Mariners are advised that NKT will conduct route clearance and inspection operations along the East Anglia 3 export cable corridor in the North Sea, utilising the vessel 'Trym'. Vessel is currently operating within the East Anglia THREE Export Cable Corridor Route.

During the period of operations, all vessels are requested to keep a minimum separation distance of 1000m from the vessel 'Trym' and pass at a reduced speed. Fishers are requested not to deploy gear within the 500m fishing gear exclusion zone, also on the chart below.

1.2. Activity Description:

Route clearance of out of service cables, boulders and debris will be performed between KP4 – KP148 of the EA3 Export cable route, as per section [2.1](#) and boulder and debris clearance at multiple location within the boundary of the East Anglia THREE Offshore windfarm array as detailed in section [2.2](#) of this document. Inspection operations will be performed at third-party asset locations.

Mattress placement at third-party asset crossing locations will be performed at 7 locations between KP25 – KP42 of the EA3 Export cable route, as per section [2.1](#)

A Pre-Lay Grapnel Run will be performed between KP4 – KP148 of the EA3 Export cable route, as per section [2.1](#)

1.3. Program Schedule:

Vessel is currently operating withing the East Anglia THREE Export Cable Corridor Route.

During operations, the 'Trym' will be restricted in its ability to manoeuvre as defined under COLREGs (International Regulations for Preventing Collisions at Sea, 1972). They will display the appropriate day shapes and lights and will transmit an Automatic Identification System (AIS) message.

It is currently anticipated that, weather permitting, offshore works will be conducted on a continuous basis (i.e., 24-hour working, seven days a week).

Completion of operations will be notified by future notice to mariners.

Vessel 'Trym' will monitor VHF Channel 16 and VHF DSC Channel 70 continuously throughout the operation.
