## Heritage Assets within the Inner Study Area (Figure 11.1)

Asset No	Asset Name	Easting	Northing	HER No	Source	Description	Sensitivity
1	Wood Cairn, Eldrig Fell: Cairn	225230	568710	MDG2161 SM1953	HES; HER; Historic Map; Aerial Photography; Field Survey	<p>The HES designation entry records that the monument comprises the remains of a cairn, a prehistoric burial mound dating from the Neolithic or early Bronze Age period (c.4000-1500BC). The cairn stands at around 225 m OD on the summit of Eldrig Fell where it commands extensive views over the surrounding landscape. It is roughly circular in shape, approximately 18 m in diameter, and stands around 2 m high. Despite the construction of modern marker cairns on its surface, the body of the cairn survives comparatively intact and it therefore has the potential to retain any original funerary or ritual deposits undisturbed. (source: HES 2001)</p> <p>Field survey found the cairn to be as described by HES. One large marker cairn has been constructed on top of the cairn, with at least five smaller marker cairns surrounding it - this appears to have been done some time ago as moss covers each of these areas of disturbance (CFA field survey June 2019).</p>	High
2	Eldrig Fell: Enclosure	225303	569026	MDG2162	HER; Historic Map; Aerial Photography; Field Survey	<p>The HER entry records that an oval earthwork enclosure can be seen on oblique aerial photographs taken by RCAHMS in 1982.</p> <p>High resolution aerial photograph (OS Masterplan imagery 2019) shows the enclosure but it does not appear on any historic or modern Ordnance Survey maps.</p> <p>Field survey recorded a roughly oval enclosure 25 m east to west x 15 m north to south defined by turf and stone bank up to 0.5 m high and spread to around 3 m in width. The entrance, which is 2 m wide, is oriented to the south east. Its proximity to the early phase of the field system at High Eldrig and a separate field (30) suggest that it may be a stock enclosure associated with the earlier phase farmstead at High Eldrig. Alternatively, it could be the remains of a prehistoric enclosure (CFA field survey June 2019).</p>	Medium
3	Eldrig Fell: Cairnfield	225400	568700	MDG2170	HER; Historic Map; Aerial Photography	<p>The HER entry records that a group of 13 or 14 small cairns lies in a slight hollow near the centre of the eastern slope and c.270 m east south east of the summit of Eldrig Fell. (source: RCAHMS 1912)</p> <p>Later survey by the Ordnance Survey recorded a group of about a dozen clearance cairns, the largest of which is 5.0 m in diameter and 0.5 m high. There is no trace of any field walls or lynchets in the area. (source: OS 1976)</p> <p>Several cairns are visible on high resolution aerial photograph (OS Masterplan imagery 2019).</p> <p>Not visited during field survey as the location lies well away from any development area (CFA field survey June 2019).</p>	Medium
4	Monandie: Farmstead, Field System, Corn Drying Kiln	224450	569690	MDG2177	HER; Historic Map; Aerial Photography; Field Survey	<p>The HER entry records that this farmstead comprises two buildings set side by side at the core of a small field-system. There is a kiln 30 m to the east south east. The fields are mainly enclosed by low stone walls and contain well-defined cultivation ridges. The site is covered in dense bracken. (source: RCAHMS 1989).</p> <p>A second entry lists four unroofed buildings, one enclosure, a Corn Kiln, an unroofed structure, which is annotated Hay Ree, a Sheep Ree and a field-system, which is partly marked by pecked lines, as depicted on the 1st edition Ordnance Survey map (Wigtownshire 1848, sheet 7). One enclosure of two compartments and the fragmentary remains of the field-system are shown on the 1991 edition Ordnance Survey 1:10,000 map. (source: RCAHMS 1999).</p> <p>'Monandie' is shown as 'In Ruins' on the 2nd edition Ordnance Survey map (1896) but the large Sheep Ree south of the farmstead has been remodelled and enlarged.</p> <p>A farmstead, shown as three buildings surrounded by cultivation and annotated as 'Munundee' is depicted on Roy's map (1747-55) and a settlement annotated 'Monenduy' is depicted on Blaeu's Atlas of Scotland (1654) to the west of Eldrig Loch (L.Erlug ganair).</p>	High

Asset No	Asset Name	Easting	Northing	HER No	Source	Description	Sensitivity
						<p>High resolution aerial photograph (OS Masterplan imagery 2019) clearly shows the remains of the farmstead and a patchwork of irregularly shaped fields containing reverse S-shaped rig and furrow. The later (mid-late 19th century) drystone walled Sheep Ree is visible overlying an earlier cultivated field stands a little apart for and to the south of the main field system.</p> <p>Field survey recorded the following components of the farmstead:</p> <ul style="list-style-type: none"> <li>(4a) (224456, 569689) - Main farm buildings: at least two drystone built structures visible in a cluster with possible remains of other structures but badly obscured by bracken. The larger structure is 10 m x 4 m in extent with a wall surviving to 1.5 m in width and up to 1 m in height. The entrance is on the north side. The second structure is more denuded surviving to 7 m x 5 m in extent and the walls are more tumbled surviving to 0.7 m in height.</li> <li>(4b) (224488, 569679) - Corn drying kiln: of drystone construction and well preserved. 5 m in diameter with internal diameter of 1.5 m and up to 1.5 m in height, with a possible flue in the north side. The interior is well preserved, up to 0.5 m deep and has been used as a dump for bottles and other farm rubbish; perhaps in the early part of the 20th century.</li> <li>(4c) (224490, 569717) - two oval cairns 4 m x 2 m x 1 m high and a circular cairn 3 m in diameter and 1.2 m high.</li> <li>(4d) (224374, 569657) - at least four clearance cairns within the south western field.</li> <li>(4e) (224490, 569717) - At least three large clearance cairns; two measuring 4 m x 2 m x 1 m high, one larger and circular, measuring 3 m in diameter and 1.2 m high.</li> <li>(4f) (224490, 569717) - possible spring: oval feature defined by stone bank around the edge. Its eastern edge is formed by a cairn like feature, 7 m in length 3 m in width and up to 0.8 m high, sloping down to a sub-oval pond defined by low lying stone bank around rest of its diameter,</li> <li>(4g) (224536, 569373) - linear field stone and turf field bank 0.2 m high and 1 m wide.</li> <li>(4h) (224449, 569432) - Sheep Ree: well preserved drystone walled sheepfold with four compartments and three larger enclosures, 50 m x 33 m x 1.4 m high.</li> </ul> <p>Field survey also recorded that field boundary walls of drystone construction survive to varying degrees around the circuit of the field system; up to 0.3 m high and 1 m wide in places (CFA field Survey June 2019).</p>	
5	High Eldrig: Chambered Cairn (?); Enclosure (?)	224430	569520	MDG2178	HER; Field Survey	<p>The HER entry records that what is probably a chambered cairn is situated 80 m north north west of the sheepfold to the west north west of High Eldrig. The cairn measures 23.5 m by 19m, but the body of the mound has been severely robbed and little more than a bank of cairn material 0.6 m high now survives. At the east north east end, three slabs of what is probably a chamber protrude from the bank, two set side by side on the south and the other some 1.75 m to the north. (source: RCAHMS 1989)</p> <p>Field survey recorded an oval enclosure 18 m by 21 m defined by a stone and earth bank up to 0.4 m high and 1.5 m wide. No evidence of cairn material was found within the bank and the supposed chamber could not be seen. (CFA field survey June 2019).</p>	Medium
6	High Eldrig: Cairn	224402	569428	MDG2179	HER; Field Survey	<p>The HER entry records that this cairn measures 15 m in diameter by 1 m high. It is probably a burial cairn and there is no reason to suggest that it is simply the result of stone clearance from the adjacent fields of rig-and-furrow cultivation. (source: RCAHMS 1989)</p> <p>Field survey recorded a sub-circular cairn 17 m in diameter and up to 2 m high. There is slight evidence of a kerb running around its base, with large stones protruding from the turf. The rest of the body of the cairn is constructed of small stones that have been robbed from the southern central portion of the monument. The surrounding rig-and-furrow avoids the cairn (CFA field survey June 2019).</p>	High
7	High Eldrig: Cultivation Remains, Farmstead	224950	569150	MDG2180	HER; Historic Map; Aerial Photography; Field Survey	<p>The HER entry records High Eldrick farmstead but provides no details.</p> <p>A farmstead annotated as 'High Eldrick' is shown on Gen W Roy's Military Survey of Scotland map (1747-55) as two buildings and two enclosures surrounded by cultivation. 'Low Eldrick' is also depicted on Roy's map as two buildings and one enclosure surrounded by cultivation.</p> <p>On the 1st Edition Ordnance Survey map (Wigtownshire, Sheet 7, 1848) 'High Eldrig' consists of five roofed buildings, a 'Corn Kiln' and a patchwork of enclosed fields. On subsequent Ordnance Survey maps, the farmstead changes little,</p>	High

Asset No	Asset Name	Easting	Northing	HER No	Source	Description	Sensitivity
						<p>except that the surrounding fields have been consolidated into larger field systems (only three are depicted on the 1909 edition map (Wigtownshire Sheet VII.SE).</p> <p>High resolution aerial photograph (OS Masterplan imagery 2019) shows the layout of the farm as it is shown on the 1st Edition Ordnance Survey map. It also shows that there is an underlying, earlier field layout, in the fields to the south west of the present-day farmstead. As many as 14 irregularly shaped fields are visible, many containing reverse S-shaped rig and furrow and 'lazy beds'. Faint traces of banks to the north east of the farmstead suggest that the earlier field pattern may have extended over that area also; the outlines of these fields being marked as pecked lines on the 1st Edition Ordnance Survey map. The land to the north west of the farmstead does not appear to have as extensively cultivated. Traces of fields marked with pecked lines on the 1st Edition Ordnance Survey map can be seen on the aerial photography but there is no obvious evidence of cultivation remains in these areas.</p> <p>Field survey recorded High Eldrig various remains at High Eldrig:</p> <ul style="list-style-type: none"> <li>(7a) (224996, 569148) - Farm house: a brick-built building clad in corrugated iron and still roofed; with wooden window frames and three chimney stacks. The current farmer indicated that the house had been abandoned in the 1970's.</li> <li>(7b) (224893, 569184) - Corn drying kiln: 5 m in diameter and up to 1.2 m high. The top of the kiln is flat, and it may have been deliberately infilled</li> <li>(7c) (224990, 569176) - Well preserved, stone-built outbuilding with a slate roof and three interior rooms used for sheep rearing. Depicted on 1st edition Ordnance Survey map and could possibly have been the original farmhouse.</li> <li>(7d) (224982, 569186) - Unroofed structure: both gable ends survive but walls are much reduced - depicted as roofed structure on 1st edition Ordnance Survey map.</li> <li>(7e) (224990, 569187) - Badly preserved unroofed structure with only south gable standing.</li> <li>(7f) (225043, 569163) - A small quarry located west of the farm buildings; measuring 10 m by 4 m in extent, cut into the hill slope.</li> <li>(7g) (224932, 569173) - Two possible cairns: turf a grass covered oval mounds 3 m x 1.5 m x 0.5 m high.</li> <li>(7h) (224909, 569208) - Clearance cairn, 10 m x 8 m x 0.5 m high, with early 20th century household rubbish including china and glass bottles, on edge of cultivated area.</li> <li>(7i) (224850, 569148) - Two clearance cairns on edge of cultivated field and contour 4 m x 4 m x 1.5 m high and 3 m x 1 m x 5 m high</li> <li>(7j) (224877, 569142) - Sub-rectangular enclosure 12 m x 9 m x 0.5 m high defined by turf bank, not depicted on any Ordnance Survey maps.</li> <li>(7k) (224873, 569056) - Seven possible cairns, oval shaped 6 m x 2 m x 0.3 m in average size each aligned east to west.</li> <li>(7l) (224794 569093) - Sub-Circular cairn 4 m in diameter on edge of old field boundary.</li> <li>(7m) (224841, 568944) - Nine possible cairns located in southern field up to 5 m x 2 m x 0.5 m in size all aligned north-to south and in alignment with the rig and furrow.</li> <li>(7n) (224951, 569090) - Rectangular enclosure with two compartments, defined by low earth and stone banks; 32 m in length 16 m wide and up to 0.3 m in height, aligned north east to south west. At the south west end of this enclosure is a group of at least nine 'lazy beds', each 1.5 m x 1.5 m x 0.3 m high.</li> </ul> <p>The earlier field boundaries, up to 0.4 m high and 1.5 m wide, and of turf and stone, criss-cross the improved farmland which defined by drystone walls (CFA field survey June 2019).</p>	
8	High Eldrig: Burnt Mound	224668	569070	MDG2194 (MDG2193)	HER; Field Survey	<p>The HER entry records a burnt mound, crescent-shaped on plan, measuring 12 m from north north east to south south west by 10 m and 0.6 m high; the hollow in its open side faces west north west on to the burn. (source: RCAHMS 1989)</p> <p>Field survey recorded the burnt mound to be as described by RCAHMS (CFA field survey June 2019).</p>	High
9	High Eldrig: Burnt Mound	224691	569121	MDG2195 (MDG2193)	HER; Field Survey	<p>The HER entry records that this burnt mound is crescent-shaped, with its open side facing west on to the burn, but all that is visible on the surface of the peat is a low mound about 0.5 m high, with traces of a smaller mound on the south. The main part of the mound forms a shallow crescent and measures about 9 m by 5 m. (source: RCAHMS 1989)</p> <p>Field survey recorded the burnt mound to be as described by RCAHMS (CFA field survey June 2019).</p>	High
10	High Eldrig, Monandie Burn: Burnt Mound	224335	569587	MDG2196	HER; Field Survey	<p>The HER entry records a burnt mound, crescent-shaped on plan with a deep hollow on its open side facing northwest onto the burn. The mound measures 12 m from north east to south west by 9 m transversely and up to 1 m high. (source: RCAHMS 1989)</p>	High

Asset No	Asset Name	Easting	Northing	HER No	Source	Description	Sensitivity
						Field survey recorded the burnt mound to be as described by RCAHMS (CFA field survey June 2019).	
11	High Eldrig, Monandie Burn: Burnt Mound	224298	569692	MDG2197	HER; Field Survey	The HER entry records a burnt mound above the west bank of the Monandie Burn. It is a large, 10.6 m north north west to south south east by 9.5 m transversely at the south end and 7.8 m at the north end. It is 0.8 m high on the west side and more on the east, where the ground drops away to the burn. The centre is entirely hollowed out, the space measuring 4.3 m north north west to south south east by 2.5 m across, opening to the north north west, away from the present course of the burn. The mound is covered with turf and bracken. (source: RCAHMS 1989)  Field survey recorded the burnt mound to be as described by RCAHMS (CFA field survey June 2019).	High
12	High Eldrig, Monandie Burn: Cairnfield	224530	569400	MDG2245	HER; Field Survey	The HER entry records that about four small cairns are visible immediately east south east of the sheepfold 550 m west north west of High Eldrig. (source: RCAHMS (1989))  Field survey did not identify any cairns in this area but a linear stone and turf field bank 0.2 m in height and 1 m in width, was identified (CFA field survey June 2019).	Medium
13	High Eldrig, Monandie Burn: Cairnfield	224021	569814	MDG2246	HER; Field Survey	The HER entry records that this group of cairns is situated on a terrace 100 m east south east of a square sheepfold and 250 m west north west of the Monandie Burn. The cairns measure up to 5 m in diameter. (source: RCAHMS 1989)  Field survey recorded four cairns, possibly associated with the adjacent small field system (24): (13a) (223933, 569859) - oval cairn, 3 m x 1.5 m x 1 m high (13b) (22407, 569778) - oval cairn 4 m x 2 m x 0.3 m high (13c) (22407, 569778) - flat, circular cairn 5 m in diameter (13c) (224022, 569758) - flat circular cairn 5 m in diameter (CFA field survey June 2019).	Medium
14	High Eldrig, Monandie Burn: Cairnfield	223930	569370	MDG2247	HER; Field Survey	The HER entry records that several peat-covered cairns are visible at the top of a gentle slope 300 m north north west of the confluence of the Monandie Burn and the Tarf Water. A thick stony bank can be traced running up the slope and extending in a gentle arc beneath the peat to the north. (source: RCAHMS 1989)  Field survey recorded a single oval mound, covered in grass and bracken in this area (CFA field survey June 2019).	Medium
15	High Eldrig: Cairnfield	223550	569650	MDG2248	HER; Field Survey	The HER entry records that a scatter of peat-covered cairns is visible on the crest of the low ridge to the south of the group of cairns (16). They may all be part of the same group, but no cairns were noted in the intervening ground at the date of visit. (source: RCAHMS 1989)  Field survey recorded at least three low turf-covered cairns on the west-facing slope of the low hill, south of burnt mound (18). (15a) (2235646, 569756) - circular cairn 3m in diameter 0.3 m high (15b) (223561, 569761) - oval cairn 9 m x 3 m x 0.3 m high (15c) (223564, 569761) - circular cairn 4 m in diameter up to 0.3 m high. (CFA field survey June 2019).	Medium
16	High Eldrig: Cairnfield	223580	569950	MDG2249	HER; Field Survey	The HER entry records that a group of small cairns extends down the south flank of a hillock from an old stone-walled enclosure that crowns the summit. The cairns may form a single group with the cairns noted under (15), but none were noted in the intervening ground at the date of visit. (source: RCAHMS 1989).  Field survey found no cairns in this area, which was covered in long grass and deep heather (CFA field survey June 2019)	Medium
17	Belgaverie: Cairnfield	222950	569860	MDG2250	HER; Field Survey	The HER entry records that small cairns are scattered over the crest and down the north-east flank of Belgaverie. The south end of the hillock was largely obscured by bracken at the date of visit but the Ordnance Survey 1:10,000 map indicates the presence of old fields and what are probably buildings. (source: RCAHMS 1989)  Field survey recorded two cairns in an area covered in long grass and deep heather to the north of the former Belgavie farmstead (25): (17a) (222963, 569856) - A flat circular pile of stones 2.5 m in diameter. (17b) (222980, 569879) - An oval pile of stones 4 m x 2 m x 0.2 m. (CFA field survey June 2019)	Medium
18	High Eldrig: Burnt Mound	223651	569786	MDG2253	HER; Field survey	The HER entry records a burnt mound situated on the west side of a burn 200 m west south west of a square sheepfold. It measures 10 m by 8 m and 0.5 m high, and a shallow hollow lies across the centre of the mound from east to west. (source: RCAHMS 1989)	High

Asset No	Asset Name	Easting	Northing	HER No	Source	Description	Sensitivity
						Field survey found the burnt mound as recorded by RCAHMS. Cattle have partially eroded a small area on top of the feature revealing burnt material (CFA field survey June 2019).	
19	High Eldrig: Burnt Mound	223677	569847	MDG2254	HER; Field Survey	The HER entry records a burnt mound situated in boggy ground to the east of a small burn and 180m west of a square sheepfold. Crescent-shaped on plan, it measures 10 m from north to south by 8 m and 0.9 m high, and the hollow in its open side faces west. (source: RCAHMS 1989)  Field survey found the burnt mound as recorded by RCAHMS but possibly slightly larger - 15 m x 10 m x 0.7 m high (CFA field survey June 2019).	High
20	High Eldrig, Monandie Burn: Burnt Mound	224035	569153	MDG2255	HER; Field Survey	The HER entry records that an oval burnt mound is situated on the west bank of the Monandie Burn some 100 m north of its confluence with the Tarf Water. The mound measures about 10 m from north east to south west by 6 m transversely and up to 0.7 m high. (source: RCAHMS 1989)  Field survey found the burnt mound to be as recorded by RCAHMS (CFA field survey June 2019).	High
21	High Eldrig: Enclosure; Possible hut circle	224774	569006	MDG2256	HER; Field Survey	The HER entry records that amongst the later cultivation remains, 280 m south west of High Eldrig, there are traces of an enclosure about 6 m in diameter within a stony bank. It may be a hut-circle and some of the mounds amongst the ridged fields are possibly the remains of earlier clearance heaps. (source: RCAHMS 1989)  Field survey found the enclosure to be as recorded by RCAHMS but larger, measuring at least 14 m in diameter externally. It appears that the field boundaries of the earlier field pattern, run up to and respect the enclosure; suggesting perhaps that the feature may be part of this field pattern, perhaps being a stock enclosure, or hay ree, rather than a prehistoric house (CFA field survey June 2019).	Medium
22	High Eldrig: Burnt Mound	224552	569446	MDG2257	HER; Field survey	The HER entry records that this burnt mound is situated on the east bank of a tributary of the Loch Strand watercourse some 60 m east of the sheepfold to the north west of High Eldrig. It forms a shallow crescent on plan, opening on to the burn on the west, and it measures 10 m from north to south by 5.5 m and 0.6 m high. (source: RCAHMS 1989)  Field survey recorded the burnt mound to be as recorded by RCAHMS (CFA field survey June 2019).	Medium
23	High Eldrig: Burnt Mound(s)	224520	569510	MDG2258	HER; Field survey	The HER entry records that two crescent-shaped burnt mounds are situated side by side in a loop of a tributary of the Loch Strand watercourse, some 80 m north east of the sheepfold to the north west of High Eldrig. The south west mound is the better defined and measures 8 m from north north east to south south west by 6.5 m transversely and 0.5 m high; the hollow in its open side faces west north west on to the burn. The north east mound measures 9 m from north east to south west by 5 m and 0.4 m in maximum height and forms a shallow crescent with its open side facing north west onto the burn.  Field survey recorded the burnt mounds to be as recorded by RCAHMS (CFA field survey June 2019).	Medium
24	Monandie Burn: Sheepfold	223900	569850	MDG14326	HER; Aerial Photography; Field Survey	The HER entry records that a sheepfold comprising three unroofed structures and three enclosures is depicted on the 1st edition Ordnance Survey map (Wigtownshire, Sheet 7, 1848). One enclosure is shown on the 1991 Ordnance Survey 1:10,000 map. (source: RCAHMS 1999).  High resolution aerial photograph (OS Masterplan imagery 2019) shows a diamond shaped sheepfold overlying a small field system of reverse S-shaped rig and furrow on at least two alignments (north to south in the west and east to west in the east).  Field survey recorded the well-preserved square drystone sheepfold 35 m x 35 m and up to 1.5 m high with an entrance in the east side, set within an improved field with evidence of rig and furrow. No other structures were observed (CFA field survey June 2019).	Low
25	Belgaverie: Farmstead, Field System, Sheepfold(s), Structure(s)	223020	569680	MDG13122	HER; Historic Map; Aerial Photography; Field Survey	The HER entry records that a farmstead, annotated 'Belgaverie', comprising four unroofed buildings and one unroofed structure, annotated 'Hay Ree', within the eastern portion of a four-part field system is depicted on the 1st edition Ordnance Survey map (Wigtownshire, Sheet 6, 1849). Four unroofed buildings and the fragmentary remains of the field-system are shown on the 1991 Ordnance Survey 1:10,000 map. (source: RCAHMS 1999)  A square enclosure, which sits in the western portion of the field system is depicted on the 1909 Ordnance Survey map (Wigtownshire, Sheet VII.SW).	Medium

Asset No	Asset Name	Easting	Northing	HER No	Source	Description	Sensitivity
						<p>High resolution aerial photograph (OS Masterplan imagery 2019) shows a field system of at least four (possibly five) fields each with evidence of reverse S-shaped rig and furrow. There are also what appear to be buildings and other structures visible in the north east field and a later, diamond-shaped drystone-walled sheepfold in the north west field.</p> <p>Field survey recorded the following elements:</p> <ul style="list-style-type: none"> <li>(25a) (223029 569726) - Hay Ree: Square enclosure 7 m x 7 m, badly preserved walls up to 0.5 m high and 1 m wide, covered in bracken.</li> <li>(25b) (223025, 569688) - Farm buildings: three poorly preserved structures obscured by bracken.</li> <li>(25c) (223026, 569624) – Drystone-walled hay ree/structure obscured by bracken, covered in turf and in a poor state of preservation, 6 m x 3 m x 0.5 m high.</li> <li>(25c) (222912 569714) - Sheepfold: Well preserved drystone-walled enclosure 23 m x 23 m and up to 1.8 m high (CFA field survey June 2019).</li> </ul>	
26	Belgaverie: Sheep Ree	223018	569816	CFA01	Historic Map; Aerial Photography; Field Survey	<p>A four compartment 'Sheep ree' is depicted on the 1st edition Ordnance Survey map (Wigtownshire, Sheet 6, 1849). It lies c.60 m to the north of 'Belgaverie' farmstead (27)</p> <p>High resolution aerial photograph (OS Masterplan imagery 2019) shows the remains of a sub oval enclosure with tow (possibly three) attached smaller enclosures.</p> <p>Field survey recorded the badly preserved remains of a drystone-walled structure obscured by bracken. The enclosure is c.15 m in diameter with the wall spread to 1.5 m and 0.8 m in maximum height. At least two compartments can be seen: one in the eastern portion of the structure and one in the south. Both are rectangular in plan measuring around 7 m x 3 m and surviving up to 1 m high. A badly preserved circular compartment to the south east is 8 m in diameter (CFA field survey June 2019).</p>	Low
27	Monandie Burn: Building, Enclosure(s)	224000	569500	MDG14328	HER; Historic Map; Field Survey	<p>What may be one unroofed building, with an attached enclosure, and two larger enclosures are depicted on the 1st edition of the Ordnance Survey map (Wigtownshire, Sheet 7, 1848), but they are not shown on the current edition of the Ordnance Survey 1:10000 map (1991). RCAHMS</p> <p>The structure is not depicted on the 2nd Edition Ordnance Survey map (Wigtownshire Sheet VII.SE, 1896).</p> <p>Field survey recorded the poorly preserved remains of a small structure, 5 m in diameter 0.3 m high with associated fields and improved land, covered in grass and bracken (CFA field survey June 2019).</p>	Low
28	Eldrig Fell: Enclosure(s), Structure	225400	568800	MDG14329	HER; Aerial Photography; Field Survey	<p>The HER entry records that one unroofed structure and an attached enclosure, both of which are attached to a larger enclosure, are depicted on the 1st edition of the Ordnance Survey 6-inch map (Wigtownshire, Sheet VII.SE, 1896). The larger enclosure, marked by pecked lines, is shown on the 1978 Ordnance Survey 1:10,000 map. (source: RCAHMS 1999)</p> <p>The enclosure, with a rectangular structure attached to its south side, can be seen on high resolution aerial photograph (OS Masterplan imagery 2019). The interior of the enclosure has evidence for 3 m wide rig and furrow cultivation aligned roughly west to east.</p> <p>Field survey recorded a low walled enclosure defining an area of improved land, and a single badly preserved rectangular stone-built structure 7 m x 3 m x 0.2 m high covered in bracken and turf (CFA field survey June 2019).</p>	Low
29	The Garry: Enclosure	223659	570791	MDG14467	HER; Aerial Photography; Field Survey	<p>The HER entry records that an enclosure is depicted on the 1st edition Ordnance Survey map (Wigtownshire 1848, sheet 7), but it is not shown on the 1977 Ordnance Survey 1:10,000 map. (source: RCAHMS 1999)</p> <p>A sub-oval enclosure measuring c. 25 m north to south x 18m east to west, is visible on high resolution aerial photograph (OS Masterplan imagery 2019).</p> <p>Field survey recorded the poorly preserved remains of a stone walled sub-circular enclosure 25 m in diameter by 0.4 m high with a small rectangular structure in its northern portion, 4 m x 2 m in extent alongside a cell like structure 2 m in</p>	Low

						diameter and up to 0.7 m high. The site is within a glacial erratic boulder field known as "the Gary" (CFA field survey June 2019).	
30	Drummiemickie: Building, Field System	222600	570200	MDG14474	HER; Aerial Photography; Field Survey	<p>The HER entry records that one unroofed building attached to a small field-system, marked by pecked lines, is depicted on the 1st edition Ordnance Survey map (Wigtownshire, Sheet 6, 1849), but they are not shown on the 1977 Ordnance Survey 1:10,000 map. (source RCAHMS 1999)</p> <p>High resolution aerial photograph (OS Masterplan imagery 2019) clearly shows a field system of three fields, two of which contain reverse S-shaped rig and furrow. A rectangular enclosure 7 m by 6 m occupies the south west corner of the easternmost field (at 222614, 570153).</p> <p>Field survey found the site to be covered in bracken and the structure depicted on the Ordnance Survey map was not identified. The outer field wall, 1 m in width and 0.3 m high was visible and is relatively well preserved, though covered in bracken. A small stone cairn 1 m in diameter was also found (at 222635, 570297). (CFA field survey June 2019)</p>	Medium
31	Dirvananie: Corn Drying Kiln, Field System, Structure(s), Township	222950	570220	MDG13123	HER; Historic Map; Aerial Photography; Field Survey	<p>The HER entry records that a township comprising seven unroofed buildings, one partially roofed building, one roofed building, one unroofed structures, which are annotated 'Hay Ree', two enclosures and a field-system are depicted on the 1st edition Ordnance Survey map (Wigtownshire 1849, sheet 6), while a small rectangular unroofed structure surrounded by at least two enclosures is also depicted on the 1st Edition Ordnance Survey map to the east of the main part of the township . Five unroofed buildings and the fragmentary remains of the field-system are shown on the 1977 Ordnance Survey 1:10,000 map. (source: RCAHMS 1999)</p> <p>On the 2nd Edition Ordnance Survey map (Wigtownshire Sheet VII.NW, 1896) the farm is annotated as 'In Ruins' and a square enclosure has been added to the southern portion of the site.</p> <p>A farmstead annotated as 'Darvanany' is depicted as three buildings and a square enclosure surrounded by cultivated fields on Roy's map (1747-55). On Blaeu's map (1654) as 'Dyrrmannany'.</p> <p>High resolution aerial photograph (OS Masterplan imagery 2019) clearly shows a well preserved, complex farmstead composed of irregularly shaped, field defined by curvilinear boundaries, and including a number of enclosures or structures, extending either side of the Ha' Hill Strand Burn. Most of the fields contain curvilinear or reverse S-shaped rig and furrow.</p> <p>Field survey found the site covered in dense bracken, but field boundaries and walls could clearly be seen and are in a good state of preservation. Features that were recorded include:</p> <ul style="list-style-type: none"> <li>(31a) (222953, 570266) - Building remains: drystone-wall construction measuring 14 m x 5 m and surviving up to 1.8 m high.</li> <li>(31b) (222866, 570370) - Rectangular structure 15 m x 5 m x 0.4m high partly obscured by bracken.</li> <li>(31c) (222962, 570213) - corn drying kiln: well preserved turf-covered and stone built. 1.5 m in height, 4 m in diameter and 1.5 m internal diameter (up to 0.5 m deep).</li> <li>(31d) (222986, 570200) - sheepfold 25 m x 25 m; well preserved and surviving up to 1.8 m high</li> <li>(31e) (223044, 570524) rectangular drystone structure, 10 m x 5 m x 0.6 m high covered in bracken and poorly preserved.</li> <li>(31f) (223208, 570399) Well preserved drystone walled sheepfold 40 m x 40 m in extent and surviving up to 1.8 m in height, surrounded by low lying stone and turf field bank defining improved fields with rig and furrow remains</li> </ul> <p>The other features depicted on the Ordnance Survey maps and visible on aerial photographs were obscured by bracken and could not be recorded during field survey. (CFA field survey June 2019)</p>	High
32	Dirvananie: Cairn	223249	570517	CFA02	Aerial Photography; Field Survey	<p>The cairn is visible on high resolution aerial photograph (OS Masterplan imagery 2019).</p> <p>Field survey recorded a circular cairn 6 m in diameter consisting of pile of stone up to 1 m high.</p>	Low

						(36d) (224942, 569983) - a well preserved rectangular hay ree (9 m x 6 m and up to 0.5 m high). (36e) (224949, 569984) - well preserved rectangular hay ree 9 m x 6 m in extent and surviving up to 0.5 m high in three courses surrounded by low turf-covered field bank. (36d) (224927, 570085) - low lying turf covered field boundary banks surrounding improved fields, obscured by bracken (CFA field survey June 2019).	
37	Low Eldrig: Field System, Enclosure	225713	568280	MDG14340	HER; Historic Map; Aerial Photography	The HER entry records that a farmstead comprising one unroofed building with an attached enclosure, and a field-system are depicted on the 1st edition of the Ordnance Survey map (Wigtownshire 1848, sheet 7). Three enclosures and the fragmentary remains of the field-system are shown on the 1978 Ordnance Survey 1:10,000 map. (source: RCAHMS 1999)  On the 2nd Edition Ordnance Survey map (1909) a square enclosure has been added in the middle of the field system.  The field system and later enclosure can be clearly seen on high resolution aerial photograph (OS Masterplan imagery 2019). The field system extends into the commercial forestry to the southwest and beyond the boundary of the proposed development. The remains of walls and enclosures can be seen preserved within the forestry.  Not visited during field survey as the location lies well away from any development area (CFA field survey June 2019).	Low
38	Dirvananie: Hay Ree	222806	570522	CFA08	Historic Map; Aerial Photography; Field Survey	A small unroofed structure is recorded as a 'Hay Ree' on the 1st Edition Ordnance Survey map (Wigtownshire, Sheet 7, 1849) but it is not visible on high-resolution aerial photograph (OS Masterplan imagery 2019).  Field survey found no remains of the hay ree (CFA field survey June 2019).	Negligible
39	Airieglasson: Enclosure and field system	224554	570958	MDG14479	Historic Map; Aerial Photography; Field Survey	An oval field, divided in two, annotated with dashed lines, is depicted on the 1st edition of the Ordnance Survey map (Wigtownshire, Sheet 7, 1849) with a small unroofed square structure attached to western edge and a larger rectangular unroofed structure to the west. A stone built square enclosure is constructed in the northern portion of the field system on the 2nd Edition Ordnance Survey map (Wigtownshire, Sheet VII.NE, 1896). It is part of a wider system of isolated, unconnected, fields that extend to the north east and north west shown on the Ordnance Survey 1st edition map.  A field, marked by an enclosing bank, and having a diamond shaped drystone walled sheepfold within it, is visible on high-resolution aerial photograph (OS Masterplan imagery 2019).  Field survey recorded the field as enclosed by curvilinear low-lying drystone walls. The field contains relict rig and furrow cultivation, at least five clearance cairns (2 m x 1 m and 0.5 m high in average size), and large stone-built sheep fold (26 m x 26 m and 1.7 m high (CFA field survey June 2019).	Low
40	High Eldrig: Quarry	225416	568968	CFA11	Historic Map; Aerial Photography; Field Survey	A sub-circular quarry is annotated on the 1909 Ordnance Survey map (Wigtownshire Sheet VII.SE) to the south east of the High Eldrig farmstead. It is not shown on the Ordnance Survey 1st edition map (1848).  Visible on high resolution aerial photograph (OS Masterplan imagery 2019).  Field survey recorded a well-preserved sub-oval quarry pit 27 m x 19 m in extent (CFA field survey June 2019).	Low
41	High Eldrig: Gravel Pit	225747	568892		Historic Map; Aerial Photography; Field Survey	A sub-circular gravel pit is annotated on the 1909 Ordnance Survey map (Wigtownshire Sheet VII.SE) to the south east of the High Eldrig Farm. It is not shown on the 1st edition map (1848).  Visible on high resolution aerial photograph (OS Masterplan imagery 2019).  Field survey recorded the poorly preserved remains of a sub-circular pit 17 m in diameter (CFA field survey June 2019).	Negligible
42	High Eldrig: Gravel Pit	225965	568666		Historic Map; Aerial Photography; Field Survey	A sub-oval gravel pit is annotated on the 1909 Ordnance Survey map (Wigtownshire Sheet VII.SE) to the south east of the High Eldrig farmstead. It is not shown on the 1st edition map (1848).  Not visible on high resolution aerial photograph (OS Masterplan imagery 2019).  Field survey found no remains of the gravel pit (CFA field survey June 2019).	Negligible

43	High Eldrig: Quarry	225236	569129	D&GHER1	HER; Historic Map; Field Survey	The HER entry records a quarry to the south east of High Eldrig Farmstead.  The quarry is not shown on the 1st edition Ordnance Survey map (Wigtownshire, sheet 7, 1848) or on the 1909 edition.  Field survey recorded a large circular quarry 10 m in diameter and up to 3 m deep with an entrance to the north east (CFA field survey June 2019).	Low
44	Ha' Hill: Possible Enclosure	223882	570404	D&GHER2	HER; Historic Map; Aerial Photography; Field Survey	The HER entry records that a possible enclosure has been identified on aerial photographs.  There is no obvious evidence of an enclosure on high resolution aerial photograph (OS Masterplan imagery 2019).  Field survey found no trace of the possible enclosure in an area covered in natural rocks (CFA field survey June 2019).	Negligible
45	Eldrig Fell: Cairnfield	225600	568600	MDG2170	HER	The HER entry records a cairnfield at this location but provides no details.  Not visited during field survey as the location lies well away from any development area (CFA field survey June 2019).	Medium
46	High Eldrig: Peat Cutting	224955	569607		Field Survey	Field survey recorded an area of peat cutting around 50 m in diameter (CFA field survey June 2019).	Negligible
47	Monandie Rig: Boundary bank/dyke	224606	570347		Field survey	Field survey recorded remains of a bank or dyke surviving to 0.3 m in height and 0.4 m in width, running roughly north-south along the west side of a watercourse which corresponds with boundary depicted on 1st edition Ordnance Survey Map (1848) (CFA field survey June 2019).	Negligible
48	The Gary: Structure, Enclosure, shieling (possible)	223682	570752		Field Survey	Field survey recorded poorly preserved remains of a possible enclosure (or structure) defined by a 4 m diameter circular arrangement of stones on the southern edge of 'The Gary', a short distance southeast of remains of an enclosure (29) (CFA field survey June 2019).	Low
49	Rig of The Garry: Peat Cutting	223935	570172		Field Survey	Field survey recorded a small area of peat cutting 10 m x 20 m in extent (CFA field survey 2019).	Negligible
